The Journal of

Membrane Biology

An international journal
for studies on the structure, function and genesis
of biomembranes

Volume 61–70 1981/1982

Editorial Board

W.R. Loewenstein, Miami, Editor-in-Chief

P.F. Baker, Kings, London
D. Branton, Harvard
P. Cuatrecasas, Burroughs Wellcome
J.M. Diamond, California L.A.
I.S. Edelman, Columbia
G. Eisenman, California L.A.
S. Fleischer, Vanderbilt
G. Giebisch, Yale
J. Handler, N.I.H.
D.A. Haydon, Cambridge
L. Heppel, Cornell
J.F. Hoffman, Yale
M. Kates, Ottawa
A. Klug, Cambridge
P. Läuger, Konstanz
A. Leaf, Harvard
A.L. Lehninger, Johns Hopkins
S.E. Luria, MIT
E.A.C. MacRobbie, Cambridge
V.T. Marchesi, Yale
H.M. McConnell, Stanford

Subject Index – Volumes 61–70

A23187
–, cation ionophores A23187 and valinomycin enhance protein-mediated transfer of rat liver microsomal phosphatidylinositol to liposomes, Patumraj, K., Slaby, F. 70:105
–, permeability and structural studies of heart cell gap junctions under normal and altered ionic conditions, Burt, J.M., Frank, J.S., Berns, M.W. 68:227
Acetabularia
–, current-voltage curve of electrogenic Cl^- pump predicts voltage-dependent Cl^- efflux in *Acetabularia*, Mummert, H., Hansen, U.-P., Gradmann, D. 62:139
ACh noise
–, effects of divalent cations on toad end-plate channels, Takeda, K., Gage, P.W., Barry, P.H. 64:55
Acidification
–, cell pH and luminal acidification in *Necturus* proximal tubule, O'Regan, M.G., Malnic, G., Giebisch, G. 69:99
–, evidence for activation of an active electrogenic proton pump in Ehrlich ascites tumor cells during glycolysis, Heinz, A., Sachs, G., Schafer, J.A. 61:143
–, role of luminal buffers in renal tubular acidification, Costa Silva, V.L., Campiglia, S.S., de Mello Aires, M., Malnic, G., Giebisch, G. 63:13
Acid secretion
–, morphometric analysis of parietal cell membrane transformations in isolated gastric glands, Gibert, A.J., Hersey, S.J. 67:113
Acini
–, calcium uptake into acini from rat pancreas: evidence for intracellular ATP-dependent calcium sequestration, Wakasugi, H., Kimura, T., Haase, W., Kribben, A., Kaufmann, R., Schulz, I. 65:205
Action potential
–, comparison of the action of La^{3+} and Ca^{2+} on contraction threshold and other membrane parameters of frog skeletal muscle, Dörrscheidt-Käfer, M. 62:95
–, excitation-revealed changes in cytoplasmic Cl^- concentration in "Cl^--starved" *Chara* cells, Beilby, M.J. 62:207
Activation volume
–, pressure dependence of the potassium currents of squid giant axon, Conti, F., Fioravanti, R., Segal, J.R., Stühmer, W. 69:35
–, pressure dependence of the sodium currents of squid giant axon, Conti, F., Fioravanti, R., Segal, J.R., Stühmer, W. 69:23
Active K^+ transport
–, intracellular K^+ activities and cell membrane potentials in a K^+-transporting epithelium, the midgut of tobacco hornworm (*Manduca sexta*), Moffett, D.F., Hudson, R.L., Moffett, S.B., Ridgway, R.L. 70:59
Active sodium transport
–, enhanced sensitivity to stimulation of sodium transport and cyclic AMP by antidiuretic hormone after Ca^{2+} depletion of isolated frog skin epithelium, Johnsen, A.H., Nielsen, R. 69:137
Active transport
–, amino acid active transport and stimulation by substrates in the absence of a Na^+ electrochemical potential gradient, Heinz, A., Jackson, J.W., Richey, B.E., Sachs, G., Schafer, J.A. 62:149
–, effects of bicarbonate on fluid and electrolyte transport by guinea pig and rabbit gallbladder: stimulation of absorption, Heinze, K., Peterson, K.-U., Wood, J.R. 62:175
–, electrogenic proton transport in epithelial membranes, Steinmetz, P.R., Andersen, O.S. 65:155
–, pump-leak sodium fluxes in low salt corn roots, Cheeseman, J.M. 70:157
–, stimulation of gallbladder fluid and electrolyte absorption by butyrate, Peterson, K.-U., Wood, J.R., Schulze, G., Heintze, K. 62:183
–, time course of active Na transport and oxidative metabolism following transepithelial potential perturbation in toad urinary bladder, Rosenthal, S.J., King, J.G., Essig, A. 63:157
Adaptive control
–, amino acid transport in isolated rat hepatocytes, Kilberg, M.S. 69:1
Adenylate cyclase
–, properties of rat erythrocyte membrane cytoskeletal structures produced by digitonin extraction: digitonin-insoluble β-adrenergic receptor, adenylate cyclase, and cholera toxin substrate, LeVine, H. III, Sahyoun, N.E., Cuatrecasas, P. 64:225
–, role of membrane gangliosides in the binding and action of bacterial toxins, Fishman, P.H. 69:85
ADH receptor
–, enhanced sensitivity to stimulation of sodium transport and cyclic AMP by antidiuretic hormone after Ca^{2+} depletion of isolated frog skin epithelium, Johnsen, A.H., Nielsen, R. 69:137
Adipocyte
–, triphenylmethylphosphonium cation distribution as a measure of hormone-induced alterations in white adipocyte membrane potential, Vallano, M.L., Sonenberg, M. 68:57
ADP
–, serosal Na/Ca exchange and H^+ and Na^+ transport by the turtle and toad bladders, Arruda, J.A.L., Sabatini, S., Westerfelder, C. 70:135
Adrenal medulla
–, calcium-dependence of catecholamine release from bovine adrenal medullary cells after exposure to intense electric fields, Knight, D.E., Baker, P.F. 68:107
β-Adrenergic receptor
–, effects of catecholamines on electrolyte transport in cortical collecting tubule, Iino, Y., Troy, J.L., Brenner, B.M. 61:67
–, properties of rat erythrocyte membrane cytoskeletal structures produced by digitonin extraction: digitonin-insoluble β-adrenergic receptor, adenylate cyclase, and cholera toxin substrate, LeVine, H. III, Sahyoun, N.E., Cuatrecasas, P. 64:225
Ag, *see entries under* Silver
Aggregates
–, barriers to water flow in vasopressin-treated toad urinary bladder, Levine, S.D., Kachadorian, W.A. 61:135
Aggregation
–, lipid-polyethylene glycol interactions: I. induction of fusion between liposomes, Boni, L.T., Stewart, T.P., Alderfer, J.L., Hui, S.W. 62:65
–, threshold effects on the lectin-mediated aggregation of liposomes: influence of the diameter of the liposomes, Alecio, M.R., Rando, R.R. 67:137

Alamethicin
–, ionophore-mediated transmembrane movement of divalent cations in small unilamellar liposomes: an evaluation of the chlortetracycline fluorescence technique and correlations with black lipid membrane studies, Mathew, M.K., Nagaraj, R., Balaram, P. 65:13
Alanine
–, sodium-coupled amino acid and sugar transport by *Necturus* small intestine, Gunter-Smith, P.J., Grasset, E., Schultz, S.G. 66:25
Alanine transport
–, multiple transport pathways for neutral amino acids in rabbit jejunal brush border vesicles, Stevens, B.R., Ross, H.J., Wright, E.M. 66:213
Aldosterone
–, aldosterone control of the density of sodium channels in the toad urinary bladder, Palmer, L.G., Li, J.H.-Y., Lindemann, B., Edelman, I.S. 64:91
–, metabolism of poly(A)(+)RNA in toad bladder epithelial cells, Wilce, P.A. 62:163
–, the significance of changes in thermodynamic affinity induced by aldosterone in sodium-transporting epithelia, Beauwens, R., Beaujean, V., Crabbé, J. 68:11
Alloimmune antiserum
–, interaction of L antibody with low potassium-type sheep red cells: resolution of two separate functional antibodies, Smalley, C.E., Tucker, E.M., Dunham, P.B., Ellory, J.C. 64:167
Amide ligands
–, ionic permeation of lipid bilayer membranes mediated by a neutral, noncyclic Li^+-selective carrier having imide and ether ligands. I. selectivity among monovalent cations, Margalit, R., Eisenman, G. 61:209
Amiloride
–, control of sodium permeability of the outer barrier in toad skin, Bevevino, L.H., Lacaz-Vieira, F. 66:97
–, effect of amiloride, ouabain, and Ba^{2+} on the nonsteady-state Na-K pump flux and short-circuit current in isolated frog skin epithelia, Nielsen, R. 65:227
–, effect of ouabain, amiloride, and antidiuretic hormone on the sodium-transport pool in isolated epithelia from frog skin (*Rana temporaria*), Nielsen, R. 65:221
–, the electrophysiology of rabbit descending colon. I. instantaneous transepithelial current-voltage relations and the current-voltage relations of the Na-entry mechanism, Thompson, S.M., Suzuki, W., Schultz, S.G. 66:41
–, intracellular ionic activities in frog skin, Nagel, W., Garcia-Diaz, J.F., Armstrong, W. McD. 61:127
–, the significance of changes in thermodynamic affinity induced by aldosterone in sodium-transporting epithelia, Beauwens, R., Beaujean, V., Crabbé, J. 68:11
Amino acids
–, amino acid transport in isolated rat hepatocytes, Kilberg, M.S. 69:1
–, anilinonaphthalene sulfonate fluorescence and amino acid transport in yeast, Slavík, J., Horák, J., Řihová, L., Kotyk, A. 64:175
Amino acid sequence
–, charge clusters and the orientation of membrane proteins, Weinstein, J.N., Blumenthal, R., van Renswoude, J., Kempf, C., Klausner, R.D. 66:203
–, primary structure of horse erythrocyte glycophorin HA. Its amino acid sequence has a unique homology with those of human and porcine erythrocyte glycophorins, Murayama, J.-I., Tomita, M., Hamada, A. 64:205
Amino acid transport
–, amino acid active transport and stimulation by substrates in the absence of a Na^+ electrochemical potential gradient, Heinz, A., Jackson, J.W., Richey, B.E., Sachs, G., Schafer, J.A. 62:149
–, delineation of sodium-stimulated amino acid transport pathways in rabbit kidney brush border vesicles, Mircheff, A.K., Kippen, I., Hirayama, B., Wright, E.M. 64:113
–, multiple transport pathways for neutral amino acids in rabbit jejunal brush border veicles, Stevens, B.R., Ross, H.J., Wright, E.M. 66:213
Amino aciduria
–, delineation of sodium-stimulated amino acid transport pathways in rabbit kidney brush border vesicles, Mircheff, A.K., Kippen, I., Hirayama, B., Wright, E.M. 64:113
Amino-phospholipids
–, trinitrobenzenesulfonic acid and fluorodinitrobenzene: probes to study local anesthetic effects in cell membranes, Bradford, P., Marinetti, G.V. 61:193
4-Aminopyridine
–, Ca-K bi-ionic action potential in squid giant axons, Terakawa, S. 63:41
–, periodic responses in squid axon membrane exposed intracellularly and extracellularly to solutions containing a single species of salt, Terakawa, S. 63:51
Aminopyrine accumulation
–, morphometric analysis of parietal cell membrane transformations in isolated gastric glands, Gibert, A.J., Hersey, S.J. 67:113
Amphibian collecting duct
–, miniature Ag-AgCl electrode for voltage clamping of the *Ambystoma* collecting duct, Delaney, R., Stoner, L.C. 64:45
Amphibian epithelia
–, the significance of changes in thermodynamic affinity induced by aldosterone in sodium-transporting epithelia, Beauwens, R., Beaujean, V., Crabbé, J. 68:11
Amphipaths
–, role of the bilayer in the shape of the isolated erythrocyte membrane, Lange, Y., Gough, A., Steck, T.L. 69:113
Amphiuma
–, intestinal HCO_3^- secretion in *Amphiuma:* stimulation by mucosal Cl^- and serosal Na^+, White, J.F., Imon, M.A. 68:207
Amphotericin
–, echinocyte formation induced by potential changes of human red blood cells, Glaser, R. 66:79
Anilinonaphthalene sulfonate
–, anilinonaphthalene sulfonate fluorescence and amino acid transport in yeast, Slavík, J., Horák, J., Řihová, L., Kotyk, A. 64:175
Anion effect
–, pressure and temperature effects on human red cell cation transport, Hall, A.C., Ellory, J.C., Klein, R.A. 68:47
Anion exchange
–, effects of salicylate on HCO_3^-/Cl^- exchange across the human erythrocyte membrane, Crandall, E.D., Winter, H.I., Schaeffer, J.D., Bidani, A. 65:139
–, sulfate transport in rabbit ileum: characterization of the serosal border anion exchange process, Langridge-Smith, J.E., Field, M. 63:207
Anion permeability
–, general and transport properties of hypotonic and isotonic preparations of resealed erythrocyte ghosts, Jausel-Hüsken, S., Deuticke, B. 63:61
–, phosphate transport in human red blood cells: concentration

dependence and pH dependence of the unidirectional phosphate flux at equilibrium conditions, Schnell, K.F., Besl, E., v. der Mosel, R. 61:173
Anions
–, effect of anions on the cation selectivity of gramicidin-containing liposomes, Cohen, B.E. 68:79
Anion-sensitive Mg^{2+}-ATPase
–, an ATP-driven proton pump in brush-border membranes from rat renal cortex, Kinne-Saffran, E., Beauwens, R., Kinne, R. 64:67
Anion transport
–, the external anion binding site of the human erythrocyte anion transporter: DNDS binding and competition with chloride, Fröhlich, O. 65:111
–, the kinetics of anion equilibrium exchange across the red blood cell membrane as measured by means of ^{35}S thiocyanate, Dissing, S., Romano, L., Passow, H. 62:219
–, the kinetics of intramolecular cross-linking of the band 3 protein in the red blood cell membrane by 4,4′-diisothiocyano dihydrostilbene-2,2′-disulfonic acid (H_2DIDS), Kampmann, L., Lepke, S., Fasold, H., Fritzsch, G., Passow, H. 70:199
–, role of luminal buffers in renal tubular acidification, Costa Silva, V.L., Campiglia, S.S., de Mello Aires, M., Malnic, G., Giebisch, G. 63:13
–, transport of benzenesulfonic acid derivatives through the rat erythrocyte membrane, Kitagawa, S., Terada, H., Kametani, F. 65:49
Annelida (*Nereis diversicolor*)
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
–, recycling of D-glucose in collagenous cuticle: a means of nutrient conservation?, Gomme, J. 62:47
Anomalous rectifier
–, the dual effect of rubidium ions on potassium efflux in depolarized frog skeletal muscle, Spalding, B.C., Swift, J.G., Senyk, O., Horowicz, P. 69:145
Antibiotics
–, electrical properties of the rabbit urinary bladder assessed using gramicidin D, Lewis, S.A., Wills, N.K. 67:45
Antibodies
–, characteristics of antibodies to guinea pig ($Na^+ + K^+$)-adenosine triphosphatase and their use in cell-free synthesis studies, McDonough, A.A., Hiatt, A., Edelman, I.S. 69:13
Anticalmodulin drugs
–, drugs that block calmodulin activity inhibit cell-to-cell coupling in the epidermis of *Tenebrio molitor*, Lees-Miller, J.P., Caveney, S. 69:233
Antidiuretic hormone
–, effect of distension on ADH-induced osmotic water flow in toad urinary bladder, Kachadorian, W.A., Levine, S.D. 64:181
–, effect of ouabain, amiloride, and antidiuretic hormone on the sodium-transport pool in isolated epithelia from frog skin (*Rana temporaria*), Nielsen, R. 65:221
–, enhanced sensitivity to stimulation of sodium transport and cyclic AMP by antidiuretic hormone after Ca^{2+} depletion of isolated frog skin epithelium, Johnsen, A.H., Nielsen, R. 69:137
–, extracellular Ca^{2+} and the effect of antidiuretic hormone on the water permeability of the toad urinary bladder: an example of flow-induced alteration of flow, Hardy, M.A., DiBona, D.R. 67:27
Antifreeze
–, properties of sodium and potassium channels of the squid giant axon far below 0 °C, Kukita, F. 68:151
Apical membrane
–, the electrophysiology of rabbit descending colon. I. instantaneous transepithelial current-voltage relations and the current-voltage relations of the Na-entry mechanism, Thompson, S.M., Suzuki, W., Schultz, S.G. 66:41
–, the electrophysiology of rabbit descending colon. II. current-voltage relations of the apical membrane, the basolateral membrane, and the parallel pathways, Thompson, S.M., Suzuki, Y., Schultz, S.G. 66:55
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
–, ion selectivity of the apical membrane Na channel in the toad urinary bladder, Palmer, L.G. 67:91
–, noise analysis of the K^+ current through the apical membrane of *Necturus* gallbladder, Gögelein, H., Van Driessche, W. 63:243
Apical Na permeability
–, aldosterone control of the density of sodium channels in the toad urinary bladder, Palmer, L.G., Li, J.H.-Y., Lindemann, B., Edelman, I.S. 64:91
–, the role of sodium-channel density in the natriferic response of the toad urinary bladder to an antidiuretic hormone, Li, J.H.-Y., Palmer, L.G., Edelman, I.S., Lindemann, B. 64:77
Apical Na-site
–, fluctuation analysis of short-circuit current in a warm-blooded sodium-retaining epithelium: site current, density, and interaction with triamterene, Christensen, O., Bindslev, N. 65:19
Arachidonic acid
–, uptake of arachidonic acid into membrane phospholipids: effect on chloride transport across cornea, Schaeffer, B.E., Kanchuger, M.S., Razin, M., Zadunaisky, J.A. 69:177
Artificial membrane
–, periodic responses in squid axon membrane exposed intracellularly and extracellularly to solutions containing a single species of salt, Terakawa, S. 63:51
Aspartic acid
–, anilinonaphthalene sulfonate fluorescence and amino acid transport in yeast, Slavík, J., Horák, J., Řihová, L., Kotyk, A. 64:175
ATP
–, amino acid active transport and stimulation by substrates in the absence of a Na^+ electrochemical potential gradient, Heinz, A., Jackson, J.W., Richey, B.E., Sachs, G., Schafer, J.A. 62:149
–, serosal Na/Ca exchange and H^+ and Na^+ transport by the turtle and toad bladders, Arruda, J.A.L., Sabatini, S., Westerfelder, C. 70:135
ATPase
–, the proton gradient across the vacuo-lysosomal membrane of lutoids from the latex of *Hevea brasiliensis*. I. further evidence for a proton-translocating ATPase on the vacuo-lysosomal membrane of intact lutoids, Cretin, H. 65:175
ATPase activity
–, modulation of ATPase activities of human erythrocyte membranes by free fatty acids or phospholipase A_2, Schmalzing, G., Kutschera, P. 69:65
ATP-driven H^+ pump
–, an ATP-driven proton pump in brush-border membranes from rat renal cortex, Kinne-Saffran, E., Beauwens, R., Kinne, R. 64:67
ATP synthesis
–, stoichiometry of proton movements coupled to ATP synthe-

sis driven by a pH gradient in *Streptococcus lactis,* Maloney, P.C., Hansen, F.C. III 66:63
Avena
–, separation of tonoplast and plasma membrane potential and resistance in cells of oat coleoptiles, Bates, G.W., Goldsmith, M.H.M., Goldsmith, T.H. 66:15
Axon
–, pressure dependence of the potassium currents of squid giant axon, Conti, F., Fioravanti, R., Segal, J.R., Stühmer, W. 69:35
–, pressure dependence of the sodium currents of squid giant axon, Conti, F., Fioravanti, R., Segal, J.R., Stühmer, W. 69:23
Axon membrane
–, partial purification and characterization of $(Na^+ + K^+)$-ATPase from garfish olfactory nerve axon plasma membrane, Kracke, G.R., O'Neal, S.G., Chacko, G.K. 63:147
–, periaxonal surface calcium binding and distribution of charge on the faces of squid axon potassium channel molecules, Fohlmeister, J.F., Adelman, W.J., Jr. 70:115
Ba, *see entries under* Barium
Bacillus subtilis
–, measurement of membrane potential in *Bacillus subtilis:* a comparison of lipophilic cations, rubidium ion, and a cyanine dye as probes, Zaritsky, A., Kihara, M., Macnab, R.M. 63:215
Bacterial transport
–, use of gene fusions to study bacterial transport proteins, Shuman, H.A. 61:1
Bacteriorhodopsin
–, bacteriorhodopsin-mediated photoelectric responses in lipid/water systems, Drachev, L.A., Kaulen, A.D., Skulachev, V.P., Voytsitsky, V.M. 65:1
Band 3 protein
–, the kinetics of intramolecular cross-linking of the band 3 protein in the red blood cell membrane by 4,4′-diisothiocyano dihydrostilbene-2,2′-disulfonic acid (H_2DIDS), Kampmann, L., Lepke, S., Fasold, H., Fritzsch, G., Passow, H. 70: 199
Barium
–, effect of amiloride, ouabain, and Ba^{2+} on the nonsteady-state Na-K pump flux and short-circuit current in isolated frog skin epithelia, Nielsen, R. 65:227
–, noise analysis reveals K^+ channel fluctuations in the apical membrane of rabbit colon, Wills, N.K., Zeiske, W., van Driessche, W. 69:187
Basolateral membrane
–, active and passive Na^+ fluxes across the basolateral membrane of rabbit urinary bladder, Eaton, D.C., Frace, A.M., Silverthorn, S.U. 67:219
–, Ca^{2+}-transport across basal-lateral plasma membranes from rat small intestinal epithelial cells, Hildmann, B., Schmidt, A., Murer, H. 65:55
–, the electrophysiology of rabbit descending colon. II. current-voltage relations of the apical membrane, the basolateral membrane, and the parallel pathways, Thompson, S.M., Suzuki, Y., Schultz, S.G. 66:55
Beat rate
–, small signal impedance of heart cell membranes, Clapham, D.E., DeFelice, L.J. 67:63
Benzenesulfonic acid derivatives
–, transport of benzenesulfonic acid derivatives through the rat erythrocyte membrane, Kitagawa, S., Terada, H., Kametani, F. 65:49
β-cell
–, potassium-induced insulin release and voltage noise measurements in single mouse islets of Langerhans, Dawson, C.M., Atwater, I., Rojas, E. 64:33
Bicarbonate ions
–, carbon dioxide or bicarbonate ions release Ca^{2+} from internal stores in crustacean myofibrillar bundles, Lea, T.J., Ashley, C.C. 61:115
–, effects of bicarbonate on fluid and electrolyte transport by guinea pig and rabbit gallbladder: stimulation of absorption, Heintze, K., Peterson, K.-U., Wood, J.R. 62:175
–, intestinal HCO_3^- secretion in *Amphiuma:* stimulation by mucosal Cl^- and serosal Na^+, White, J.F., Imon, M.A. 68:207
–, stimulation of gallbladder fluid and electrolyte absorption by butyrate, Peterson, K.U., Wood, J.R., Schulze, G., Heintze, K. 62:183
Bicarbonate/Cl-exchange
–, stimulation of gallbladder fluid and electrolyte absorption by butyrate, Peterson, K.-U., Wood, J.R., Schulze, G., Heintze, K. 62:183
Bicarbonate transport
–, cell pH and luminal acidification in *Necturus* proximal tubule, O'Regan, M.G., Malnic, G., Giebisch, G. 69:99
Bi-ionic action potential
–, Ca-K bi-ionic action potential in squid giant axons, Terakawa, S. 63:41
Bilayer
–, ionic permeation of lipid bilayer membranes mediated by a neutral, noncyclic Li^+-selective carrier having imide and ether ligands. I. selectivity among monovalent cations, Margalit, R., Eisenman, G. 61:209
–, role of the bilayer in the shape of the isolated erythrocyte membrane, Lange, Y., Gough, A., Steck, T.L. 69:113
Bilayer defects
–, lipid-polyethylene glycol interactions: II. formation of defects in bilayers, Boni, L.T., Stewart, T.P., Alderfer, J.L., Hui, S.W. 62:71
Bilayer membranes
–, erythrosin and pH gradient induced photo-voltages in bilayer membranes, Varnadore, W.E. Jr., Arrieta, R.T., Duchek, J.R., Huebner, J.S. 65:141
Binding constants
–, surface charges on the outer side of mollusc neuron membrane, Kostyuk, P.G., Mironov, S.L., Doroshenko, P.A. 70:171
Binding models
–, measurement of membrane potential in *Bacillus subtilis:* a comparison of lipophilic cations, rubidium ion, and a cyanine dye as probes, Zaritsky, A., Kihara, M., Macnab, R.M. 63:215
Binding sites
–, ion interactions in (l-^{13}C)D-val^8 and D-leu^{14} analogs from gramicidin A, the helix sense of the channel and location of ion binding sites, Urry, D.W., Walker, J.T., Trapane, T.L. 69:225
Biological membrane
–, anilinonaphthalene sulfonate fluorescence and amino acid transport in yeast, Slavík, J., Horák, J., Řihová, L., Kotyk, A. 64:175
Biosynthesis
–, characteristics of antibodies to guinea pig $(Na^+ + K^+)$-adenosine triphosphatase and their use in cell-free synthesis studies, McDonough, A.A., Hiatt, A., Edelman, I.S. 69:13
Black lipid membranes
–, carrier-mediated ion transport through black membranes of lipid mixtures and its coupling to Ca^{2+}-induced phase separation, Schmidt, G., Eibl, H., Knoll, W. 70:147
Brush border membranes
–, delineation of sodium-stimulated amino acid transport pathways in rabbit kidney brush border vesicles, Mircheff, A.K., Kippen, I., Hirayama, B., Wright, E.M. 64:113
–, further studies of proximal tubular brush border membrane

D-glucose transport heterogeneity, Turner, R.J., Moran, A. 70:37
–, stoichiometric studies of the renal outer cortical brush border membrane D-glucose transporter, Turner, R.J., Moran, A. 67:73
Brush border transport
–, multiple transport pathways for neutral amino acids in rabbit jejunal brush border vesicles, Stevens, B.R., Ross, H.J., Wright, E.M. 66:213
Buffer permeability
–, role of luminal buffers in renal tubular acidification, Costa Silva, V.L., Campiglia, S.S., de Mello Aires, M., Malnic, G., Giebisch, G. 63:13
Ca, *see entries under* Calcium
Cable analysis
–, cellular and paracellular resistances of the *Necturus* proximal tubule, Guggino, W.B., Windhager, E.E., Boulpaep, E.L., Giebisch, G. 67:143
Caerulein
–, action of caerulein, gastrin 17, pentagastrin, and secretin on the active transport of sodium by the frog skin, Greenwell, J.R., Low, H.S. 61:91
Calcium
–, calcium-dependence of catecholamine release from bovine adrenal medullary cells after exposure to intense electric fields, Knight, D.E., Baker, P.F. 68:107
–, drugs that block calmodulin activity inhibit cell-to-cell coupling in the epidermis of *Tenebrio molitor*, Lees-Miller, J.P., Caveney, S. 69:233
–, effects of calcium and lanthanum on phosphate efflux from nonmyelinated nerve fibers, Jirounek, P., Rouiller, M., Jones, G.J., Straub, R.W. 65:125
–, effects of divalent cations on toad end-plate channels, Takeda, K., Gage, P.W., Barry, P.H. 64:55
–, extracellular Ca^{2+} and the effect of antidiuretic hormone on the water permeability of the toad urinary bladder: an example of flow-induced alteration of flow, Hardy, M.A., DiBona, D.R. 67:27
–, ricinoleate and deoxycholate are calcium ionophores in jejunal brush border vesicles, Maenz, D.D., Forsyth, G.W. 70:125
Calcium binding
–, periaxonal surface calcium binding and distribution of charge on the faces of squid axon potassium channel molecules, Fohlmeister, J.F., Adelman, W.J., Jr. 70:115
Calcium channel inactivation
–, potassium-induced insulin release and voltage noise measurements in single mouse islets of Langerhans, Dawson, C.M., Atwater, I., Rojas, E. 64:33
Calcium channel
–, energy profile of the calcium channel in the membrane of mollusc neurons, Kostyuk, P.G., Mironov, S.L., Doroshenko, P.A. 70:181
Calcium-dependent action potential
–, Ca-K bi-ionic action potential in squid giant axons, Terakawa, S. 63:41
Calcium-dependent K permeability
–, a method for estimating free Ca within human red blood cells, with an application to the study of their Ca-dependent K permeability, Simons, T.J.B. 66:235
Calcium effects
–, regulation of passive potassium transport of normal and transformed 3T3 mouse cell cultures by external calcium concentration and temperature, Ernst, M., Adam, G. 61:155
Calcium efflux
–, computer simulation and interpretation of ^{45}Ca efflux profile patterns, Borle, A.B., Uchikawa, T., Anderson, J.H. 68:37
Calcium exchange
–, evidence for two compartments of exchangeable calcium in isolated rat liver mitochondria obtained using a ^{45}Ca exchange technique in the presence of magnesium, phosphate, and ATP at 37 °C, Barritt, G.J. 62:53
Calcium fluxes
–, effects of Na readmission on cellular ^{45}Ca fluxes in Na-depleted guinea pig taenia coli, Aaronson, P., van Breeman, C. 65:89
Calcium homeostasis
–, effects of Na readmission on cellular ^{45}Ca fluxes in Na-depleted guinea pig taenia coli, Aaronson, P., van Breeman, C. 65:89
Calcium-induced phase separation
–, carrier-mediated ion transport through black membranes of lipid mixtures and its coupling to Ca^{2+}-induced phase separation, Schmidt, G., Eibl, H., Knoll, W. 70:147
Calcium ionophore
–, cyclic AMP and intracellular ionic activities in *Necturus* gallbladder, Diez de los Rios, A., DeRose, N.E., Armstrong, W. McD 63:25
–, disruption of energy transduction in sarcoplasmic reticulum by trypsin cleavage of $(Ca^{2+}+Mg^{2+})$-ATPase, Scott, T.L., Shamoo, A.E. 64:137
–, ricinoleate and deoxycholate are calcium ionophores in jejunal brush border vesicles, Maenz, D.D., Forsyth, G.W. 70:125
Calcium + Mg^{2+}-ATPase
–, disruption of energy transduction in sarcoplasmic reticulum by trypsin cleavage of $(Ca^{2+}+Mg^{2+})$-ATPase, Scott, T.L., Shamoo, A.E. 64:137
Calcium-mediated cross-liniking
–, effects of the calcium-mediated enzymatic cross-linking of membrane proteins on cellular deformability, Smith, B.D., LaCelle, P.L., Siefring, G.E., Jr., Lowe-Krentz, L., Lorand, L. 61:75
Calcium pools
–, calcium uptake into acini from rat pancreas: evidence for intracellular ATP-dependent calcium sequestration, Wakasugi, H., Kimura, T., Haase, W., Kribben, A., Kaufmann, R., Schulz, I. 65:205
Calcium profiles
–, computer simulation and interpretation of ^{45}Ca efflux profile patterns, Borle, A.B., Uchikawa, T., Anderson, J.H. 68:37
Calcium pump
–, calcium uptake into acini from rat pancreas: evidence for intracellular ATP-dependent calcium sequestration, Wakasugi, H., Kimura, T., Haase, W., Kribben, A., Kaufmann, R., Schulz, I. 65:205
Calcium release
–, carbon dioxide or bicarbonate ions release Ca^{2+} from internal stores in crustacean myofibrillar bundles, Lea, T.J., Ashley, C.C. 61:115
–, mechanism of calcium release from skeletal sarcoplasmic reticulum, Miyamoto, H., Racker, E. 66:193
Calcium transport
–, ATP-dependent calcium transport by a Golgi-enriched membrane fraction from mouse mammary gland, Neville, M.C., Selker, F., Semple, K., Watters, C. 61:97
–, Ca^{2+}-transport across basal-lateral plasma membranes from rat small intestinal epithelial cells, Hildmann, B., Schmidt, A., Murer, H. 65:55
–, effect of sodium on cellular calcium transport in rat kidney, Borle, A.B. 66:183
–, evidence for two compartments of exchangeable calcium in isolated rat liver mitochondria obtained using a ^{45}Ca exchange technique in the presence of magnesium, phosphate, and ATP at 37 °C, Barritt, G.J. 62:53
–, the mechanism of voltage-sensitive dye responses on sarco-

plasmic reticulum, Beeler, T.J., Farmen, R.H., Martonosi, A.N. 62:113
Calcium uptake
–, disruption of energy transduction in sarcoplasmic reticulum by trypsin cleavage of $(Ca^{2+} + Mg^{2+})$-ATPase, Scott, T.L., Shamoo, A.E. 64:137
Calcium uptake and efflux
–, serosal Na/Ca exchange and H^+ and Na^+ transport by the turtle and toad bladders, Arruda, J.A.L., Sabatini, S., Westenfelder, C. 70:135
Calmodulin
–, drugs that block calmodulin activity inhibit cell-to-cell coupling in the epidermis of *Tenebrio molitor*, Lees-Miller, J.P., Caveney, S. 69:233
cAMP, *see* Cyclic AMP
Cancer cell
–, cell junction and cyclic AMP: III. promotion of junctional membrane permeability and junctional membrane particles in a junction-deficient cell type, Azarnia, R., Dahl, G., Loewenstein, W.R. 63:133
Carbon-13 magnetic resonance
–, ion interactions in (l-^{13}C)D-val^8 and D-leu^{14} analogs from gramicidin A, the helix sense of the channel and location of ion binding sites, Urry, D.W., Walker, J.T., Trapane, T.L. 69:225
Carbon dioxide
–, carbon dioxide or bicarbonate ions release Ca^{2+} from internal stores in crustacean myofibrillar bundles, Lea, T.J., Ashley, C.C. 61:115
–, effects of salicylate on the HCO_3^-/Cl^- exchange across the human erythrocyte membrane, Crandall, E.D., Winter, H.I., Schaeffer, J.D., Bidani, A. 65:139
Cardiolipin
–, morphology of the intermediate stages in the lamellar to hexagonal lipid phase transition, Borovjagin, V.L., Vergara, J.A., McIntosh, T.J. 69:199
Carrier
–, effects of variation of ion and methylation of carrier on the rate constants of macrotetralide-mediated ion transport in lipid bilayers, Laprade, R., Grenier, F., Lapointe, J.-Y., Asselin, S. 68:191
–, evidence for a two-state mobile carrier mechanism in erythrocyte choline transport: effects of substrate analogs on inactivation of the carrier by N-ethylmaleimide, Devés, R., Krupka, R.M. 61:21
–, ionic permeation of lipid bilayer membranes mediated by a neutral, noncyclic Li^+-selective carrier having imide and ether ligands. I. selectivity among monovalent cations, Margalit, R., Eisenman, G. 61:209
–, reaction of internal forms of the choline carrier of erythrocytes with N-ethylmaleimide: evidence for a carrier conformational change on complex formation, Devés, R., Krupka, R.M. 63:99
Carrier-mediated ion transport
–, carrier-mediated ion transport through black membranes of lipid mixtures and its coupling to Ca^{2+}-induced phase separation, Schmidt, G., Eibl, H., Knoll, W. 70:147
–, GABA efflux from synaptosomes: effects of membrane potential, and external GABA and cations, Nelson, M.T., Blaustein, M.P. 69:213
Carrier model
–, L-leucine transport in human red blood cells: a detailed kinetic analysis, Rosenberg, R. 62:79
Catecholamine
–, alpha and beta adrenergic agonists stimulate water absorption in the rat proximal tubule, Weinman, E.J., Sansom, S.C., Knight, T.F., Senekjian, H.O. 69:107
–, hormonal regulation of junctional permeability: upregulation by catecholamine and prostaglandin E_1, Radu, A., Dahl, G., Loewenstein, W.R. 70:239
Cation activation site
–, thallium interaction with the gastric (K,H)-ATPase, Rabon, E.C., Sachs, G. 62:19
Cation inhibitory site
–, thallium interaction with the gastric (K,H)-ATPase, Rabon, E.C., Sachs, G. 62:19
Cation transport
–, effects of Ag^+ on ion transport by the corneal epithelium of the rabbit, Klyce, S.D., Marshall, W.S. 66:133
–, effects of the plant alkaloid sanguinarine on cation transport by human red blood cells and lipid bilayer membranes, Cala, P.M., Nørby, J.G., Tosteson, D.C. 64:23
Cell
–, further studies on the charge-related alterations of methotrexate transport in Ehrlich ascites tumor cells by ionic liposomes: correlation with liposome-cell association, Fry, D.W., Goldman, I.D. 66:87
Cell density
–, cell junction and cyclic AMP: II. modulations of junctional membrane permeability, dependent on serum and cell density, Flagg-Newton, J.L., Loewenstein, W.R. 63:123
Cell-free synthesis
–, characteristics of antibodies to guinea pig $(Na^+ + K^+)$-adenosine triphosphatase and their use in cell-free synthesis studies, McDonough, A.A., Hiatt, A., Edelman, I.S. 69:13
Cell junction
–, cell junction and cyclic AMP: II. modulations of junctional membrane permeability, dependent on serum and cell density, Flagg-Newton, J.L., Loewenstein, W.R. 63:123
–, cell junction and cyclic AMP: III. promotion of junctional membrane permeability and junctional membrane particles in a junction-deficient cell type, Azarnia, R., Dahl, G., Loewenstein, W.R. 63:133
Cell junction permeability
–, hormonal regulation of cell junction permeability: upregulation by catecholamine and prostaglandin E_1, Radu, A., Dahl, G., Loewenstein, W.R. 70:239
Cell membrane potential
–, intracellular K^+ activities and cell membrane potentials in a K^+-transporting epithelium, the midgut of tobacco hornworm (*Manduca sexta*), Moffett, D.F., Hudson, R.L., Moffett, S.B., Ridgway, R.L. 70:59
Cell pH
–, cell pH and luminal acidification in *Necturus* proximal tubule, O'Regan, M.G., Malnic, G., Giebisch, G. 69:99
Cell proliferation
–, regulation of passive potassium transport of normal and transformed 3T3 mouse cell cultures by external calcium concentration and temperature, Ernst, M., Adam, G. 61:155
Cell rotation
–, rotation of cells in an alternating electric field: theory and experimental proof, Holzapfel, C., Vienken, J., Zimmermann, U. 67:13
Cell-to-cell channel
–, cell junction and cyclic AMP: II. modulations of junctional membrane permeability, dependent on serum and cell density, Flagg-Newton, J.L., Loewenstein, W.R. 63:123
–, hormonal regulation of junctional permeability; upregulation by catecholamine and prostaglandin E_1, Radu, A., Dahl, G., Loewenstein, W.R. 70:239
Cell-to-cell communication
–, hormonal regulation of junctional permeability: upregulation by catecholamine and prostaglandin E_1, Radu, A., Dahl, G., Loewenstein, W.R. 70:239
Cell-to-cell junction
–, cell junction and cyclic AMP: I. upregulation of junctional

membrane permeability and junctional membrane particles by administration of cyclic nucleotide or phosphodiesterase inhibitor, Flagg-Newton, J.L., Dahl, G., Loewenstein, W.R. 63:105
–, drugs that block calmodulin activity inhibit cell-to-cell coupling in the epidermis of *Tenebrio molitor,* Lees-Miller, J.P., Caveney, S. 69:233
Cell-to-cell membrane channels
–, cell junction and cyclic AMP: I. upregulation of junctional membrane permeability and junctional membrane particles by administration of cyclic nucleotide or phosphodiesterase inhibitor, Flagg-Newton, J.L., Dahl, G., Loewenstein, W.R. 63:105
–, cell junction and cyclic AMP: III. promotion of junctional membrane permeability and junctional membrane particles in a junction-deficient cell type, Azarnia, R., Dahl, G., Loewenstein, W.R. 63:133
–, hormonal regulation of cell junction permeability: upregulation by catecholamine and prostaglandin E_1, Radu, A., Dahl, G., Loewenstein, W.R. 70:239
Cellular and paracellular pathways
–, analysis of presteady-state Na^+ fluxes across the rabbit corneal endothelium, Lim, J.J., Ussing, H.H. 65:197
Cellular Ca
–, effect of sodium on cellular calcium transport in rat kidney, Borle, A.B. 66:183
–, enhanced sensitivity to stimulation of sodium transport and cyclic AMP by antidiuretic hormone after Ca^{2+} depletion of isolated frog skin epithelium, Johnsen, A.H., Nielsen, R. 69:137
Cellular composition
–, cellular lithium and transepithelial transport across toad urinary bladder, Hughes, P.M., Macknight, A.D.C. 70:69
Cellular energy metabolism
–, regulation of cellular energy metabolism, Erecińska, M., Wilson, D.F. 70:1
Cellular K^+ activity
–, intracellular potential and K^+ activity in rat kidney proximal tubular cells in acidosis and K^+ depletion, Cemerikić, D., Wilcox, C.S., Giebisch, G. 69:159
–, state of water in extremely halophilic bacteria: heat of dilution of *Halobacterium halobium,* Brown, A.D., Duong, A. 64:187
Cellular respiration
–, regulation of cellular energy metabolism, Erecińska, M., Wilson, D.F. 70:1
Cellular vesicle adsorption
–, binding and incorporation of lecithin-cholesterol vesicles to lymphocytes: a spin-label study, Dresdner, G., Hammarström, L., Edvard Smith, C.I. 64:155
Cell volume
–, ionic regulation of the unicellular green alga *Dunaliella tertiolecta,* Ehrenfeld, H., Cousin, J.-L. 70:47
–, transepithelial Na^+ transport and the intracellular fluids: a computer study, Civan, M.M., Bookman, R.J. 65:63
Cell water
–, state of water in extremely halophilic bacteria: heat of dilution of *Halobacterium halobium,* Brown, A.D., Duong, A. 64:187
Chara
–, excitation-revealed changes in cytoplasmic Cl^- concentration in "Cl^--starved" *Chara* cells, Beilby, M.J. 62:207
Characeae
–, radio-frequency bioeffects at the membrane level: separation of thermal and athermal contributions in the Characeae, Pikkard, W.F., Barsoum, Y.H. 61:39
–, radio-frequency rectification in electrogenic and nonelectrogenic cells of *Chara* and *Nitella,* Barsoum, Y.H., Pickard, W.F. 65:81
Chemical probes
–, trinitrobenzenesulfonic acid and fluorodinitrobenzene: probes to study local anesthetic effects in cell membranes, Bradford, P., Marinetti, G.V. 61:193
Chemical rectification
–, interpretation of current-voltage relationships for "active" ion transport systems: I. steady-state reaction-kinetic analysis of class-I mechanisms, Hansen, U.-P., Gradmann, D., Sanders, D., Slayman, C.L. 63:165
Chemiosmotic theory
–, energy coupling to ATP synthesis by the proton-translocating ATPase, Maloney, P.C. 67:1
–, stoichiometry of proton movements coupled to ATP synthesis driven by a pH gradient in *Streptococcus lactis,* Maloney, P.C., Hansen, F.C. III 66:63
Chloride
–, chloride distribution in the proximal convoluted tubule of *Necturus* kidney, Edelman, A., Bouthier, M., Anagnostopoulos, T. 62:7
–, inorganic mercury (Hg^{2+}) transport through lipid bilayer membranes, Gutknecht, J. 61:61
–, intestinal HCO_3^- secretion in *Amphiuma:* stimulation by mucosal Cl^- and serosal Na^+, White, J.F., Imon, M.A. 68:207
–, thiocyanate transport across fish intestine (*Pleuronectes platessa*), Katz, U., Lau, K.R., Ramos, M.M.P., Ellory, J.C. 66:9
Chloride concentration
–, excitation-revealed changes in cytoplasmic Cl^- concentration in "Cl^--starved" *Chara* cells, Beilby, M.J. 62:207
Chloride dependence
–, active sulfate absorption in rabbit ileum: dependence on sodium and chloride and effects of agents that alter chloride transport, Smith, P.L., Orellana, S.A., Field, M. 63:199
Chloride flux
–, current-voltage curve of electrogenic Cl^- pump predicts voltage-dependent Cl^- efflux in *Acetabularia,* Mummert, H., Hansen, U.-P., Gradmann, D. 62:139
Chloride permeability
–, chloride permeability in human red cells: influence of membrane protein rearrangement resulting from ATP depletion and calcium accumulation, Motais, R., Baroin, A., Baldy, S. 62:195
Chloride secretion
–, chloride secretion by canine tracheal epithelium: I. role of intracellular cAMP levels, Smith, P.L., Welsh, M.J., Stoff, J.S., Frizzell, R.A. 70:217
–, chloride secretion by canine tracheal epithelium: II. the cellular electrical potential profile, Welsh, M.J., Smith, P.L., Frizzell, R.A. 70:227
Chloride starvation
–, excitation-revealed changes in cytoplasmic Cl^- concentration in "Cl^--starved" *Chara* cells, Beilby, M.J. 62:207
Chloride transport
–, effects of catecholamines on electrolyte transport in cortical collecting tubule, Iino, Y., Troy, J.L., Brenner, B.M. 61:67
–, electrical properties of chloride transport across the *Necturus* proximal tubule, Guggino, W.B., Boulpaep, E.L., Giebisch, G. 65:185
–, excitation-revealed changes in cytoplasmic Cl^- concentration in "Cl^--starved" *Chara* cells, Beilby, M.J. 62:207
–, uptake of arachidonic acid into membrane phospholipids: effect on chloride transport across cornea, Schaeffer, B.E., Kanchuger, M.S., Razin, M., Zadunaisky, J.A. 69:177
Chloride withdrawal
–, effect of chloride withdrawal on the geometry of the T-tubules in amphibian and mammalian muscle, Dulhunty, A. 67:81

p-Chloromercuriphenyl sulfonic acid
–, effects of Ag^+ on ion transport by corneal epithelium of the rabbit, Klyce, S.D., Marshall, W.S. 66:133
Chlortetracycline
–, ionophore-mediated transmembrane movement of divalent cations in small unillamellar liposomes: an evaluation of the chlortetracycline fluorescence technique and correlations with black lipid membrane studies, Mathew, M.K., Nagaraj, R., Balaram, P. 65:13
Cholate solubilization
–, partial purification of the Na^+-dependent D-glucose transport system from renal brush border membranes, Im, W.B., Ling, K.Y., Faust, R.G. 65:131
Cholera toxin
–, properties of rat erythrocyte membrane cytoskeletal structures produced by digitonin extraction: digitonin-insoluble β-adrenergic receptor, adenylate cyclase, and cholera toxin substrate, LeVine, H. III, Sahyoun, N.E., Cuatrecasas, P. 64:225
–, role of membrane gangliosides in the binding and action of bacterial toxins, Fishman, P.H. 69:85
Cholestane spin label
–, binding and incorporation of lecithin-cholesterol vesicles to lymphocytes: a spin-label study, Dresdner, G., Hammarström, L., Edvard Smith, C.I. 64:155
–, preparation and properties of spin-labeled lecithin-cholesterol liposomes, Dresdner, G. 64:145
Cholesterol exchange
–, lipid vesicle-mediated alterations of membrane cholesterol levels: effects on Na^+ and K^+ currents in squid axon, Steele, J.A., Poznansky, M.J., Eaton, D.C., Brodwick, M.S. 63:191
Choline transport
–, evidence for a two-state mobile carrier mechanism in erythrocyte choline transport: effects of substrate analogs on inactivation of the carrier by N-ethylmaleimide, Devés, R., Krupka, R.M. 61:21
–, reaction of internal forms of the choline carrier of erythrocytes with N-ethylmaleimide: evidence for a carrier conformational change on complex formation, Devés, R., Krupka, R.M. 63:99
Cl^-, *see entries under* Chloride
Class-I model
–, electrical properties of the plasma membrane of microsplasmodia of *Physarum polycephalum,* Fingerle, J., Gradmann, D. 68:67
CO_2, *see entries under* Carbon dioxide
Cobalt
–, periodic responses in squid axon membrane exposed intracellularly and extracellularly to solutions containing a single species of salt, Terakawa, S. 63:51
Colon
–, the electrophysiology of rabbit descending colon. I. instantaneous transepithelial current-voltage relations and the current-voltage relations of the Na-entry mechanism, Thompson, S.M., Suzuki, Y., Schultz, S.G. 66:41
–, the electrophysiology of rabbit descending colon. II. current-voltage relations of the apical membrane, the basolateral membrane, and the parallel pathways, Thompson, S.M., Suzuki, Y., Schultz, S.G. 66:55
–, potassium transport across rabbit descending colon *in vitro:* evidence for single-file diffusion through a paracellular pathway, Fromm, M., Schultz, S.G. 63:93
Compartmental analysis
–, evidence for two compartments of exchangeable calcium in isolated rat liver mitochondria obtained using a ^{45}Ca exchange technique in the presence of magnesium, phosphate, and ATP at 37° C, Barritt, G.J. 62:53
Computer simulation
–, computer simulation and interpretation of ^{45}Ca efflux profile patterns, Borle, A.B., Uchikawa, T., Anderson, J.H. 68:37
Conductance
–, transport of electrolytes in muscle, Sjodin, R.A. 68:161
Conformational change
–, evidence for a two-state mobile carrier mechanism in erythrocyte choline transport: effects of substrate analogs on inactivation of the carrier by N-ethylmaleimide, Devés, R., Krupka, R.M. 61:21
–, reaction of internal forms of the choline carrier of erythrocytes with N-ethylmaleimide: evidence for a carrier conformational change on complex formation, Devés, R., Krupka, R.M. 63:99
Constant field equation
–, relationship of transepithelial electrical potential to membrane potentials and conductance ratios in frog skin, Nagel, W., Essig, A. 69:125
Contour
–, role of the bilayer in the shape of the isolated erythrocyte membrane, Lange, Y., Gough, A., Steck, T.L. 69:113
Cornea
–, analysis of presteady-state Na^+ fluxes across the rabbit corneal endothelium, Lim, J.J., Ussing, H.H. 65:197
Corneal epithelium
–, effects of Ag^+ on ion transport by corneal epithelium of the rabbit, Klyce, S.D., Marshall, W.S. 66:133
–, uptake of arachidonic acid into membrane phospholipids: effect on chloride transport across cornea, Schaeffer, B.E., Kanchuger, M.S., Razin, M., Zadunaisky, J.A. 69:177
Corneal hydration
–, effects of Ag^+ on ion transport by corneal epithelium of the rabbit, Klyce, S.D., Marshall, W.S. 66:133
Cotransport
–, electrical properties of the plasma membrane of microplasmodia of *Physarum polycephalum,* Fingerle, J., Gradmann, D. 68:67
–, intestinal HCO_3^- secretion in *Amphiuma:* stimulation by mucosal Cl^- and serosal Na^+, White, J.F., Imon, M.A. 68:207
–, monocarboxylate transport in erythrocytes, Deuticke, B. 70:89
–, outward sodium and potassium cotransport in human red cells, Garay, R., Adragna, N., Canessa, M., Tosteson, D. 62:169
Coupled transport
–, further studies of proximal tubular brush border membrane D-glucose transport heterogeneity, Turner, R.J., Moran, A. 70:37
–, stoichiometric studies of the renal outer cortical brush border membrane D-glucose transporter, Turner, R.J., Moran, A. 67:73
Coupled uptake
–, transepithelial transport in cell culture: stoichiometry of Na/phlorizin binding and Na/D-glucose cotransport. A two-step, two-sodium model of binding and translocation, Misfeldt, D.S., Sanders, M.J. 70:191
Cross-linking
–, the kinetics of intramolecular cross-linking of the band 3 protein in the red blood cell membrane by 4,4′-diisothiocyano dihydrostilbene-2,2′-disulfonic acid (H_2 DIDS), Kampmann, L., Lepke, S., Fasold, H., Fritzsch, G., Passow, H. 70:199
Cross-reactivity
–, characteristics of antibodies to guinea pig ($Na^+ + K^+$)-adenosine triphosphatase and their use in cell-free synthesis studies, McDonough, A.A., Hiatt, A., Edelman, I.S. 69:13

Crustacean myofibrils
–, carbon dioxide or bicarbonate ions release Ca^{2+} from internal stores in crustacean myofibrillar bundles, Lea, T.J., Ashley, C.C. 61:115
Crustacean nerve
–, sodium currents in the giant axon of the crab *Carcinus maenas*, Quinta-Ferreira, M.E., Arispe, N., Rojas, E. 66:159
Cs^+
–, noise analysis reveals K^+ channel fluctuations in the apical membrane of rabbit colon, Wills, N.K., Zeiske, W., van Driessche, W. 69:187
Cs-block
–, K^+-selective, three-state channel from fragmented sarcoplasmic reticulum of frog leg muscle, Labarca, P.P., Miller, C. 61:31
Cultured epithelium
–, K^+ transport in "tight" epithelial monolayers of MDCK cells, Aiton, J.F., Brown, C.D.A., Ogden, P., Simmons, N.L. 65:99
Current fluctuations
–, fluctuation analysis of short-circuit current in a warm-blooded sodium-retaining epithelium: site current, density, and interaction with triamterene, Christensen, O., Bindslev, N. 65:19
Current-voltage curve
–, interpretation of current-voltage relationships for "active" ion transport systems: I. steady-state reaction-kinetic analysis of class-I mechanisms, Hansen, U.-P., Gradmann, D., Sanders, D., Slayman, C.L. 63:165
Current-voltage relationships
–, current-voltage curve of electrogenic Cl^- pump predicts voltage-dependent Cl^- efflux in *Acetabularia*, Mummert, H., Hansen, U.-P., Gradmann, D. 62:139
–, the electrophysiology of rabbit descending colon. I. instantaneous transepithelial current-voltage relations and the current-voltage relations of the Na-entry mechanism, Thompson, S.M., Suzuki,, W., Schultz, S.G. 66:41
–, the electrophysiology of rabbit descending colon. II. current-voltage relations of the apical membrane, the basolateral membrane, and the parallel pathways, Thompson, S.M., Suzuki, Y., Schultz, S.G. 66:55
IV Curves
–, microelectrode studies of the effect of lanthanum on the electrical potential and resistance of outer and inner cell membranes of isolated frog skin, Goudeau, H., Wietzerbin, J., Mintz, E., Gingold, M.P., Nagel, W. 66:123
Cuticle
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Cuticle (collagenous)
–, recycling of D-glucose in collagenous cuticle: a means of nutrient conservation? Gomme, J. 62:47
Cyanine dyes
–, measurement of membrane potential in *Bacillus subtilis:* a comparison of lipophilic cations, rubidium ion, and a cyanine dye as probes, Zaritsky, A., Kihara, M., Macnab, R.M. 63:215
Cyclic AMP
–, cell junction and cyclic AMP: I. upregulation of junctional membrane permeability and junctional membrane particles by administration of cyclic nucleotide or phosphodiesterase inhibitor, Flagg-Newton, J.L., Dahl, G., Loewenstein, W.R. 63:105
–, cell junction and cyclic AMP: II. modulations of junctional membrane permeability, dependent on serum and cell density, Flagg-Newton, J.L., Loewenstein, W.R. 63:123
–, cell junction and cyclic AMP: III. promotion of junctional membrane permeability and junctional membrane particles in a junction-deficient cell type, Azarnia, R., Dahl, G., Loewenstein, W.R. 63:133
–, chloride secretion by canine tracheal epithelium: I. role of intracellular cAMP levels, Smith, P.L., Welsh, M.J., Stoff, J.S., Frizzell, R.A. 70:217
–, cyclic AMP and intracellular ionic activities in *Necturus* gallbladder, Diez de los Rios, A., DeRose, N.E., Armstrong, W. McD 63:25
–, effect of monensin on osmotic water flow across the toad bladder and its stimulation by vasopressin and cyclic AMP, Mendoza, S.A., Thomas, M.W. 67:99
–, enhanced sensitivity to stimulation of sodium transport and cyclic AMP by antidiuretic hormone after Ca^{2+} depletion of isolated frog skin epithelium, Johnsen, A.H., Nielsen, R. 69:137
–, hormonal regulation of junctional permeability: upregulation by catecholamine and prostaglandin E_1, Radu, A., Dahl, G., Loewenstein, W.R. 70:239
–, uptake of arachidonic acid into membrane phospholipids: effect on chloride transport across cornea, Schaeffer, B.E., Kanchuger, M.S., Razin, M., Zadunaisky, J.A. 69:177
Cytochalasin B
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Cytoplasm
–, excitation-revealed changes in cytoplasmic Cl^- concentration in "Cl^--starved" *Chara* cells, Beilby, M.J. 62:207
Cytoplasmic calcium
–, electrophysiology of phagocytic membranes: induction of slow membrane hyperpolarizations in macrophages and macrophage polykaryons by intracellular calcium injection, Perschini, P.M., Araujo, E.G., Oliveira-Castro, G.M. 61:81
Cytoskeleton
–, properties of rat erythrocyte membrane cytoskeletal structures produced by digitonin extraction: digitonin-insoluble β-adrenergic receptor, adenylate cyclase, and cholera toxin substrate, LeVine, H. III, Sahyoun, N.E., Cuatrecasas, P. 64:225
DCCD
–, pump-leak sodium fluxes in low salt corn roots, Cheeseman, J.M. 70:157
Deoxycholate
–, ricinoleate and deoxycholate are calcium ionophores in jejunal brush border vesicles, Maenz, D.D., Forsyth, G.W. 70:125
2-Deoxy-D-glucose
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Detergents
–, increase in size of sonicated phospholipid vesicles in the presence of detergents, Alonso, A., Sáez, R., Villena, A., Goñi, F.M. 67:55
DIDS
–, effects of salicylate on the HCO_3^-/Cl^- exchange across the human erythrocyte membrane, Crandall, E.D., Winter, H.I., Schaeffer, J.D., Bidani, A. 65:139
Dielectric breakdown
–, rotation of cells in an alternating electric field: theory and experimental proof, Holzapfel, C., Vienken, J., Zimmermann, U. 67:13
Dielectric permittivity
–, dielectric relaxation studies of ionic processes in lysolecithin-packaged gramicidin channels, Henze, R., Neher, E., Trapane, T.L., Urry, D.W. 64:233
Dielectric relaxation
–, dielectric relaxation studies of ionic processes in lysolecithin-

packaged gramicidin channels, Henze, R., Neher, E., Trapane, T.L., Urry, D.W. 64:233
Diffusion coefficient
–, a simple technique of measuring high membrane permeabilities of human erythrocytes, Osberghaus, U., Schönert, H., Deuticke, B. 68:29
Diffusive components
–, electrogenic and diffusive components of the membrane of *Hydrodictyon africanum,* Findlay, G.P. 68:179
Digitonin
–, a method for estimating free Ca within human red blood cells, with an application to the study of their Ca-dependent K permeability, Simons, T.J.B. 66:235
–, properties of rat erythrocyte membrane cytoskeletal structures produced by digitonin extraction: digitonin-insoluble β-adrenergic receptor, adenylate cyclase, and cholera toxin substrate, LeVine, H. III, Sahyoun, N.E., Cuatrecasas, P. 64:225
4,4′-Diisothiocyano dihydrostilbene-2,2′-disulfonic acid
–, the kinetics of intramolecular cross-linking of the band 3 protein in the red blood cell membrane by 4,4′-diisothiocyano dihydrostilbene-2,2′-disulfonic acid (H_2 DIDS), Kampmann, L., Lepke, S., Fasold, H., Fritzsch, G., Passow, H. 70:199
Dipole potential
–, charge clusters and the orientation of membrane proteins, Weinstein, J.N., Blumenthal, R., van Renswoude, J., Kempf, C., Klausner, R.D. 66:203
Divalent cations
–, effects of divalent cations on toad end-plate channels, Takeda, K., Gage, P.W., Barry, P.H. 64:55
Dopamine
–, dopaminergic inhibition of vasopressin-stimulated water flow in the toad bladder: evidence for local formation of dopamine, Arruda, J.A.L., Sabatini, S. 68:89
–, effects of local anesthetics on phospholipid topology and dopamine uptake and release in rat brain synaptosomes, Bradford, P.G., Marinetti, G.V. 67:211
Dunaliella unicellular algae
–, ionic regulation of the unicellular green alga *Dunaliella tertiolecta,* Ehrenfeld, J., Cousin, J.-L. 70:47
Dye-coupling
–, intracellular K^+ activities and cell membrane potentials in a K^+-transporting epithelium, the midgut of tobacco hornworm (*Manduca sexta*), Moffett, D.F., Hudson, R.L., Moffett, S.B., Ridgway, R.L. 70:59
–, permeability and structural studies of heart cell gap junctions under normal and altered ionic conditions, Burt, J.M., Frank, J.S., Berns, M.W. 68:227
Dye photo-deprotonation
–, erythrosin and pH gradient induced photo-voltages in bilayer membranes, Varnadore, W.E.Jr., Arrieta, R.T., Duchek, J.R., Huebner, H.S. 65:147
Ehrlich ascites tumor cell
–, amino acid active transport and stimulation by substrates in the absence of a Na^+ electrochemical potential gradient, Heinz, A., Jackson, J.W., Richey, B.E., Sachs, G., Schafer, J.A. 62:149
–, evidence for activation of an active electrogenic proton pump in Ehrlich ascites tumor cells during glycolysis, Heinz, A., Sachs, G., Schafer, J.A. 61:143
–, further studies on the charge-related alterations of methotrexate transport in Ehrlich ascites tumor cells by ionic liposomes: correlation with liposome-cell association, Fry, D.W., Goldman, I.D. 66:87
Electrical breakdown
–, electric field-induced cell-to-cell fusion, Zimmermann, U., Vienken, J. 67:165
–, general and transport properties of hypotonic and isotonic preparations of resealed erythrocyte ghosts, Jausel-Hüsken, S., Deuticke, B. 63:61
Electrical circuit model
–, the electrophysiology of rabbit descending colon. II. current-voltage relations of the apical membrane, the basolateral membrane, and the parallel pathways, Thompson, S.M., Suzuki, Y., Schultz, S.G. 66:55
Electric field
–, echinocyte formation induced by potential changes of human red blood cells, Glaser, R. 66:79
–, electric field-induced cell-to-cell fusion, Zimmermann, U., Vienken, J. 67:165
Electrochemical proton gradient
–, the proton gradient across the vacuo-lysosomal membrane of lutoids from the latex of *Hevea brasiliensis*. I. further evidence for a proton-translocating ATPase on the vacuo-lysosomal membrane of intact lutoids, Cretin, H. 65:175
Electrogenesis
–, radio-frequency bioeffects at the membrane level: separation of thermal and athermal contributions in the Characeae, Pickard, W.F., Barsoum, Y.H. 61:39
–, radio-frequency rectification in electrogenic and nonelectrogenic cells of *Chara* and *Nitella,* Barsoum, Y.H., Pickard, W.F. 65:81
Electrogenic
–, progesterone-induced down-regulation of an electrogenic Na^+, K^+-ATPase during the first meiotic division in amphibian oocytes, Weinstein, S.P., Kostellow, A.B., Ziegler, D.H., Morrill, G.A. 69:41
Electrogenic pump
–, current-voltage curve of electrogenic Cl^- pump predicts voltage-dependent Cl^- efflux in *Acetabularia,* Mummert, H., Hansen, U.-P., Gradmann, D. 62:139
–, electrical properties of the plasma membrane of microplasmodia of *Physarum polycephalum,* Fingerle, J., Gradmann, D. 68:67
–, electrical properties of the rabbit urinary bladder assessed using gramicidin D, Lewis, S.A., Wills, N.K. 67:45
–, electrogenic proton transport in epithelial membranes, Steinmetz, P.R., Andersen, O.S. 65:155
–, interpretation of current-voltage relationships for "active" ion transport systems: I. steady-state reaction-kinetic analysis of class-I mechanisms, Hansen, U.-P., Gradmann, D., Sanders, S., Slayman, C.L. 63:165
–, pump-leak sodium fluxes in low salt corn roots, Cheeseman, J.M. 70:157
Electrogenic transport
–, active and passive Na^+ fluxes across the basolateral membrane of rabbit urinary bladder, Eaton, D.C., Frace, A.M., Silverthorn, S.U. 67:219
–, electrogenic and diffusive components of the membrane of *Hydrodictyon africanum,* Findlay, G.P. 68:179
Electrolytes
–, transport of electrolytes in muscle, Sjodin, R.A. 68:161
Electron probe
–, study of maturation of membrane transport function in red blood cells by X-ray microanalysis, Lee, P., Kirk, R.G. 67:103
Electrophysiology
–, the electrophysiology of rabbit descending colon. I. instantaneous transepithelial current-voltage relations and the current-voltage relations of the Na-entry mechanism, Thompson, S.M., Suzuki, W., Schultz, S.G. 66:41
–, sodium-coupled amino acid and sugar transport by *Necturus* small intestine, Gunter-Smith, P.J., Grasset, E., Schultz, S.G. 66:25

–, transepithelial transport in cell culture: stoichiometry of Na/phlorizin binding and Na/D-glucose cotransport. A two-step, two-sodium model of binding and translocation, Misfeldt, D.S., Sanders, M.J. 70:191
Embryonic heart cells
–, comparison of the pacemaker properties of chick embryonic atrial and ventricular heart cells, Shrier, A., Clay, J.R. 69:49
–, small signal impedance of heart cell membranes, Clapham, D.E., DeFelice, L.J. 67:63
Endocytosis
–, binding and incorporation of lecithin-cholesterol vesicles to lymphocytes: a spin-label study, Dresdner, G., Hammarström, L., Edvard Smith, C.I. 64:155
–, phagosomal membrane lipids of LM fibroblasts, Schroeder, F. 68:141
Endothelium
–, analysis of presteady-state Na^+ fluxes across the rabbit corneal endothelium, Lim, J.J., Ussing, H.H. 65:197
Endplate channel
–, effects of divalent cations on toad end-plate channels, Takeda, K., Gage, P.W., Barry, P.H. 64:55
Energy coupling
–, amino acid active transport and stimulation by substrates in the absence of a Na^+ electrochemical potential gradient, Heinz, A., Jackson, J.W., Richey, B.E., Sachs, G., Schafer, J.A. 62:149
–, disruption of energy transduction in sarcoplasmic reticulum by trypsin cleavage of $(Ca^{2+} + Mg^{2+})$-ATPase, Scott, T.L., Shamoo, A.E. 64:137
Energy profile
–, energy profile of the calcium channel in the membrane of mollusc neurons, Kostyuk, P.G., Mironov, S.L., Doroshenko, P.A. 70:181
Enzyme reconstruction
–, partial purification and characterization of $(Na^+ + K^+)$-ATPase from garfish olfactory nerve axon plasma membrane, Kracke, G.R., O'Neal, S.G., Chacko, G.K. 63:147
Epidermal permeability
–, recycling of D-glucose in collagenous cuticle: a means of nutrient conservation? Gomme, J. 62:47
Epidermis
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Epithelial glucose transport
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Epithelial Na transport
–, ion selectivity of the apical membrane Na channel in the toad urinary bladder, Palmer, L.G. 67:91
Epithelial permeability
–, structure and permeability of goblet cell tight junctions in rat small intestine, Madara, J.L., Trier, J.S. 66:145
Epithelial structure
–, extracellular Ca^{2+} and the effect of antidiuretic hormone on the water permeability of the toad urinary bladder: an example of flow-induced alteration of flow, Hardy, M.A., DiBona, D.R. 67:27
Epithelial transport
–, cellular lithium and transepithelial transport across toad urinary bladder, Hughes, P.M., Macknight, A.D.C. 70:69
–, effects of Ag^+ on ion transport by corneal epithelium of the rabbit, Klyce, S.D., Marshall, W.S. 66:133
–, electrogenic proton transport in epithelial membranes, Steinmetz, P.R., Andersen, O.S. 65:155
–, ^{3}HOH-osmotic water fluxes and ultrastructure of an epithelial syncytium, Brodie, D.A., Podesta, R.B. 61:107
–, potassium transport across the frog retinal pigment epithelium, Miller, S.S., Steinberg, R.H. 67:199
Epithelium
–, active potassium transport by rabbit descending colon epithelium, Wills, N.K., Biagi, B. 64:195
–, proton/hydroxyl transport in gastric and intestinal epithelia, Sachs, G., Faller, L.D., Rabon, E. 64:123
–, single-file diffusion multi-ion mechanism of permeation in paracellular epithelial channels, Salas, P.J.I., Moreno, J.H. 64:103
Erythrocyte
–, chloride permeability in human red cells: influence of membrane protein rearrangement resulting from ATP depletion and calcium accumulation, Motais, R., Baroin, A., Baldy, S. 62:195
–, effects of salicylate on HCO_3^-/Cl^- exchange across the human erythrocyte membrane, Crandall, E.D., Winter, H.I., Schaeffer, J.D., Bidani, A. 65:139
–, effects of the plant alkaloid sanguinarine on cation transport by human red blood cells and lipid bilayer membranes, Cala, P.M., Nørby, J.G., Tosteson, D.C. 64:23
–, the external anion binding site of the human erythrocyte anion transporter: DNDS binding and competition with chloride, Fröhlich, O. 65:111
–, the kinetics of anion equilibrium exchange across the red blood cell membrane as measured by means of ^{35}S thiocyanate, Dissing, S., Romano, L., Passow, H. 62:219
–, L-leucine transport in human red blood cells: a detailed kinetic analysis, Rosenberg, R. 62:79
–, a method for estimating free Ca within human red blood cells, with an application to the study of their Ca-dependent K permeability, Simons, T.J.B. 66:235
–, outward sodium and potassium cotransport in human red cells, Garay, R., Adragna, N., Canessa, M., Tosteson, D. 62:169
–, properties of rat erythrocyte membrane cytoskeletal structures produced by digitonin extraction: digitonin-insoluble β-adrenergic receptor, adenylate cyclase, and cholera toxin substrate, LeVine, H. III, Sahyoun, N.E., Cuatrecasas, P. 64:225
–, study of maturation of membrane transport function in red blood cells by X-ray microanalysis, Lee, P., Kirk, R.G. 67:103
–, sulfatide role in the sodium pump, Zambrano, F., Morales, M., Fuentes, N., Rojas, M. 63:71
–, time dependence of the effect of *p*-chloromercuribenzoate on erythrocyte water permeability: a pulsed nuclear magnetic resonance study, Ashley, D.L., Goldstein, J.H. 61:199
Erythrocyte deformability
–, effects of the calcium-mediated enzymatic cross-linking of membrane proteins on cellular deformability, Smith, B.D., LaCelle, P.L., Siefring, G.E. Jr., Lowe-Krentz, L., Lorand, L. 61:75
Erythrocyte ghosts
–, general and transport properties of hypotonic and isotonic preparations of resealed erythrocyte ghosts, Jausel-Hüsken, S., Deuticke, B. 63:61
Erythrocyte membrane
–, effects of temperature and pH on the water exchange through erythrocyte membranes: nuclear magnetic resonance studies, Morariu, V.V., Pop, V.I., Popescu, O., Benga, G. 62:1
–, interaction of L antibody with low potassium-type sheep red cells: resolution of two separate functional antibodies, Smalley, C.E., Tucker, E.M., Dunham, P.B., Ellory, J.C. 64:167
–, the kinetics of intramolecular cross-linking of the band 3 protein in the red blood cell membrane by 4,4′-diisothiocya-

no dihydrostilbene-2,2′-disulfonic acid (H_2 DIDS), Kampmann, L., Lepke, S., Fasold, H., Fritzsch, G., Passow, H. 70:199
–, monocarboxylate transport in erythrocytes, Deuticke, B. 70:89
–, phosphate transport in human red blood cells: concentration dependence and pH dependence of the unidirectional phosphate flux at equilibrium conditions, Schnell, K.F., Besl, E., v. der Mosel, R. 61:173
–, pressure and temperature effects on human red cell cation transport, Hall, A.C., Ellory, J.C., Klein, R.A. 68:47
–, primary structure of horse erythrocyte glycophorin HA. Its amino acid sequence has a unique homology with those of human and porcine erythrocyte glycophorins, Murayama, J.-I., Tomita, M., Hamada, A. 64:205
–, role of the bilayer in the shape of the isolated erythrocyte membrane, Lange, Y., Gough, A., Steck, T.L. 69:113
–, a simple technique of measuring high membrane permeabilities of human erythrocytes, Osberghaus, U., Schönert, H., Deuticke, B. 68:29
–, transport of benzenesulfonic acid derivatives through the rat erythrocyte membrane, Kitagawa, S., Terada, H., Kametani, F. 65:49
–, trinitrobenzenesulfonic acid and fluorodinitrobenzene: probes to study local anesthetic effects in cell membranes, Bradford, P., Marinetti, G.V. 61:193
Erythrocyte proteins
–, effects of the calcium-mediated enzymatic cross-linking of membrane proteins on cellular deformability, Smith, B.D., LaCelle, P.L., Siefring, G.E. Jr., Lowe-Krentz, L., Lorand, L. 61:75
Erythrocyte shape
–, echinocyte formation induced by potential changes of human red blood cells, Glaser, R. 66:79
Erythroid differentiation
–, membrane transport during erythroid differentiation, Gordon, P.B., Rubin, M.S. 64:11
Erythropoiesis
–, study of maturation of membrane transport function in red blood cells by X-ray microanalysis, Lee, P., Kirk, R.G. 67:103
Erythrosin
–, erythrosin and pH gradient induced photo-voltages in bilayer membranes, Varnadore, W.E. Jr., Arrieta, R.T., Duchek, J.R., Huebner, H.S. 65:147
Escherichia coli
–, unsaturated fatty acid requirement in *Escherichia coli:* mechanism of palmitate-induced inhibition of growth of strain WN1, Ingram, L.O., Eaton, L.C., Erdos, G.W., Tedder, T.F., Vreeland, N.L. 65:31
N-Ethylmaleimide
–, evidence for a two-state mobile carrier mechanism in erythrocyte choline transport: effects of substrate analogs on inactivation of the carrier by N-ethylmaleimide, Devés, R., Krupka, R.M. 61:21
–, reaction of internal forms of the choline carrier of erythrocytes with N-ethylmaleimide: evidence for a carrier conformational change on complex formation, Devés, R., Krupka, R.M. 63:99
Excess noise
–, potassium-induced insulin release and voltage noise measurements in single mouse islets of Langerhans, Dawson, C.M., Atwater, I., Rojas, E. 64:33
Exchange diffusion transport
–, effects of catecholamines on electrolyte transport in cortical collecting tubule, Iino, Y., Troy, J.L., Brenner, B.M. 61:67
Excitation-contraction coupling
–, comparison of the action of La^{3+} and Ca^{2+} on contraction threshold and other membrane parameters of frog skeletal muscle, Dörrscheidt-Käfer, M. 62:95
–, K^+-selective, three-state channel from fragmented sarcoplasmic reticulum of frog leg muscle, Labarca, P.P., Miller, C. 61:31
–, mechanism of calcium release from skeletal sarcoplasmic reticulum, Miyamoto, H., Racker, E. 66:193
–, the mechanism of voltage-sensitive dye responses on sarcoplasmic reticulum, Beeler, T.J., Farmen, R.H., Martonosi, A.N. 62:113
Exocytosis
–, calcium-dependence of catecholamine release from bovine adrenal medulary cells after exposure to intense electric fields, Knight, D.E., Baker, P.F. 68:107
Eyring barrier
–, interpretation of current-voltage relationships for "active" ion transport systems: I. steady-state reaction kinetic analysis of class-I mechanisms, Hansen, U.-P., Gradmann, D., Sanders, D., Slayman, C.L. 63:165
Facilitated diffusion
–, inorganic mercury (Hg^{2+}) transport through lipid bilayer membranes, Gutknecht, J. 61:61
Fatty acids
–, hormonal effects on fatty acid binding and physical properties of rat liver plasma membranes, Schroeder, F. 68:1
–, role of lipids in the *Neurospora crassa* membrane: IV. biochemical and electrophysiological changes caused by growth on phytanic acid, Friedman, K.J., Glick, D. 64:1
–, unsaturated fatty acid requirement in *Escherichia coli:* mechanism of palmitate-induced inhibition of growth of strain WN1, Ingram, L.O., Eaton, L.C., Erdos, G.W., Tedder, T.F., Vreeland, N.L. 65:31
–, uptake of arachidonic acid into membrane phospholipids: effect on chloride transport across cornea, Schaeffer, B.E., Kanchuger, M.S., Razin, M., Zadunaisky, J.A. 69:177
FDNB
–, trinitrobenzenesulfonic acid and fluorodinitrobenzene: probes to study local anesthetic effects in cell membranes, Bradford, P., Marinetti, G.V. 61:193
Filtration permeability
–, microscopical determination of the filtration permeability of the mucosal surface of the goldfish intestinal epithelium, Siegenbeek van Heukelom, J., van den Ham, M.D., Albus, H., Groot, J.A. 63:31
Flip-flop
–, lipid vesicle-mediated alterations of membrane cholesterol levels: effects of Na^+ and K^+ currents in squid axon, Steele, J.A., Poznansky, M.J., Eaton, D.C., Brodwick, M.S. 63:191
Fluctuation analysis
–, K-current fluctuations in inward-rectifying channels of frog skeletal muscle, Schwarz, W., Neumcke, B., Palade, P.T. 63:85
–, noise analysis reveals K^+ channel fluctuations in the apical membrane of rabbit colon, Wills, N.K., Zeiske, W., van Driessche, W. 69:187
Fluoroscein
–, erythrosin and pH gradient induced photo-voltages in bilayer membranes, Varnadore, W.E. Jr., Arrieta, R.T., Duchek, J.R., Huebner, H.S. 65:147
Fluorescence
–, hormonal effects on fatty acid binding and physical properties of rat liver plasma membranes, Schroeder, F. 68:1
–, ionophore-mediated transmembrane movement of divalent cations in small unilamellar liposomes: an evaluation of the chlortetracycline fluorescence technique and correlations with black lipid membrane studies, Mathew, M.K., Nagaraj, R., Balaram, P. 65:13

Fluorescence polarization
–, increase in lipid microviscosity of unilamellar vesicles upon the creation of transmembrane potential, Corda, D., Pasternak, C., Shinitzky, M. 65:235
Fluorescence probe
–, anilinonaphthalene sulfonate fluorescence and amino acid transport in yeast, Slavík, J., Horák, J., Řihová, L., Kotyk, A. 64:175
Flux
–, outward sodium and potassium cotransport in human red cells, Garay, R., Adragna, N., Canessa, M., Tosteson, D. 62:169
Flux ratio equation
–, the flux ratio equation under nonstationary conditions, Sten-Knudsen, O., Ussing, H.H. 63:233
Folate transport
–, two-compartment behavior during transport of folate compounds in L1210 cell plasma membrane vesicles, Yang, C.-H., Dembo, M., Sirotnak, F.M. 68:19
Free fatty acids
–, modulation of ATPase activities of human erythrocyte membranes by free fatty acids or phospholipase A_2, Schmalzing, G., Kutschera, P. 69:65
Freeze fracture
–, lipid-polyethylene glycol interactions: I. induction of fusion between liposomes, Boni, L.T., Stewart, T.P., Alderfer, J.L., Hui, S.W. 62:65
–, lipid-polyethylene glycol interactions: II. formation of defects in bilayers, Boni, L.T., Stewart, T.P., Alderfer, J.L., Hui, S.W. 62:71
–, morphology of the intermediate stages in the lamellar to hexagonal lipid phase transition, Borovjagin, V.L., Vergara, J.A., McIntosh, T.J. 69:199
Frequency dependence
–, interaction of spin-labeled local anesthetics with the sodium channel of squid axon membranes, Wang, H.H., Yeh, J.Z., Narahashi, T. 66:227
Friend cells
–, membrane transport during erythroid differentiation, Gordon, P.B., Rubin, M.S. 64:11
Frog skeletal muscle
–, comparison of the action of La^{3+} and Ca^{2+} on contraction threshold and other membrane parameters of frog skeletal muscle, Dörrscheidt-Käfer, M. 62:95
Frog skin
–, action of caerulein, gastrin 17, pentagastrin, and secretin on the active transport of sodium by the frog skin, Greenwell, J.R., Low, H.S. 61:91
–, effect of amiloride, ouabain, and Ba^{2+} on the nonsteady-state Na-K pump flux and short-circuit current in isolated frog skin epithelia, Nielsen, R. 65:227
–, enhanced sensitivity to stimulation of sodium transport and cyclic AMP by antidiuretic hormone after Ca^{2+} depletion of isolated frog skin epithelium, Johnsen, A.H., Nielsen, R. 69:137
–, intracellular ionic activities in frog skin, Nagel, W., Garcia-Diaz, J.F., Armstrong, W.McD 61:127
–, microelectrode studies of the effect of lanthanum on the electrical potential and resistance of outer and inner cell membranes of isolated frog skin, Goudeau, H., Wietzerbin, J., Mintz, E, Gingold, M.P., Nagel, W. 66:123
–, relationship of transepithelial electrical potential to membrane potentials and conductance ratios in frog skin, Nagel, W., Essig, A. 69:125
Function
–, sulfate role in the sodium pump, Zambrano, F., Morales, M., Fuentes, N., Rojas, M. 63:71
Furosemide
–, K^+ transport in "tight" epithelial monolayers of MDCK cells, Aiton, J.F., Brown, C.D.A., Ogden, P., Simmons, N.L. 65:99
–, outward sodium and potassium cotransport in human red cells, Garay, R., Adragna, N., Canessa, M., Tosteson, D. 62:169
Fusicoccin
–, radio-frequency rectification in electrogenic and nonelectrogenic cells of *Chara* and *Nitella*, Barsoum, Y.H., Pickard, W.F. 65:81
Fusion
–, electric field-induced cell-to-cell fusion, Zimmermann, U., Vienken, J. 67:165
–, lipid-polyethylene glycol interactions: I. induction of fusion between liposomes, Boni, L.T., Stewart, T.P., Alderfer, J.L., Hui, S.W. 62:65
GABA
–, GABA efflux from synaptosomes: effects of membrane potential, and external GABA and cations, Nelson, M.T., Blaustein, M.P. 69:213
Galactose
–, sodium-coupled amino acid and sugar transport by *Necturus* small intestine, Gunter-Smith, P.J., Grasset, E., Schultz, S.G. 66:25
D-Galactose
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Gallbladder
–, effects of bicarbonate on fluid and electrolyte transport by guinea pig and rabbit gallbladder: stimulation of absorption, Heinze, K., Peterson, K.-U., Wood, J.R. 62:175
–, noise analysis of the K^+ current through the apical membrane of *Necturus* gallbladder, Gögelein, H., Van Driessche, W. 63:243
–, single-file diffusion multi-ion mechanism of permeation in paracellular epithelial channels, Salas, P.J.I., Moreno, J.H. 64:103
–, steady states and the effects of ouabain in the *Necturus* gallbladder epithelium: a model analysis, Baerentsen, H.J., Christensen, O., Thomsen, P.G., Zeuthen, T. 68:215
–, stimulation of gallbladder fluid and electrolyte absorption by butyrate, Peterson, K.-U., Wood, J.R., Schulze, G., Heintze, K. 62:183
Gamma-aminobutyric acid
–, GABA efflux from synaptosomes: effects of membrane potential, and external GABA and cations, Nelson, M.T., Blaustein, M.P. 69:213
Ganglioside
–, role of membrane gangliosides in the binding and action of bacterial toxins, Fishman, P.H. 69:85
Gap junction
–, cell junction and cyclic AMP: I. upregulation of junctional membrane permeability and junctional membrane particles by administration of cyclic nucleotide or phosphodiesterase inhibitor, Flagg-Newton, J.L., Dahl, G., Loewenstein, W.R. 63:105
–, cell junction and cyclic AMP: II. modulations of junctional membrane permeability, dependent on serum and cell density, Flagg-Newton, J.L., Loewenstein, W.R. 63:123
–, cell junction and cyclic AMP: III. promotion of junctional membrane permeability and junctional membrane particles in a junction-deficient cell type, Azarnia, R., Dahl, G., Loewenstein, W.R. 63:133
–, permeability and structural studies of heart cell gap junctions under normal and altered ionic conditions, Burt, J.M., Frank, J.S., Berns, M.W. 68:227
–, Hormonal regulation of junctional permeability: upregulation by catecholamine and prostaglandin E_1, Radu, A., Dahl, G., Loewenstein, W.R. 70:239

Garfish olfactory nerve
–, partial purification and characterization of $(Na^+ + K^+)$-ATPase from garfish olfactory nerve axon plasma membrane, Kracke, G.R., O'Neal, S.G., Chacko, G.K. 63:147
Gastric glands
–, morphometric analysis of parietal cell membrane transformations in isolated gastric glands, Gibert, A.J., Hersey, S.J. 67:113
Gastric (K,H)-ATPase
–, thallium interaction with the gastric (K,H)-ATPase, Rabon, E.C., Sachs, G. 62:19
Gastric microsomes
–, H^+/ATP stoichiometry for the gastric $(K^+ + H^+)$-ATPase, Reenstra, W.W., Forte, J.G. 61:55
Gastrin
–, action of caerulein, gastrin 17, pentagastrin, and secretin on the active transport of sodium by the frog skin, Greenwell, J.R., Low, H.S. 61:91
Gene fusions
–, use of gene fusions to study bacterial transport proteins, Shuman, H.A. 61:1
Giant algal cells
–, comparison of a lipophilic cation and microelectrodes to measure membrane potentials of the giant-celled algae *Chara australis* (Charophyta) and *Griffithsia monilis* (Rhodophyta), Ritchie, R.J. 69:57
Giant axon
–, potassium currents in the giant axon of the crab *Carcinus maenas*, Quinta-Ferreira, M.E., Rojas, E., Arispe, N. 66:171
–, sodium currents in the giant axon of the crab *Carcinus maenas*, Quinta-Ferreira, M.E., Arispe, N., Rojas, E. 66:159
Giant cells
–, electric field-induced cell-to-cell fusion, Zimmermann, U., Vienken, J. 67:165
D-Glucose
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
–, partial purification of the Na^+-dependent D-glucose transport system from renal brush border membranes, Im, W.B., Ling, K.Y., Faust, R.G. 65:131
–, recycling of D-glucose in collagenous cuticle: a means of nutrient conservation?, Gomme, J. 62:47
L-Glucose
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Glucose transport
–, further studies of proximal tubular brush border membrane D-glucose transport heterogeneity, Turner, R.J., Moran, A. 70:37
–, stoichiometric studies of the renal outer cortical brush border membrane D-glucose transporter, Turner, R.J., Moran, A. 67:73
Glycolysis
–, evidence for activation of an active electrogenic proton pump in Ehrlich ascites tumor cells during glycolysis, Heinz, A., Sachs, G., Schafer, J.A. 61:143
Glycopeptide
–, primary structure of horse erythrocyte glycophorin HA. Its amino acid sequence has a unique homology with those of human and porcine erythrocyte glycophorins, Murayama, J.-I., Tomita, M., Hamada, A. 64:205
Goblet cell
–, structure and permeability of goblet cell tight junctions in rat small intestine, Madara, J.L., Trier, J.S. 66:145
Goldfish
–, microscopical determination of the filtration permeability of the mucosal surface of the goldfish intestinal epithelium, Siegenbeek van Heukelom, J., van den Ham, M.D., Albus, H., Groot, J.A. 63:31
Golgi membrane
–, ATP-dependent calcium transport by a Golgi-enriched membrane fraction from mouse mammary gland, Neville, M.D., Selker, F., Semple, K., Watters, C. 61:97
Gramicidin A
–, dielectric relaxation studies of ionic processes in lysolecithin-packaged gramicidin channels, Henze, R., Neher, E., Trapane, T.L., Urry, D.W. 64:233
–, effect of anions on the cation selectivity of gramicidin-containing liposomes, Cohen, B.E. 68:79
Gramicidin channel
–, ion interactions in (1-^{13}C)D-val^8 and D-leu^{14} analogs of gramicidin A, the helix sense of the channel and location of ion binding sites, Urry, D.W., Walker, J.T., Trapane, T.L. 69:225
Gramicidin D
–, electrical properties of the rabbit urinary bladder assessed using gramicidin D, Lewis, S.A., Wills, N.K. 67:45
Growth control
–, density-dependent regulation of cell growth: an example of a cell-cell recognition phenomenon, Lieberman, M.A., Glaser, L. 63:1
Growth factors
–, density-dependent regulation of cell growth: an example of a cell-cell recognition phenomenon, Lieberman, M.A., Glaser, L. 63:1
Guinea pig taenia coli
–, effects of Na readmission on cellular ^{45}Ca fluxes in Na-depleted guinea pig taenia coli, Aaronson, P., van Breeman, C. 65:89
H^+, *see also entries under* Proton
H^+/ATP stoichiometry
–, H^+/ATP stoichiometry for the gastric $(K^+ + H^+)$-ATPase, Reenstra, W.W., Forte, J.G. 61:55
H^+-ATPase
–, electrogenic proton transport in epithelial membranes, Steinmetz, P.R., Andersen, O.S. 65:155
H^+ secretion
–, an ATP-driven proton pump in brush-border membranes from rat renal cortex, Kinne-Saffran, E., Beauwens, R., Kinne, R. 64:67
–, evidence for activation of an active electrogenic proton pump in Ehrlich ascites tumor cells during glycolysis, Heinz, A., Sachs, G., Schafer, J.A. 61:143
–, serosal Na/Ca exchange and H^+ and Na^+ transport by the turtle and toad bladders, Arruda, J.A.L., Sabatini, S., Westenfelder, C. 70:135
H_2 DIDS
–, the kinetics of intramolecular cross-linking of the band 3 protein in the red blood cell membrane by 4,4′-diisothiocyano dihydrostilbene-2,2′-disulfonic acid (H_2 DIDS), Kampmann, L., Lepke, S., Fasold, H., Fritzsch, G., Passow, H. 70:199
Halobacteria
–, state of water in extremely halophilic bacteria: heat of dilution of *Halobacterium halobium*, Brown, A.D., Duong, A. 64:187
Halobacterium halobium
–, state of water in extremely halophilic bacteria: heat of dilution in *Halobacterium halobium*, Brown, A.D., Duong, A. 64:187
Halophilic bacteria
–, state of water in extremely halophilic bacteria: heat of dilution of *Halobacterium halobium*, Brown, A.D., Duong, A. 64:187

Harmaline
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
HCl secretion
–, H^+/ATP stoichiometry for the gastric ($K^+ + H^+$)-ATPase, Reenstra, W.W., Forte, J.G. 61:55
HCO_3^-, *see entries under* Bicarbonate ions
Heat of dilution
–, state of water in extremely halophilic bacteria: heat of dilution of *Halobacterium halobium*, Brown, A.D., Duong, A. 64:187
Helix sense
–, ion interactions in (1-^{13}C)D-val^8 and D-leu^{14} analogs of gramicidin A, the helix sense of the channel and location of ion binding sites, Urry, D.W., Walker, J.T., Trapane, T.L. 69:225
Hemolysis
–, general and transport properties of hypotonic and isotonic preparations of resealed erythrocyte ghosts, Jausel-Hüsken, S., Deuticke, B. 63:61
Hen lower intestine
–, fluctuation analysis of short-circuit current in a warm-blooded sodium-retaining epithelium: site current, density, and interaction with triamterene, Christensen, O., Bindslev, N. 65:19
Hepatocytes
–, amino acid transport in isolated rat hepatocytes, Kilberg, M.S. 69:1
Hexagonal phase
–, morphology of the intermediate stages in the lamellar to hexagonal lipid phase transition, Borovjagin, V.L., Vergara, J.A., McIntosh, T.J. 69:199
High L-low K polymorphism
–, interaction of L antibody with low potassium-type sheep red cells: resolution of two separate functional antibodies, Smalley, C.E., Tucker, E.M., Dunham, P.B., Ellory, J.C. 64:167
Hill plot
–, transepithelial transport in cell culture: stoichiometry of Na/phlorizin binding and Na/D-glucose cotransport. A two-step, two-sodium model of binding and translocation, Misfeldt, D.S., Sanders, M.J. 70:191
Histamine stimulation
–, morphometric analysis of parietal cell membrane transformations in isolated gastric glands, Gibert, A.J., Hersey, S.J. 67:113
Hormones
–, amino acid transport in isolated rat hepatocytes, Kilberg, M.S. 69:1
–, hormonal regulation of cell junction permeability: upregulation by catecholamine and prostaglandin E_1, Radu, A., Dahl, G., Loewenstein, W.R. 70:239
Horse glycophorin
–, primary structure of horse erythrocyte glycophorin HA. Its amino acid sequence has a unique homology with those of human and porcine erythrocyte glycophorins, Murayama, J.-I., Tomita, M., Hamada, A. 64:205
Human erythrocyte membranes
–, modulation of ATPase activities of human erythrocyte membranes by free fatty acids or phospholipase A_2, Schmalzing, G., Kutschera, P. 69:65
Human erythrocytes
–, L-leucine transport in human red blood cells: a detailed kinetic analysis, Rosenberg, R. 62:79
–, a method for estimating free Ca within human red blood cells, with an application to the study of their Ca-dependent K permeability, Simons, T.J.B. 66:235
Hybridoma cells
–, electric field-induced cell-to-cell fusion, Zimmermann, U., Vienken, J. 67:165
Hydrodictyon
–, electrogenic and diffusive components of the membrane of *Hydrodictyon africanum*, Findlay, G.P. 68:179
Hydrogen bond number
–, correlation between lipid partition coefficients and surface permeation in *Schistosoma japonicum*, Cornford, E.M. 64:217
Hydrogen ion secretion
–, role of luminal buffers in renal tubular acidification, Costa Silva, V.L., Campiglia, S.S., de Mello Aires, M., Malnic, G., Giebisch, G. 63:13
Hydrostatic pressure
–, pressure and temperature effects on human red cell cation transport, Hall, A.C., Ellory, J.C., Klein, R.A. 68:47
–, pressure dependence of the potassium currents of squid giant axon, Conti, F., Fioravanti, R., Segal, J.R., Stühmer, W. 69:35
–, pressure dependence of the sodium currents of squid giant axon, Conti, F., Fioravanti, R., Segal, J.R., Stühmer, W. 69:23
Hymenolepis diminuta
–, ^{3}HOH-osmotic water fluxes and ultrastructure of an epithelial syncytium, Brodie, D.A., Podesta, R.B. 61:107
I_{sc}
–, transepithelial transport in cell culture: stoichiometry of Na/phlorizin binding and Na/D-glucose cotransport. A two-step, two-sodium model of binding and translocation, Misfeldt, D.S., Sanders, M.J. 70:191
Impedance
–, small signal impedance of heart cell membranes, Clapham, D.E., DeFelice, L.J. 67:63
Inactivation
–, evidence for a two-state mobile carrier mechanism in erythrocyte choline transport: effects of substrate analogs on inactivation of the carrier by N-ethylmaleimide, Devés, R., Krupka, R.M. 61:21
Indanone
–, the significance of changes in thermodynamic affinity induced by aldosterone in sodium-transporting epithelia, Beauwens, R., Beaujean, V., Crabbé, J. 68:11
Inhibition
–, reaction of internal forms of the choline carrier of erythrocytes with N-ethylmaleimide: evidence for a carrier conformational change on complex formation, Devés, R., Krupka, R.M. 63:99
Inhibition of transport
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Inhibitor binding
–, the external anion binding site of the human erythrocyte anion transporter: DNDS binding and competition with chloride, Fröhlich, O. 65:111
Insect midgut
–, intracellular K^+ activities and cell membrane potentials in a K^+-transporting epithelium, the midgut of tobacco hornworm (*Manduca sexta*), Moffett, D.F., Hudson, R.L., Moffett, S.B., Ridgway, R.L. 70:59
Insulin
–, hormonal effects on fatty acid binding and physical properties of rat liver plasma membranes, Schroeder, F. 68:1
Insulin release
–, potassium-induced insulin release and voltage noise measurements in single mouse islets of Langerhans, Dawson, C.M., Atwater, I., Rojas, E. 64:33

Intercellular communication
–, cell junction and cyclic AMP: III. promotion of junctional membrane permeability and junctional membrane particles in a junction-deficient cell type, Azarnia, R., Dahl, G., Loewenstein, W.R. 63:133
–, permeability and structural studies of heart cell gap junctions under normal and altered ionic conditions, Burt, J.M., Frank, J.S., Berns, M.W. 68:227
–, hormonal regulation of junctional permeability: upregulation by catecholamine and prostaglandin E_1, Radu, A., Dahl, G., Loewenstein, W.R. 70:239
Intestinal secretion
–, ricinoleate and deoxycholate are calcium ionophores in jejunal brush border vesicles, Maenz, D.D., Forsyth, G.W. 70:125
Intestine
–, intestinal HCO_3^- secretion in *Amphiuma:* stimulation by mucosal Cl^- and serosal Na^+, White, J.F., Imon, M.A. 68:207
–, microscopical determination of the filtration permeability of the mucosal surface of the goldfish intestinal epithelium, Siegenbeek van Heukelom, J., van den Ham, M.D., Albus, H., Groot, J.A. 63:31
–, structure and permeability of goblet cell tight junctions in rat small intestine, Madara, J.L., Trier, J.S. 66:145
–, thiocyanate transport across fish intestine (*Pleuronectes platessa*), Katz, U., Lau, K.R., Ramos, M.M.P., Ellory, J.C. 66:9
Intracellular activity
–, chloride distribution in the proximal convoluted tubule of *Necturus* kidney, Edelman, A., Bouthier, M., Anagnostopoulos, T. 62:7
–, cyclic AMP and intracellular ionic activities in *Necturus* gallbladder, Diez de los Rios, A., DeRose, N.E., Armstrong, W.McD 63:25
–, intracellular ionic activities in frog skin, Nagel, W., Garcia-Diaz, J.F., Armstrong, W.McD 61:127
–, relations between intracellular ion activities and extracellular osmolarity in *Necturus* gallbladder epithelium, Zeuthen, T. 66:109
Intracellular calcium
–, chloride permeability in human red cells: influence of membrane protein rearrangement resulting from ATP depletion and calcium accumulation, Motais, R., Baroin, A., Baldy, S. 62:195
Intracellular chloride activity
–, electrical properties of chloride transport across the *Necturus* proximal tubule, Guggino, W.B., Boulpaep, E.L., Giebisch, G. 65:185
Intracellular fluids
–, transepithelial Na^+ transport and the intracellular fluids: a computer study, Civan, M.M., Bookman, R.J. 65:63
Intracellular free Ca
–, a method for estimating free Ca within human red blood cells, with an application to the study of their Ca-dependent K permeability, Simons, T.J.B. 66:235
Intracellular osmolarity
–, relations between intracellular ion activities and extracellular osmolarity in *Necturus* gallbladder epithelium, Zeuthen, T. 66:109
Intracellular potassium activity
–, active potassium transport by rabbit descending colon epithelium, Wills, N.K., Biagi, B. 64:195
–, intracellular K^+ activities and cell membrane potentials in a K^+-transporting epithelium, the midgut of tobacco hornworm (*Manduca sexta*), Moffett, D.F., Hudson, R.L., Moffett, S.B., Ridgway, R.L. 70:59
–, potassium transport and intracellular potassium activities in rabbit gallbladder, Gunter-Smith, P.J., Schultz, S.G. 65:41
Intrachannel ion movements
–, dielectric relaxation studies of ionic processes in lysolecithin-packaged gramicidin channels, Henze, R., Neher, E., Trapane, T.L., Urry, D.W. 64:233
Intravesicular ATP hydrolysis
–, an ATP-driven proton pump in brush-border membranes from rat renal cortex, Kinne-Saffran, E., Beauwens, R., Kinne, R. 64:67
Inward rectifier
–, the dual effect of rubidium ions on potassium efflux in depolarized frog skeletal muscle, Spalding, B.C., Swift, J.G., Senyk, O., Horowicz, P. 69:145
–, K-current fluctuations in inward-rectifying channels of frog skeletal muscle, Schwarz, W., Neumcke, B., Palade, P.T. 63:85
Iodacetic acid
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor,* Gomme, J. 62:29
Ion-coupled transport
–, energy coupling to ATP synthesis by the proton-translocating ATPase, Malone, P.C. 67:1
Ion flux
–, radio-frequency bioeffects at the membrane level: separation of thermal and athermal contributions in the Characeae, Pickard, W.F., Barsoum, Y.H. 61:39
–, radio-frequency rectification in electrogenic and nonelectrogenic cells of *Chara* and *Nitella,* Barsoum, Y.H., Pickard, W.F. 65:81
–, transport of electrolytes in muscle, Sjodin, R.A. 68:161
Ionic conductances
–, lipid vesicle-mediated alterations of membrane cholesterol levels: effects of Na^+ and K^+ currents in squid axon, Steele, J.A., Poznansky, M.J., Eaton, D.C., Brodwick, M.S. 63:191
Ionic coupling
–, drugs that block calmodulin activity inhibit cell-to-cell coupling in the epidermis of *Tenebrio molitor,* Lees-Miller, J.P., Caveney, S. 69:233
Ionic permeability
–, single-file diffusion multi-ion mechanisms of permeation in paracellular epithelial channels, Salas, P.J.I., Moreno, J.H. 64:103
–, sodium-calcium ion exchange in skeletal muscle sarcolemmal vesicles, Gilbert, J.R., Meissner, G. 69:77
Ionic states
–, echinocyte formation induced by potential changes of human red blood cells, Glaser, R. 66:79
Ion-motive force
–, interpretation of current-voltage relationships for "active" ion transport systems: I. steady-state reaction-kinetic analysis of class-I mechanisms, Hansen, U.-P., Gradmann, D., Sanders, D., Slayman, C.L. 63:165
Ionophore
–, effect of monensin on osmotic water flow across the toad bladder and its stimulation by vasopressin and cyclic AMP, Mendoza, S.A., Thomas, M.W. 67:99
–, ionophore-mediated transmembrane movement of divalent cations in small unilamellar liposomes: an evaluation of the chlortetracycline fluorescence technique and correlations with black lipid membrane studies, Mathew, M.K., Nagaraj, R., Balaram, P. 65:13
Ion-selective microelectrodes
–, relations between intracellular ion activities and extracellular osmolarity in *Necturus* gallbladder epithelium, Zeuthen, T. 66:109

Ion selectivity
–, ion interactions in (1-^{13}C)D-val^{18} and D-leu^{14} analogs from gramicidin A, the helix sense of the channel and location of ion binding sites, Urry, D.W., Walker, J.T., Trapane, T.L. 69:225
–, ion selectivity of the apical membrane Na channel in the toad urinary bladder, Palmer, L.G. 67:91
–, K^+-selective, three-state channel from fragmented sarcoplasmic reticulum of frog leg muscle, Labarca, P.P., Miller, C. 61:31
Ion transport
–, effects of variation of ion and methylation of carrier on the rate constants of macrotetralide-mediated ion transport in lipid bilayers, Laprade, R., Grenier, F, Lapointe, J.-Y., Asselin, S. 68:191
–, evidence for activation of an active electrogenic proton pump in Ehrlich ascites tumor cells during glycolysis, Heinz, A., Sachs, G., Schafer, J.A. 61:143
–, ionic regultion of the unicellular green alga *Dunaliella tertiolecta,* Ehrenfeld, H., Cousin, J.-L. 70:47
–, miniature Ag-AgCl electrode for voltage clamping of the *Ambystoma* collecting duct, Delaney, R., Stoner, L.C. 64:45
–, transport of electrolytes in muscle, Sjodin, R.A. 68:161
–, turgor regulation in *Valonia macrophysa* following acute osmotic shock, Guggino, S., Gutknecht, J. 67:155
Ion-transport model
–, current-voltage curve of electrogenic Cl^- pump predicts voltage-dependent Cl^- efflux in *Acetabularia,* Mummert, H., Hansen, U.-P., Gradmann, D. 62:139
Isoprenaline
–, enhanced sensitivity to stimulation of sodium transport and cyclic AMP by antidiuretic hormone after Ca^{2+} depletion of isolated frog skin epithelium, Johnsen, A.H., Nielsen, R. 69:137
Isoproterenol
–, effects of catecholamines on electrolyte transport in cortical collecting tubule, Iino, Y., Troy, J.L., Brenner, B.M. 61:67
Isotope
–, the flux ratio equation under nonstationary conditions, Sten-Knudsen, O., Ussing, H.H. 63:233
Isotope flux
–, transepithelial transport in cell culture: stoichiometry of Na/phlorizin binding and Na/D-glucose cotransport. A two-step, two-sodium model of binding and translocation, Misfeldt, D.S., Sanders, M.J. 70:191
Junctional permeability
–, cell junction and cyclic AMP: I. upregulation of junctional membrane permeability and junctional membrane particles by administration of cyclic nucleotide or phosphodiesterase inhibitor, Flagg-Newton, J.L., Dahl, G., Loewenstein, W.R. 63:105
–, cell junction and cyclic AMP: II. modulations of junctional membrane permeability, dependent on serum and cell density, Flagg-Newton, J.L., Loewenstein, W.R. 63:123
–, cell junction and cyclic AMP: III. promotion of junctional membrane permeability and junctional membrane particles in a junction-deficient cell type, Azarnia, R., Dahl, G., Loewenstein, W.R. 63:133
Junctions
–, occluding junctions of the *Necturus* gallbladder, Cereijido, M., Stefani, E,, Chávez de Ramirez, B. 70:15
K, *see entries under* Potassium
KCN
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor,* Gomme, J. 62:29
Kidney
–, delineation of sodium-stimulated amino acid transport pathways in rabbit kidney brush border vesicles, Mircheff, A.K., Kippen, I., Hirayama, B., Wright, E.M. 64:113
Kidney cell line
–, transepithelial transport in cell culture: stoichiometry of Na/phlorizin binding and Na/D-glucose cotransport. A two-step, two-sodium model of binding and translocation, Misfeldt, D.S., Sanders, M.J. 70:191
Kidney cells
–, effect of sodium on cellular calcium transport in rat kidney, Borle, A.B. 66:183
kinetic analysis
–, L-leucine transport in human red blood cells: a detailed kinetic analysis, Rosenberg, R. 62:79
Kinetics
–, effects of variation of ion and methylation of carrier on the rate constants of macrotetralide-mediated ion transport in lipid bilayers, Laprade, R., Grenier, F., Lapointe, J.-Y., Asselin, S. 68:191
–, pressure dependence of the potassium currents of squid giant axon, Conti, F., Fioravanti, R., Segal, J.R., Stühmer, W. 69:35
–, pressure dependence of the sodium currents of squid giant axon, Conti, F., Fioravanti, R., Segal, J.R., Stühmer, W. 69:23
L1210 cells
–, two-compartment behavior during transport of folate compounds in L1210 cell plasma membrane vesicles, Yang, C.-H., Dembo, M., Sirotnak, F.M. 68:19
Lactate production
–, serosal Na/Ca exchange and H^+ and Na^+ transport by the turtle and toad bladders, Arruda, J.A.L., Sabatini, S., Westerfelder, C. 70:135
Lamellar phase
–, morphology of the intermediate stages in the lamellar to hexagonal lipid phase transition, Borovjagin, V.L., Vergara, J.A., McIntosh, T.J. 69:199
Lanthanum
–, comparison of the action of La^{3+} and Ca^{2+} on contraction threshold and other membrane parameters of frog skeletal muscle, Dörrscheidt-Käfer, M. 62:95
–, effects of calcium and lanthanum on phosphate efflux from nonmyelinated nerve fibers, Jirounek, P., Rouiller, M., Jones, G.J., Straub, R.W. 65:125
–, microelectrode studies of the effect of lanthanum on the electrical potential and resistance of outer and inner cell membranes of isolated frog skin, Goudeau, H., Wietzerbin, J., Mintz, E., Gingold, M.P., Nagel, W. 66:123
Lateral intercellular spaces
–, structure of *Necturus* gallbladder epithelium during transport at low external osmolarities, Bundgaard, M., Zeuthen, T. 68:97
Lecithin-cholesterol dispersions
–, preparation and properties of spin-labeled lecithin-cholesterol liposomes, Dresdner, G. 64:145
Lecithin-cholesterol vesicles
–, preparation and properties of spin-labeled lecithin-cholesterol liposomes, Dresdner, G. 64:145
L-Leucine transport
–, L-leucine transport in human red blood cells: a detailed kinetic analysis, Rosenberg, R. 62:79
Li, *see entries under* Lithium
Lipid asymmetry
–, phagosomal membrane lipids of LM fibroblasts, Schroeder, F. 68:141

Lipid bilayer membranes
–, effects of the plant alkaloid sanguinarine on cation transport by human red blood cells and lipid bilayer membranes, Cala, P.M., Nørby, J.G., Tosteson, D.C. 64:23
–, inorganic mercury (Hg^{2+}) transport through lipid bilayer membranes, Gutknecht, J. 61:61
Lipid bilayers
–, effects of variation of ion and methylation of carrier on the rate constants of macrotetralide-mediated ion transport in lipid bilayers, Laprade, R., Grenier, F., Lapointe, J.-Y., Asselin, S. 68:191
–, protein interactions with lipid bilayers: the channels of kidney plasma membrane proteolipids, Tosteson, M.T., Sapirstein, V.S. 63:77
Lipid fluidity
–, increase in lipid microviscosity of unilamellar vesicles upon the creation of transmembrane potential, Corda, D., Pasternak, C., Shinitzky, M. 65:235
Lipid mixtures
–, carrier-mediated ion transport through black membranes of lipid mixtures and its coupling to Ca^{2+}-induced phase separation, Schmidt, G., Eibl, H., Knoll, W. 70:147
Lipid polymorphism
–, morphology of the intermediate stages in the lamellar to hexagonal lipid phase transition, Borovjagin, V.L., Vergara, J.A., McIntosh, T.J. 69:199
Lipids
–, unsaturated fatty acid requirement in *Escherichia coli:* mechanism of palmitate-induced inhibition of growth of strain WN1, Ingram, L.O., Eaton, L.C., Erdos, G.W., Tedder, T.F., Vreeland, N.L. 65:31
Lipid vesicles
–, lipid vesicle-mediated alterations of membrane cholesterol levels: effects of Na^+ and K^+ currents in squid axon, Steele, J.A., Poznansky, M.J., Eaton, D.C., Brodwick, M.S. 63:191
Lipid/water interface
–, bacteriorhodopsin-mediated photoelectric responses in lipid/water systems, Drachev, L.A., Kaulen, A.D., Skulachev, V.P., Voytsitsky, V.M. 61:1
Lipolysis
–, triphenylmethylphosphonium cation distribution as a measure of hormone-induced alterations in white adipocyte membrane potential, Vallano, M.L., Sonenberg, M. 68:57
Lipophilic cations
–, comparison of a lipophilic cation and microelectrodes to measure membrane potentials of the giant-celled algae *Chara australis* (Charophyta) and *Griffithsia monilis* (Rhodophyta), Ritchie, R.J. 69:57
–, measurement of membrane potential in *Bacillus subtilis:* a comparison of lipophilic cations, rubidium ion, and a cyanine dye as probes, Zaritsky, A., Kihara, M., Macnab, R.M. 63:215
Liposome-cell interaction
–, preparation and properties of spin-labeled lecithin-cholesterol liposomes, Dresdner, G. 64:145
Liposome diameter
–, threshold effects on the lectin-mediated aggregation of liposomes: influence of the diameter of the liposomes, Alecio, M.R., Rando, R.R. 67:137
Liposome hydrolysis
–, use of phospholipase A to compare phospholipid organization in synaptic membranes, myelin, and liposomes, Butler, M., Abood, L.G. 66:1
Liposomes
–, cation ionophores A23187 and valinomycin enhance protein-mediated transfer of rat liver microsomal phosphatidylinositol to liposomes, Patumraj, K., Slaby, F. 70:105
–, effect of anions on the cation selectivity of gramicidin-containing liposomes, Cohen, B.E. 68:79
–, further studies on the charge-related alterations of methotrexate transport in Ehrlich ascites tumor cells by ionic liposomes: correlation with liposome-cell association, Fry, D.W., Goldman, I.D. 66:87
–, increase in size of sonicated phospholipid vesicles in the presence of detergents, Alonso, A., Sáez, R., Villena, A., Goñi, F.M. 67:55
–, ionophore-mediated transmembrane movement of divalent cations in small unilamellar liposomes: an evaluation of the chlortetracycline fluorescence technique and correlations with black lipid membrane studies, Mathew, M.K., Nagaraj, R., Balaram, P. 65:13
–, threshold effects on the lectin-mediated aggregation of liposomes: influence of the diameter of the liposomes, Alecio, M.R., Rando, R.R. 67:137
Liquid ion-exchanger microelectrodes
–, cyclic AMP and intracellular ionic activities in *Necturus* gallbladder, Diez de los Rios, A., DeRose, N.E., Armstrong, W.McD 63:25
Lithium
–, cellular lithium and transepithelial transport across toad urinary bladder, Hughes, P.M., Macknight, A.D.C. 70:69
–, ionic permeation of lipid bilayer membranes mediated by a neutral, noncyclic Li^+-selective carrier having imide and ether ligands. I. selectivity among monovalent cations, Margalit, R., Eisenman, G. 61:209
Lithium selectivity
–, ionic permeation of lipid bilayer membranes mediated by a neutral, noncyclic Li^+-selective carrier having imide and ether ligands. I. selectivity among monovalent cations, Margalit, R., Eisenman, G. 61:209
Lithium substitution
–, dependence of water movement on sodium transport in kidney proximal tubule: a microperfusion study substituting lithium for sodium, Corman, B., Roinel, N., de Rouffignac, C. 62:105
Liver
–, amino acid transport in isolated rat hepatocytes, Kilberg, M.S. 69:1
–, hormonal effects on fatty acid binding and physical properties of rat liver plasma membranes, Schroeder, F. 68:1
Liver mitochondria
–, evidence for two compartments of exchangeable calcium in isolated rat liver mitochondria obtained using a ^{45}Ca exchange technique in the presence of magnesium, phosphate, and ATP at 37° C, Barritt, G.J. 62:53
LLC-PK_1
–, transepithelial transport in cell culture: stoichiometry of Na/phlorizin binding and Na/D-glucose cotransport. A two-step, two-sodium model of binding and translocation, Misfeldt, D.S., Sanders, M.J. 70:191
LM fibroblasts
–, phagosomal membrane lipids of LM fibroblasts, Schroeder, F. 68:141
Local anesthetics
–, effects of local anesthetics on phospholipid topology and dopamine uptake and relase in rat brain synaptosomes, Bradford, P.G., Marinetti, G.V. 67:211
–, interaction of spin-labeled local anesthetics with the sodium channel of squid axon membranes, Wang, H.H., Yeh, J.Z., Narahashi, T. 66:227
–, trinitrobenzenesulfonic acid and fluorodinitrobenzene: probes to study local anesthetic effects in cell membranes, Bradford, P., Marinetti, G.V. 61:193
Low osmolarities
–, structure of *Necturus* gallbladder epithelium during transport

at low external osmolarities, Bundgaard, M., Zeuthen, T. 68:97
Low temperature
–, properties of sodium and potassium channels of the squid giant axon far below 0° C, Kukita, F. 68:151
Lucifer yellow
–, intracellular K^+ activities and cell membrane potentials in a K^+-transporting epithelium, the midgut of tobacco hornworm (*Manduca sexta*), Moffett, D.F., Hudson, R.L., Moffett, S.B., Ridgway, R.L. 70:59
Lymphocyte-liposome interaction
–, binding and incorporation of lecithin-cholesterol vesicles to lymphocytes: a spin-label study, Dresdner, G., Hammarström, L., Edvard Smith, C.I. 64:155
Lysophosphatidylcholine
–, increase in size of sonicated phospholipid vesicles in the presence of detergents, Alonso, A., Sáez, R., Villena, A., Goñi, F.M. 67:55
Macrophage polykaryons
–, electrophysiology of phagocytic membranes: induction of slow membrane hyperpolarizations in macrophages and macrophage polykaryons by intracellular calcium injection, Persechini, P.M., Araujo, E.G., Oliveira-Castro, G.M. 61:81
Macrophages
–, electrophysiology of phagocytic membranes: induction of slow membrane hyperpolarizations in macrophages and macrophage polykaryons by intracellular calcium injection, Persechini, P.M., Araujo, E.G., Oliveira-Castro, G.M. 61:81
Macrotetralides
–, effects of variation of ion and methylation of carrier on the rate constants of macrotetralide-mediated ion transport in lipid bilayers, Laprade, R., Grenier, F., Lapointe, J.-Y., Asselin, S. 68:191
Magnesium and calcium transport
–, evidence for two compartments of exchangeable calcium in isolated rat liver mitochondria obtained using a ^{45}Ca exchange technique in the presence of magnesium, phosphate, and ATP at 37° C, Barritt, G.J. 62:53
Maltose transport
–, use of gene fusions to study bacterial transport proteins, Shuman, H.A. 61:1
Mammary gland
–, ATP-dependent calcium transport by a Golgi-enriched membrane fraction from mouse mammary gland, Neville, M.,C., Selker, F., Semple, K., Watters, C. 61:97
Manganese
–, periodic responses in squid axon membrane exposed intracellularly and extracellularly to solutions containing a single species of salt, Terakawa, S. 63:51
Mannitol
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
D-Mannose
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Marine algae
–, turgor regulation in *Valonia macrophysa* following acute osmotic shock, Guggino, S., Gutknecht, J. 67:155
Maturation
–, study of maturation of membrane transport function in red blood cells by X-ray microanalysis, Lee, P., Kirk, R.G. 67:103
MDCK
–, K^+ transport in "tight" epithelial monolayers of MDCK cells, Aiton, J.F., Brown, C.D.A., Ogden, P., Simmons, N.L. 65:99
Membrane
–, density-dependent regulation of cell growth: an example of a cell-cell recognition phenomenon, Lieberman, M.A., Glaser, L. 63:1
–, effects of calcium and lanthanum on phosphate efflux from nonmyelinated nerve fibers, Jirounek, P., Rouiller, M., Jones, G.J., Straub, R.W. 65:125
–, electrogenic and diffusive components of the membrane of *Hydrodictyon africanum*, Findlay, G.P. 68:179
–, role of the bilayer in the shape of the isolated erythrocyte membrane, Lange, Y., Gough, A., Steck, T.L. 69:113
–, unsaturated fatty acid requirement in *Escherichia coli:* mechanism of palmitate-induced inhibition of growth of strain WN1, Ingram, L.O., Eaton, L.C., Erdos, G.W., Tedder, T.F., Vreeland, N.L. 65:31
Membrane biosynthesis
–, charge clusters and the orientation of membrane proteins, Weinstein, J.N., Blumenthal, R., van Renswoude, J., Kempf, C., Klausner, R.D. 66:203
Membrane-bound spin label
–, preparation and properties of spin-labeled lecithin-cholesterol liposomes, Dresdner, G. 64:145
Membrane-bound spin probe
–, binding and incorporation of lecithin-cholesterol vesicles to lymphocytes: a spin-label study, Dresdner, G., Hammarström, L., Edvard Smith, C.I. 64:155
Membrane channel recruitment
–, cell junction and cyclic AMP: I. upregulation of junctional membrane permeability and junctional membrane particles by administration of cyclic nucleotide or phosphodiesterase inhibitor, Flagg-Newton, J.L., Dahl, G., Loewenstein, W.R. 63:105
Membrane conductances
–, relationship of transepithelial electrical potential to membrane potentials and conductance ratios in frog skin, Nagel, W., Essig, A. 69:125
Membrane depolarization
–, potassium-induced insulin release and voltage noise measurements in single mouse islets of Langerhans, Dawson, C.M., Atwater, I., Rojas, E. 64:33
Membrane electrodes
–, ionic permeation of lipid bilayer membranes mediated by a neutral, noncyclic Li^+-selective carrier having imide and ether ligands, I. selectivity among monovalent cations, Margalit, R., Eisenman, G. 61:209
Membrane fluidity
–, modulation of ATPase activities of human erythrocyte membranes by free fatty acids or phospholipase A_2, Schmalzing, G., Kutschera, P. 69:65
Membrane fusion
–, increase in size of sonicated phospholipid vesicles in the presence of detergents, Alonso, A., Sáez, R., Villena, A., Goñi, F.M. 67:55
Membrane input resistance
–, comparison of the action of La^{3+} and Ca^{2+} on contraction threshold and other membrane parameters of frog skeletal muscle, Dörrscheidt-Käfer, M. 62:95
Membrane lipids
–, lipid vesicle-mediated alterations of membrane cholesterol levels: effects of Na^+ and K^+ currents in squid axon, Steele, J.A., Poznansky, M.J., Eaton, D.C., Brodwick, M.S. 63:191
Membrane permeability
–, cell junction and cyclic AMP: I. upregulation of junctional membrane permeability and junctional membrane particles by administration of cyclic nucleotide or phosphodiesterase inhibitor, Flagg-Newton, J.L., Dahl, G., Loewenstein, W.R. 63:105

Membrane permeability (continued)
–, cell junction and cyclic AMP: II. modulations of junctional membrane permeability, dependent on serum and cell density, Flagg-Newton, J.L., Loewenstein, W.R. 63:123
–, cell junction and cyclic AMP: III. promotion of junctional membrane permeability and junctional membrane particles in a junction-deficient cell type, Azarnia, R., Dahl, G., Loewenstein, W.R. 63:133
–, hormonal regulation of cell junction permeability: upregulation by catecholamine and prostaglandin E_1, Radu, A., Dahl, G., Loewenstein, W.R. 70:239
–, inorganic mercury (Hg^{2+}) transport through lipid bilayer membranes, Gutknecht, J. 61:61
Membrane photo-voltages
–, erythrosin and pH gradient induced photo-voltages in bilayer membranes, Varnadore, W.E. Jr., Arietta, R.T., Duchek, J.R., Huebner, H.S. 65:147
Membrane potentials
–, active potassium transport by rabbit descending colon epithelium, Wills, N.K., Biagi, B. 64:195
–, charge clusters and the orientation of membrane proteins, Weinstein, J.N., Blumenthal, R., van Renswoude, J., Kempf, C., Klausner, R.D. 66:203
–, chloride secretion by canine tracheal epithelium: II. the cellular electrical potential profile, Welsh, M.J., Smith, P.L., Frizzell, R.A. 70:227
–, comparison of a lipophilic cation and microelectrodes to measure membrane potentials of the giant-celled algae *Chara australis* (Charophyta) and *Griffithsia monilis* (Rhodophyta), Ritchie, R.J. 69:57
–, cyclic AMP and intracellular ionic activities in *Necturus* gallbladder, Diez de los Rios, A., DeRosc, N.E., Armstrong, W.McD 63:25
–, echinocyte formation induced by potential changes of human red blood cells, Glaser, R. 66:79
–, electrical properties of the plasma membrane of microplasmodia of *Physarum polycephalum,* Fingerle, J., Gradmann, D. 68:67
–, energy coupling to ATP synthesis by the proton-translocating ATPase, Maloney, P.C. 67:1
–, increase in lipid microviscosity of unilamellar vesicles upon the creation of transmembrane potential, Corda, D., Pasternak, C., Shinitzky, M. 65:235
–, intracellular ionic activities in frog skin, Nagel, W., Garcia-Diaz, J.F., Armstrong, W.McD 61:127
–, measurement of membrane potential in *Bacillus subtilis:* a comparison of lipophilic cations, rubidium ion, and a cyanine dye as probes, Zaritsky, A., Kihara, M., Macnab, R.M. 63:215
–, the mechanism of voltage-sensitive dye responses on sarcoplasmic reticulum, Beeler, T.J., Farmen, R.H., Martonosi, A.N. 62:113
–, potassium-induced insulin release and voltage noise measurements in single mouse islets of Langerhans, Dawson, C.M., Atwater, I., Rojas, E. 64:33
–, potassium transport and intracellular potassium activities in rabbit gallbladder, Gunter-Smith, P.J., Schultz, S.G. 65:41
–, relationship of transepithelial electrical potential to membrane potentials and conductance ratios in frog skin, Nagel, W., Essig, A. 69:125
–, role of lipids in the *Neurospora crassa* membrane: IV. biochemical and electrophysiological changes caused by growth on phytanic acid, Friedman, K.J., Glick, D. 64:1
–, separation of tonoplast and plasma membrane potential and resistance in cells of oat coleoptiles, Bates, G.W., Goldsmith, M.H.M., Goldsmith, T.H. 66:15
–, some properties of KCl-filled microelectrodes: correlation of potassium "leakage" with tip resistance, Fromm, M., Schultz, S.G. 62:239
–, stoichiometry of proton movements coupled to ATP synthesis driven by a pH gradient in *Streptococcus lactis,* Maloney, P.C., Hansen, F.C. III 66:63
–, triphenylmethylphosphonium cation distribution as a measure of hormone-induced alterations in white adipocyte membrane potential, Vallano, M.L., Sonenberg, M. 68:57
Membrane protein complexes
–, chloride permeability in human red cells: influence of membrane protein rearrangement resulting from ATP depletion and calcium accumulation, Motais, R., Baroin, A., Baldy, S. 62:195
Membrane proteins
–, charge clusters and the orientation of membrane proteins, Weinstein, J.N., Blumenthal, R., van Renswoude, J., Kempf, C., Klausner, R.D. 66:203
Membrane reconstitution
–, increase in size of sonicated phospholipid vesicles in the presence of detergents, Alonso, A., Sáez, R., Villena, A., Goñi, F.M. 67:55
Membrane resistances
–, cellular and paracellular resistances of the *Necturus* proximal tubule, Guggino, W.B., Windhager, E.E., Boulpaep, E.L., Giebisch, G. 67:143
–, chloride secretion by canine tracheal epithelium: II. the cellular electrical potential profile, Welsh, M.J., Smith, P.L., Frizzell, R.A. 70:227
–, electrical properties of chloride transport across the *Necturus* proximal tubule, Guggino, W.B., Boulpaep, E.L., Giebisch, G. 65:185
–, electrical properties of the rabbit urinary bladder assessed using gramicidin D, Lewis, S.A., Wills, N.K. 67:45
–, separation of tonoplast and plasma membrane potential and resistance in cells of oat coleoptiles, Bates, G.W., Goldsmith, M.H.M., Goldsmith, T.H. 66:15
Membrane transport
–, anilinonaphthalene sulfonate fluorescence and amino acid transport in yeast, Slavík, J., Horák, J., Řihová, L., Kotyk, A. 64:175
–, general and transport properties of hypotonic and isotonic preparations of resealed erythrocyte ghosts, Jausel-Hüsken, S., Deuticke, B. 63:61
–, H^+/ATP stoichiometry for the gastric $(K^+ + H^+)$-ATPase, Reenstra, W.W., Forte, J.G. 61:55
–, ionophore-mediated transmembrane movement of divalent cations in small unilamellar liposomes: an evaluation of the chlortetracycline fluorescence technique and correlations with black lipid membrane studies, Mathew, M.K., Nagaraj, R., Balaram, P. 65:13
–, membrane transport during erythroid differentiation, Gordon, P.B., Rubin, M.S. 64:11
Membrane vesicles
–, multiple transport pathways for neutral amino acids in rabbit jejunal brush border vesicles, Stevens, B.R., Ross, H.J., Wright, E.M. 66:213
Membrane voltage lactate transport
–, evidence for activation of an active electrogenic proton pump in Ehrlich ascites tumor cells during glycolysis, Heinz, A., Sachs, G., Schafer, J.A. 61:143
Mercury
–, inorganic mercury (Hg^{2+}) transport through lipid bilayer membranes, Gutknecht, J. 61:61
Metabolic acidosis
–, intracellular potential and K^+ activity in rat kidney proximal tubular cells in acidosis and K^+ depletion, Cemerikić, D., Wilcox, C.S., Giebisch, G. 69:159

Metabolic dependence
–, chloride permeability in human red cells: influence of membrane protein rearrangement resulting from ATP depletion and calcium accumulation, Motais, R., Baroin, A., Baldy, S. 62:195
Metabolism
–, amino acid active transport and stimulation by substrates in the absence of a Na^+ electrochemical potential gradient, Heinz, A., Jackson, J.W., Richey, B.E., Sachs, G., Schafer, J.A. 62:149
Methotrexate
–, further studies on the charge-related alterations of methotrexate transport in Ehrlich ascites tumor cells by ionic liposomes: correlation with liposome-cell association, Fry, D.W., Goldman, I.D. 66:87
Methylation
–, effects of variation of ion and methylation of carrier on the rate constants of macrotetralide-mediated ion transport in lipid bilayers, Laprade, R., Grenier, F., Lapointe, J.-Y., Asselin, S. 68:191
α-Methyl-D-glucopyranoside
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
3-O-Methyl-D-glucose
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Microcalorimetry
–, state of water in extremely halophilic bacteria: heat of dilution of *Halobacterium halobium*, Brown, A.D., Duong, A. 64:187
Microelectrodes
–, chloride secretion by canine tracheal epithelium: II. the cellular electrical potential profile, Welsh, M.J., Smith, P.L., Frizzell, R.A. 70:227
–, comparison of a lipophilic cation and microelectrodes to measure membrane potentials of the giant-celled algae *Chara australis* (Charophyta) and *Griffithsia monilis* (Rhodophyta), Ritchie, R.J. 69:57
–, electrical properties of the rabbit urinary bladder assessed using gramicidin D, Lewis, S.A., Wills, N.K. 67:45
–, intracellular ionic activities in frog skin, Nagel, W., Garcia-Diaz, J.F., Armstrong, W.McD 61:127
–, microelectrode studies of the effect of lanthanum on the electrical potential and resistance of outer and inner cell membranes of isolated frog skin, Goudeau, H., Wietzerbin, J., Mintz, E., Gingold, M.P., Nagel, W. 66:123
–, some properties of KCl-filled microelectrodes: correlation of potassium "leakage" with tip resistance, Fromm, M., Schultz, S.G. 62:239
Microprofusion
–, alpha and beta adrenergic agonists stimulate water absorption in the rat proximal tubule, Weinman, E.J., Sansome, S.C., Knight, T.F., Senekjian, H.O. 69:107
Microsomes
–, cation ionophores A23187 and valinomycin enhance protein-mediated transfer of rat liver microsomal phosphatidylinositol to liposomes, Patumraj, K., Slaby, F. 70:105
Microvilli
–, time course of vasopressin-induced formation of microvilli in granular cells of toad urinary bladder, Le Furgey, A., Tisher, C.C. 61:13
Miniature Ag-AgCl electrode
–, miniature Ag-AgCl electrode for voltage clamping of the *Ambystoma* collecting duct, Delaney, R., Stoner, L.C. 64:45
Mitochondria
–, regulation of cellular energy metabolism, Ercińska, M., Wilson, D.F. 70:1
–, triphenylmethylphosphonium cation distribution as a measure of hormone-induced alterations in white adipocyte membrane potential, Vallano, M.L., Sonenberg, M. 68:57
Mitochondrial Ca
–, effect of sodium on cellular calcium transport in rat kidney, Borle, A.B. 66:183
Mobile charges
–, transport properties of mobile charges in algal membranes: influence of pH and turgor pressure, Zimmermann, U., Büchner, K.-H., Benz, R. 67:183
Model lipid membrane
–, bacteriorhodopsin-mediated photoelectric responses in lipid/water systems, Drachev, L.A., Kaulen, A.D., Skulachev, V.P., Voytsitsky, V.M. 61:1
Mollusc neurons
–, energy profile of the calcium channel in the membrane of mollusc neurons, Kostyuk, P.G., Mironov, S.L., Doroshenko, P.A. 70:181
–, surface charges on the outer side of mollusc neuron membrane, Kostyuk, P.G., Mironov, S.L., Doroshenko, P.A., Ponomarev, V.N. 70:171
Monensin
–, effect of monensin on osmotic water flow across the toad bladder and its stimulation by vasopressin and cyclic AMP, Mendoza, S.A., Thomas, M.W. 67:99
–, permeability and structural studies of heart cell gap junctions under normal and altered ionic conditions, Burt, J.M., Frank, J.S., Berns, M.W. 68:227
Monocarboxylate transport
–, monocarboxylate transport in erythrocytes, Deuticke, B. 70:89
Monosaccharides
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Morphology
–, microscopical determination of the filtration permeability of the mucosal surface of the goldfish intestinal epithelium, Siegenbeek van Heukelom, J., van den Ham, M.D., Albus, H., Groot, J.A. 63:31
–, structure of *Necturus* gallbladder epithelium during transport at low external osmolarities, Bundgaard, M., Zeuthen, T. 68:97
Morphometry
–, morphometric analysis of parietal cell membrane transformations in isolated gastric glands, Gibert, A.J., Hersey, S.J. 67:113
Mouse islet
–, potassium-induced insulin release and voltage noise measurements in single mouse islets of Langerhans, Dawson, C.M., Atwater, I., Rojas, E. 64:33
Mucosal hypertonicity
–, microscopical determination of the filtration permeability of the mucosal surface of the goldfish intestinal epithelium, Siegenbeek van Heukelom, J., van den Ham, M.D., Albus, H., Groot, J.A. 63:31
Multilamellar vesicles
–, lipid-polyethylene glycol interactions: II. formation of defects in bilayers, Boni, L.T., Stewart, T.P., Alderfer, J.L., Hui, S.W. 62:71
Muscle membrane
–, the dual effect of rubidium ions on potassium efflux in depolarized frog skeletal muscle, Spalding, B.C., Swift, J.G., Senyk, O., Horowicz, P. 69:145
–, transport of electrolytes in muscle, Sjodin, R.A. 68:161
Muscular contraction
–, mechanism of calcium release from skeletal sarcoplasmic reticulum, Miyamoto, H., Racker, E. 66:193
Myelin phospholipids
–, use of phospholipase A to compare phospholipid organiza-

tion in synaptic membranes, myelin, and liposomes, Butler, M., Abood, L.G. 66:1
Na, *see entries under* Sodium
Necturus gallbladder
–, cyclic AMP and intracellular ionic activities in *Necturus* gallbladder, Diez de los Rios, A., De Rose, N.E., Armstrong, W.McD 63:25
–, epithelial cell volume modulation and regulation, Spring, K.R., Ericson, A.-C. 69:167
–, noise analysis of the K^+ current through the apical membrane of *Necturus* gallbladder, Gögelein, H., Van Driessche, W. 63:243
–, occluding junctions of the *Necturus* gallbladder, Cereijido, M., Stefani, E., Chávez de Ramirez, B. 70:15
–, structure of *Necturus* gallbladder epithelium during transport at low external osmolarities, Bundgaard, M., Zeuthen, T. 68:97
Necturus proximal tubule
–, cell pH and luminal acidification in *Necturus* proximal tubule, O'Regan, M.G., Malnic, G., Giebisch, G. 69:99
Necturus small intestine
–, sodium-coupled amino acid and sugar transport by *Necturus* small intestine, Gunter-Smith, P.J., Grasset, E., Schultz, S.G. 66:25
Nereis diversicolor
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
–, recycling of D-glucose in collagenous cuticle: a means of nutrient conservation? Gomme, J. 62:47
Nerre
–, potassium currents in the giant axon of the crab *Carcinus maenas*, Quinta-Ferreira, M.E., Rojas, E., Arispe, N. 66:171
Nerve fibers
–, effects of calcium and lanthanum on phosphate efflux from nonmyelinated nerve fibers, Jirounek, P., Rouiller, M., Jones, G.J., Straub, R.W. 65:125
Net Flux
–, analysis of presteady-state Na^+ fluxes across the rabbit corneal endothelium, Lim, J.J., Ussing, H.H. 65:197
Neuraminidase
–, echinocyte formation induced by potential changes of human red blood cells, Glaser, R. 66:79
Node of Ranvier
–, conditioning prepulses and kinetics of potassium conductance in the frog node, de Bruin, G. 70:27
Noise analysis
–, noise analysis of the K^+ current through the apical membrane of *Necturus* gallbladder, Gögelein, H., Van Driessche, W. 63:243
–, potassium-induced insulin release and voltage noise measurements in single mouse islets of Langerhans, Dawson, C.M., Atwater, I., Rojas, E. 64:33
Nonactin
–, effects of variation of ion and methylation of carrier on the rate constants of macrotetralide-mediated ion transport in lipid bilayers, Laprade, R., Grenier, F., Lapointe, J.-Y., Asselin, S. 68:191
Nonelectrolyte permeability
–, general and transport properties of hypotonic and isotonic preparations of resealed erythrocyte ghosts, Jausel-Hüsken, S., Deuticke, B. 63:61
–, a simple technique of measuring high membrane permeabilities of human erythrocytes, Osberghaus, U., Schönert, H., Deuticke, B. 68:29
Nonionic diffusion
–, monocarboxylate transport in erythrocytes, Deuticke, B. 70:89
Nonlinear kinetics
–, current-voltage curve of electrogenic Cl^- pump predicts voltage-dependent Cl^- efflux in *Acetabularia*, Mummert, H., Hansen, U.-P., Gradmann, D. 62:139
Nonlinear models
–, transepithelial Na^+ transport and the intracellular fluids: a computer study, Civan, M.M., Bookman, R.J. 65:63
Nonstationary
–, the flux ratio equation under nonstationary conditions, Sten-Knudsen, O., Ussing, H.H. 63:233
Norepinephrine
–, effects of catecholamines on electrolyte transport in cortical collecting tubule, Iino, Y., Troy, J.L., Brenner, B.M. 61:67
–, hormonal regulation of junctional permeability: upregulation by catecholamine and prostaglandin E_1, Radu, A., Dahl, G., Loewenstein, W.R. 70:239
Nuclear magnetic resonance
–, effects of temperature and pH on the water exchange through erythrocyte membranes: nuclear magnetic resonance studies, Morariu, V.V., Pop, V.I., Popescu, O., Benga, G. 62:1
–, time dependence of the effect of *p*-chloromercuribenzoate on erythrocyte water permeability: a pulsed nuclear magnetic resonance study, Ashley, D.L., Goldstein, J.H. 61:199
Null-point
–, a method for estimating free Ca within human red blood cells, with an application to the study of their Ca-dependent K permeability, Simons, T.J.B. 66:235
Numerical model
–, steady states and the effects of ouabain in the *Necturus* gallbladder epithelium: a model analysis, Baerentsen, H.J., Christensen, O., Thomsen, P.G., Zeuthen, T. 68:215
Nystatin
–, noise analysis reveals K^+ channel fluctuations in the apical membrane of rabbit colon, Wills, N.K., Zeiske, W., van Driessche, W. 69:187
Occluding junctions
–, occluding junctions of the *Necturus* gallbladder, Cereijido, M., Stefani, E., Chávez de Ramirez, B. 70:15
Oocyte
–, progesterone-induced down-regulation of an electrogenic Na^+, K^+-ATPase during the first meiotic division in amphibian oocytes, Weinstein, S.P., Kostellow, A.B., Ziegler, D.H., Morrill, G.A. 69:41
Organic solutes
–, recycling of D-glucose in collagenous cuticle: a means of nutrient conservation, Gomme, J. 62:47
Osmolarity regulation
–, use of gene fusions to study bacterial transport proteins, Shuman, H.A. 61:1
Osmoregulation
–, ionic regulation of the unicellular green alga *Dunaliella tertiolecta*, Ehrenfeld, H., Cousin, J.-L. 70:47
–, turgor regulation in *Valonia macrophysa* following acute osmotic shock, Guggino, S., Gutknecht, J. 67:155
Osmotic water flow
–, effect of monensin on osmotic water flow across the toad bladder and its stimulation by vasopressin and cyclic AMP, Mendoza, S.A., Thomas, M.W. 67:99
Osmotic water permeability
–, effect of distension on ADH-induced osmotic water flow in toad urinary bladder, Kachadorian, W.A., Levine, S.D. 64:181
Ouabain
–, control of sodium permeability of the outer barrier in toad skin, Bevevino, L.H., Lacaz-Vieira, F. 66:97
–, effect of amiloride, ouabain, and Ba^{2+} on the nonsteady-state Na-K pump flux and short-circuit current in isolated frog skin epithelia, Nielsen, R. 65:227

–, effect of ouabain, amiloride, and antidiuretic hormone on the sodium-transport pool in isolated epithelia from frog skin (*Rana temporaria*), Nielsen, R. 65:221
–, K^+ transport in "tight" epithelial monolayers of MDCK cells, Aiton, J.F., Brown, C.D.A., Ogden, P., Simmons, N.L. 65:99
–, progesterone-induced down-regulation of an electrogenic Na^+, K^+-ATPase during the first meiotic division in amphibian oocytes, Weinstein, S.P., Kostellow, A.B., Ziegler, D.H., Morrill, G.A. 69:41
–, steady states and the effects of ouabain in the *Necturus* gallbladder epithelium: a model analysis, Baerentsen, H.J., Christensen, O., Thomsen, P.G., Zeuthen, T. 68:215
Ouabain-resistant
–, differentiation between serum stimulation of ouabain-resistant and sensitive Rb influx in quiescent NIH 3T3 cells, Panet, R., Fromer, I., Atlan, H. 70:165
Oxidative metabolism
–, time course of active Na transport and oxidative metabolism following transepithelial potential perturbation in toad urinary bladder, Rosenthal, S.J., King, J.G., Essig, A. 63:157
Oxidative phosphorylation
–, energy coupling to ATP synthesis by the proton-translocating ATPase, Maloney, P.C. 67:1
–, regulation of cellular energy metabolism, Erecińska, M., Wilson, D.F. 70:1
Oxygen consumption
–, the significance of changes in thermodynamic affinity induced by aldosterone in sodium-transporting epithelia, Beauwens, R., Beaujean, V., Crabbé, J. 68:11
Oxytocin
–, the role of sodium-channel density in the natriferic response of the toad urinary bladder to an antidiuretic hormone, Li, J.H.-Y., Palmer, L.G., Edelman, I.S., Lindemann, B. 64:77
^{31}P NMR
–, lipid-polyethylene glycol interactions: II. formation of defects in bilayers, Boni, L.T., Stewart, T.P., Alderfer, J.L., Hui, S.W. 62:71
Pacemaking mechanisms
–, comparison of the pacemaker properties of chick embryonic atrial and ventricular heart cells, Shrier, A., Clay, J.R. 69:49
Pancreas
–, calcium uptake into acini from rat pancreas: evidence for intracellular ATP-dependent calcium sequestration, Wakasugi, H., Kimura, T., Haase, W., Kribben, A., Kaufmann, R., Schulz, I. 65:205
Paracellular cation channels
–, single-file diffusion multi-ion mechanisms of permeation in paracellular epithelial channels, Salas, P.J.I., Moreno, J.H. 64:103
Paracellular conducting pathway
–, occluding junctions of the *Necturus* gallbladder, Cereijido, M., Stefani, E., Chávez de Ramirez, B. 70:15
Paracellular pathway
–, potassium transport across rabbit descending colon *in vitro*: evidence for single-file diffusion through a paracellular pathway, Fromm, M., Schultz, S.G. 63:93
–, transepithelial Na^+ transport and the intracellular fluids: a computer study, Civan, M.M., Bookman, R.J. 65:63
Parallel pathways
–, the electrophysiology of rabbit descending colon. II. current-voltage relations of the apical membrane, the basolateral membrane, and the parallel pathways, Thompson, S.M., Suzuki, Y., Schultz, S.G. 66:55
Parietal cells
–, morphometric analysis of parietal cell membrane transformations in isolated gastric glands, Gibert, A.J., Hersey, S.J. 67:113
Partition coefficients
–, correlation between lipid partition coefficients and surface permeation in *Schistosoma japonicum*, Cornford, E.M. 64:217
PCMB
–, time dependence of the effect of *p*-chloromercuribenzoate on erythrocyte water permeability: a pulsed nuclear magnetic resonance study, Ashley, D.L., Goldstein, J.H. 61:199
Pentagastrin
–, action of caerulein, gastrin 17, pentagastrin, and secretin on the active transport of sodium by the frog skin, Greenwell, J.R., Low, H.S. 61:91
Peptide synthesis
–, ion interactions in (1-^{13}C)D-val^8 and D-leu^{14} analogs from gramicidin A, the helix sense of the channel and location of ion binding sites, Urry, D.W., Walker, J.T., Trapane, T.L. 69:225
Permeability
–, barriers to water flow in vasopressin-treated toad urinary bladder, Levine, S.D., Kachadorian, W.A. 61:135
–, effect of anions on the cation selectivity of gramicidin-containing liposomes, Cohen, B.E. 68:79
Permeability control
–, electrolytes control flows of water across the apical barrier in toad skin: the hydrosmotic salt effect, Benedictis, E.M., Lacaz-Vieira, F. 67:125
Permeability regulation
–, control of sodium permeability of the outer barrier in toad skin, Bevevino, L.H., Lacaz-Vieira, F. 66:97
pH
–, effects of salicylate on HCO_3^-/Cl^- exchange across the human erythrocyte membrane, Crandall, E.D., Winter, H.I., Schaeffer, J.D., Bidani, A. 65:139
pH dependence
–, effects of temperature and pH on the water exchange through erythrocyte membranes: nuclear magnetic resonance studies, Morariu, V.V., Pop, V.I., Popescu, O., Benga, G. 62:1
pH gradient
–, stoichiometry of proton movements coupled to ATP synthesis driven by a pH gradient in *Streptococcus lactis*, Maloney, P.C., Hansen, F.C. III 66:63
Phagosomes
–, phagosomal membrane lipids of LM fibroblasts, Schroeder, F. 68:141
Phase separations
–, unsaturated fatty acid requirement in *Escherichia coli*: mechanism of palmitate-induced inhibition of growth of strain WNl, Ingram, L.O., Eaton, L.C., Erdos, G.W., Tedder, T.F., Vreeland, N.L. 65:31
Phase transition
–, morphology of the intermediate stages in the lamellar to hexagonal lipid phase transition, Borovjagin, V.L., Vergara, J.A., McIntosh, T.J. 69:199
Phenylalanine transport
–, multiple transport pathways for neutral amino acids in rabbit jejunal brush border vesicles, Stevens, B.R., Ross, H.J., Wright, E.M. 66:213
Phloretin
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Phlorizin
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Phlorizin binding
–, further studies of proximal tubular brush border membrane

D-glucose transport heterogeneity, Turner, R.J., Moran, A. 70:37
–, stoichiometric studies of the renal outer cortical brush border membrane D-glucose transporter, Turner, R.J., Moran, A. 67:73
–, transepithelial transport in cell culture: stoichiometry of Na/phlorizin binding and Na/D-glucose cotransport. A two-step, two-sodium model of binding and translocation, Misfeldt, D.S., Sanders, M.J. 70:191
Phosphate
–, effects of calcium and lanthanum on phosphate efflux from nonmyelinated nerve fibers, Jirounek, P., Rouiller, M., Jones, G.J., Straub, R.W. 65:125
Phosphate transport
–, phosphate transport in human red blood cells: concentration dependence and pH dependence of the unidirectional phosphate flux at equilibrium conditions, Schnell, K.F., Besl, E., v. der Mosel, R. 61:173
Phosphatidylethanolamine
–, effects of local anesthetics on phospholipid topology and dopamine uptake and release in rat brain synaptosomes, Bradford, P.G., Marinetti, G.V. 67:211
Phosphatidylinositol
–, cation ionophores A23187 and valinomycin enhance protein-mediated transfer of rat liver microsomal phosphatidylinositol to liposomes, Patumraj, K., Slaby, F. 70:105
Phosphatidylserine
–, effects of local anesthetics on phospholipid topology and dopamine uptake and release in rat brain synaptosomes, Bradford, P.G., Marinetti, G.V. 67:211
Phospholipase A_2
–, modulation of ATPase activities of human erythrocyte membranes by free fatty acids or phospholipase A_2, Schmalzing, G., Kutschera, P. 69:65
–, use of phospholipase A to compare phospholipid organization in synaptic membranes, myelin, and liposomes, Butler, M., Abood, L.G. 66:1
Phospholipase A_2 cofactors
–, use of phospholipase A to compare phospholipid organization in synaptic membranes, myelin, and liposomes, Butler, M., Abood, L.G. 66:1
Phospholipid exchange proteins
–, cation ionophores A23187 and valinomycin enhance protein-mediated transfer of rat liver microsomal phosphatidylinositol to liposomes, Patumraj, K., Slaby, F. 70:105
Phospholipid organization
–, use of phospholipase A to compare phospholipid organization in synaptic membranes, myelin, and liposomes, Butler, M., Abood, L.G. 66:1
Phospholipids
–, role of lipids in the *Neurospora crassa* membrane: IV. biochemical and electrophysiological changes caused by growth on phytanic acid, Friedman, K.J., Glick, D. 64:1
–, uptake of arachidonic acid into membrane phospholipids: effect on chloride transport across cornea, Schaeffer, B.E., Kanchuger, M.S., Razin, M., Zadunaisky, J.A. 69:177
Phosphorylated intermediate
–, ATP-dependent calcium transport by a Golgi-enriched membrane fraction from mouse mammary gland, Neville, M.C., Selker, F., Semple, K., Watters, C. 61:97
Photoeffects
–, bacteriorhodopsin-mediated photoelectric responses in lipid/water systems, Drachev, L.A., Kaulen, A.D., Skulachev, V.P., Voytsitsky, V.M. 61:1
Physarum polycephalum
–, electrical properties of the plasma membrane of microplasmodia of *Physarum polycephalum*, Fingerle, J., Gradmann, D. 68:67
Planar bilayer
–, K^+-selective, three-state channel from fragmented sarcoplasmic reticulum of frog leg muscle, Labarca, P.P., Miller, C. 61:31
Plant cells
–, separation of tonoplast and plasma membrane potential and resistance in cells of oat coleoptiles, Bates, G.W., Goldsmith, M.H.M., Goldsmith, T.H. 66:15
Plasmalemma
–, separation of tonoplast and plasma membrane potential and resistance in cells of oat coleoptiles, Bates, G.W., Goldsmith, M.H.M., Goldsmith, T.H. 66:15
Plasma membrane
–, amino acid-dependent sodium transport in plasma membrane vesicles from rat liver, Sips, H.J., van Dam, K. 62:231
–, hormonal effects on fatty acid binding and physical properties of rat liver plasma membranes, Schroeder, F. 68:1
–, phagosomal membrane lipids of LM fibroblasts, Schroeder, F. 68:141
Plasma membrane vesicles
–, two-compartment behavior during transport of folate compounds in L1210 cell plasma membrane vesicles, Yang, C.-H., Dembo, M., Sirotnak, F.M. 68:19
Polarization
–, rotation of cells in an alternating electric field: theory and experimental proof, Holzapfel, C., Vienken, J., Zimmermann, U. 67:13
Poly(A)(+)RNA
–, metabolism of poly(A)(+)RNA in toad bladder epithelial cells, Wilce, P.A. 62:163
Polychaeta (*Nereis diversicolor*)
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
–, recycling of D-glucose in collagenous cuticle: a means of nutrient conservation, Gomme, J. 62:47
Polyethylene glycol
–, lipid-polyethylene glycol interactions: I. induction of fusion between liposomes, Boni, L.T., Stewart, T.P., Alderfer, J.L., Hui, S.W. 62:65
–, lipid-polyethylene glycol interactions: II. formation of defects in bilayers, Boni, L.T., Stewart, T.P., Alderfer, J.L., Hui, S.W. 62:71
Polypeptide components
–, partial purification and characterization of $(Na^+ + K^+)$-ATPase from garfish olfactory nerve axon plasma membrane, Kracke, G.R., O'Neal, S.G., Chacko, G.K. 63:147
Pool size
–, effect of ouabain, amiloride, and antidiuretic hormone on the sodium-transport pool in isolated epithelia from frog skin (*Rana temporaria*), Nielsen, R. 65:221
Porins
–, use of gene fusions to study bacterial transport proteins, Shuman, H.A. 61:1
Potassium
–, active potassium transport by rabbit descending colon epithelium, Wills, N.K., Biagi, B. 64:195
–, outward sodium and potassium cotransport in human red cells, Garay, R., Adragna, N., Canessa, M., Tosteson, D. 62:169
Potassium accumulation
–, conditioning prepulses and kinetics of potassium conductance in the frog node, de Bruin, G. 70:27
Potassium channel
–, Ca-K bi-ionic action potential in squid giant axons, Terakawa, S. 63:41
–, K-current fluctuations in inward-rectifying channels of frog skeletal muscle, Schwarz, W., Neumcke, B., Palade, P.T. 63:85

–, K^+-selective, three-state channel from fragmented sarcoplasmic reticulum of frog leg muscle, Labarca, P.P., Miller, C. 61:31
–, noise analysis of the K^+ current through the apical membrane of *Necturus* gallbladder, Gögelein, H., Van Driessche, W. 63:243
–, noise analysis reveals K^+ channel fluctuations in the apical membrane of rabbit colon, Wills, N.K., Zeiske, W., van Driessche, W. 69:187
–, periaxonal surface calcium binding and distribution of charge on the faces of squid axon potassium channel molecules, Fohlmeister, J.F., Adelman, W.J. Jr. 70:115
–, periodic responses in squid axon membrane exposed intracellularly and extracellularly to solutions containing a single species of salt, Terakawa, S. 63:51
–, potassium currents in the giant axon of the crab *Carcinus maenas,* Quinta-Ferreira, M.E., Rojas, E., Arispe, N. 66:171
–, properties of sodium and potassium channels of the squid giant axon far below 0° C, Kukita, F. 68:151
Potassium conductance kinetics
–, conditioning prepulses and kinetics of potassium conductance in the frog node, de Bruin, G. 70:27
Potassium currents
–, pressure dependence of the potassium currents of squid giant axon, Conti, F., Fioravanti, R., Segal, J.R., Stühmer, W. 69:35
Potassium depletion
–, intracellular potential and K^+ activity in rat kidney proximal tubular cells in acidosis and K^+ depletion, Cemerikić, D., Wilcox, C.S., Giebisch, G. 69:159
Potassium efflux
–, the dual effect of rubidium ions on potassium efflux in depolarized frog skeletal muscle, Spalding, B.C., Swift, J.G., Senyk, O., Horowicz, P. 69:145
Potassium fluxes
–, active potassium transport by rabbit descending colon epithelium, Wills, N.K., Biagi, B. 64:195
–, K^+ transport in "tight" epithelial monolayers of MDCK cells, Aiton, J.F., Brown, C.D.A., Ogden, P., Simmons, N.L. 65:99
–, pressure and temperature effects on human red cell cation transport, Hall, A.C., Ellory, J.C., Klein, R.A. 68:47
Potassium gating
–, potassium currents in the giant axon of the crab *Carcinus maenas,* Quinta-Ferreira, M.E., Rojas, E., Arispe, N. 66:171
(Potassium + H^+)-ATPase
–, H^+/ATP stoichiometry for the gastric ($K^+ + H^+$)-ATPase, Reenstra, W.W., Forte, J.G. 61:55
Potassium inactivation
–, potassium currents in the giant axon of the crab *Carcinus maenas,* Quinta-Ferreira, M.E., Rojas, E., Arispe, N. 66:171
Potassium leakage
–, some properties of KCl-filled microelectrodes: correlation of potassium "leakage" with tip resistance, Fromm, M., Schultz, S.G. 62:239
Potassium permeability
–, electrophysiology of phagocytic membranes: induction of slow membrane hyperpolarizations in macrophages and macrophage polykaryons by intracellular calcium injection, Persechini, P.M., Araujo, E.G., Oliveira-Castro, G.M. 61:81
–, a method for estimating free Ca within human red blood cells, with an application to the study of their Ca-dependent K permeability, Simons, T.J.B. 66:235
Potassium-specific microelectrode
–, intracellular K^+ activities and cell membrane potentials in a K^+-transporting epithelium, the midgut of tobacco hornworm (*Manduca sexta*), Moffett, D.F., Hudson, R.L., Moffett, S.B., Ridgway, R.L. 70:59
Potassium transport
–, interaction of L antibody with low potassium-type sheep red cells: resolution of two separate functional antibodies, Smalley, C.E., Tucker, E.M., Dunham, P.B., Ellory, J.C. 64:167
–, potassium transport across frog retinal pigment epithelium, Miller, S.S., Steinberg, R.H. 67:199
–, potassium transport across rabbit descending colon *in vitro:* evidence for single-file diffusion through a paracellular pathway, Fromm, M., Schultz, S.G. 63:93
–, potassium transport and intracellular potassium activities in rabbit gallbladder, Gunter-Smith, P.J., Schultz, S.G. 65:41
–, regulation of passive potassium transport of normal and transformed 3T3 mouse cell cultures by external calcium concentration and temperature, Ernst, M., Adam, G. 61:155
–, use of gene fusions to study bacterial transport proteins, Shuman, H.A. 61:1
Potential-sensitive dyes
–, the mechanism of voltage-sensitive dye responses on sarcoplasmic reticulum, Beeler, T.J., Farmen, R.H., Martonosi, A.N. 62:113
Power density spectrum
–, fluctuation analysis of short-circuit current in a warm-blooded sodium-retaining epithelium: site current, density, and interaction with triamterene, Christensen, O., Bindslev, N. 65:19
Presteady-state fluxes
–, analysis of presteady-state Na^+ fluxes across the rabbit corneal endothelium, Lim, J.J., Ussing, H.H. 65:197
Presynaptic nerve terminals
–, GABA efflux from synaptosomes: effects of membrane potential, and external GABA and cations, Nelson, M.T., Blaustein, M.P. 69:213
Progesterone
–, progesterone-induced down-regulation of an electrogenic Na^+, K^+-ATPase during the first meiotic division in amphibian oocytes, Weinstein, S.P., Kostellow, A.B., Ziegler, D.H., Morrill, G.A. 69:41
Proline transport
–, multiple transport pathways for neutral amino acids in rabbit jejunal brush border vesicles, Stevens, B.R., Ross, H.J., Wright, E.M. 66:213
Promotion of cell-to-cell membrane channels
–, cell junction and cyclic AMP: III. promotion of junctional membrane permeability and junctional membrane particles in a junction-deficient cell type, Azarnia, R., Dahl, G., Loewenstein, W.R. 63:133
Propagation
–, small signal impedance of heart cell membranes, Clapham, D.E., DeFelice, L.J. 67:63
Propylthiouracil
–, hormonal effects on fatty acid binding and physical properties of rat liver plasma membranes, Schroeder, F. 68:1
Prostaglandins
–, chloride secretion by canine tracheal epithelium: I. role of intracellular cAMP levels, Smith, P.L., Welsh, M.J., Stoff, J.S., Frizzell, R.A. 70:217
–, hormonal regulation of junctional permeability: upregulation by catecholamine and prostaglandin E_1, Radu, A., Dahl, G., Loewenstein, W.R. 70:239
–, uptake of arachidonic acid into membrane phospholipids: effect on chloride transport across cornea, Schaeffer, B.E., Kanchuger, M.S., Razin, M., Zadunaisky, J.A. 69:177
Protein-induced channels
–, protein interactions with lipid bilayers: the channels of kidney plasma membrane proteolipids, Tosteson, M.T., Sapirstein, V.S. 63:77

Proteolipids
–, protein interactions with lipid bilayers: the channels of kidney plasma membrane proteolipids, Tosteson, M.T., Sapirstein, V.S. 63:77
Proton, *see also entries under* H^+
Proton pump
–, bacteriorhodopsin-mediated photoelectric responses in lipid/water systems, Drachev, L.A., Kaulen, A.D., Skulachev, V.P., Voytsitsky, V.M. 65:1
–, electrogenic proton transport in epithelial membranes, Steinmetz, P.R., Andersen, O.S. 65:155
–, the proton gradient across the vacuo-lysosomal membrane of lutoids from the latex of *Hevea brasiliensis*. I. further evidence for a proton-translocating ATPase on the vacuo-lysosomal membrane of intact lutoids, Cretin, H. 65:175
Proton-translocating ATPase
–, energy coupling to ATP synthesis by the proton-translocating ATPase, Maloney, P.C. 67:1
–, stoichiometry of proton movements coupled to ATP synthesis driven by a pH gradient in *Streptococcus lactis,* Maloney, P.C., Hansen, F.C. III 66:63
Proton transport
–, H^+/ATP stoichiometry for the gastric $(K^+ + H^+)$-ATPase, Reenstra, W.W., Forte, J.G. 61:55
–, proton-/hydroxyl transport in gastric and intestinal epithelia, Sachs, G., Faller, L.D., Rabon, E. 64:123
Proton well
–, energy coupling to ATP synthesis by the proton-translocating ATPase, Maloney, P.C. 67:1
Protoplasts
–, rotation of cells in an alternating electric field: theory and experimental proof, Holzapfel, C., Vienken, J., Zimmermann, U. 67:13
Proximal tubule
–, cellular and paracellular resistances of the *Necturus* proximal tubule, Guggino, W.B., Windhager, E.E., Boulpaep, E.L., Giebisch, G. 67:143
–, chloride distribution in the proximal convoluted tubule of *Necturus* kidney, Edelman, A., Bouthier, M., Anagnostopoulos, T. 62:7
–, electrical properties of chloride transport across the *Necturus* proximal tubule, Guggino, W.B., Boulpaep, E.L., Giebisch, G. 65:185
–, further studies of proximal tubular brush border membrane D-glucose transport heterogeneity, Turner, R.J., Moran, A. 70:37
Proximal tubule microperfusion
–, dependence of water movement on sodium transport in kidney proximal tubule: a microperfusion study substituting lithium for sodium, Corman, B., Roinel, N., de Rouffignac, C. 62:105
Pump-leak
–, pump-leak sodium fluxes in low salt corn roots, Cheeseman, J.M. 70:157
Quantitative light microscopy
–, epithelial cell volume modulation and regulation, Spring, K.-K., Ericson, A.-C. 69:167
Rabbit
–, effects of catecholamines on electrolyte transport in cortical collecting tubule, Iino, Y., Troy, J.L., Brenner, B.M. 61:67
Rabbit cornea
–, effects of Ag^+ on ion transport by corneal epithelium of the rabbit, Klyce, S.D., Marshall, W.S. 66:133
Rabbit gallbladder
–, potassium transport and intracellular potassium activities in rabbit gallbladder, Gunter-Smith, P.J., Schultz, S.G. 65:41
Rabbit ileum
–, active sulfate absorption in rabbit ileum: dependence on sodium and chloride and effects of agents that alter chloride transport, Smith, P.L., Orellana, S.A., Field, M. 63:199
–, sulfate transport in rabbit ileum: characterization of the serosal border anion exchange process, Langridge-Smith, J.E., Field, M. 63:207
Rabbit urinary bladder
–, active and passive Na^+ fluxes across the basolateral membrane of rabbit urinary bladder, Eaton, D.C., Frace, A.M., Silverthorn, S.U. 67:219
Radio-frequency bioeffects
–, radio-frequency bioeffects at the membrane level: separation of thermal and athermal contributions in the Characeae, Pickard, W.F., Barsoum, Y.H. 61:39
–, radio-frequency rectification in electrogenic and nonelectrogenic cells of *Chara* and *Nitella,* Barsoum, Y.H., Pickard, W.F. 65:81
Rat kidney
–, dependence of water movement on sodium transport in kidney proximal tubule: a microperfusion study substituting lithium for sodium, Corman, B., Roinel, N., de Rouffignac, C. 62:105
Rat liver
–, amino acid-dependent sodium transport in plasma membrane vesicles from rat liver, Sips, H.J., van Dam, K. 62:231
Rb, *see entries under* Rubidium
Rectification
–, radio-frequency bioeffects at the membrane level: separation of thermal and athermal contributions in the Characeae, Pickard, W.F., Barsoum, Y.H. 61:39
–, radio-frequency rectification in electrogenic and nonelectrogenic cells of *Chara* and *Nitella,* Barsoum, Y.H., Pickard, W.F. 65:81
Recycling
–, recycling of D-glucose in collagenous cuticle: a means of nutrient conservation, Gomme, J. 62:47
Red blood cell, *see entries under* Erythrocyte
Reduced kinetic model
–, interpretation of current-voltage relationships for "active" ion transport systems: I. steady-state reaction-kinetic analysis of class-I mechanisms, Hansen, U.-P., Gradmann, D., Sanders, D., Slayman, C.L. 63:165
Refsum's disease
–, role of lipids in the *Neurospora crassa* membrane: IV. biochemical and electrophysiological changes caused by growth on phytanic acid, Friedman, K.J., Glick, D. 64:1
Relaxation analysis
–, conditioning prepulses and kinetics of potassium conductance in the frog node, de Bruin, G. 70:27
Relaxation times
–, dielectric relaxation studies of ionic processes in lysolecithin-packed gramicidin channels, Henze, R., Neher, E., Trapane, T.O., Urry, D.W. 64:233
Renal brush border membranes
–, partial purification of the Na^+-dependent D-glucose transport system from renal brush border membranes, Im, W.B., Ling, K.Y., Faust, R.G. 65:131
Renal brush-border membrane vesicles
–, an ATP-driven proton pump in brush-border membranes from rat renal cortex, Kinne-Saffran, E., Beauwens, R., Kinne, R. 64:67
Renal proximal tubule
–, intracellular potential and K^+ activity in rat kidney proximal tubular cells in acidosis and K^+ depletion, Cemerikić, D., Wilcox, C.S., Giebisch, G. 69:159
Renal transport
–, chloride distribution in the proximal convoluted tubule of *Necturus* kidney, Edelman, A., Bouthier, M., Anagnostopoulos, T. 62:7

Renal tubule
–, role of luminal buffers in renal tubular acidification, Costa Silva, V.L., Campiglia, S.S., de Mello Aires, M., Malnic, G., Giebisch, G. 63:13
Respiratory acidosis
–, intracellular potential and K^+ activity in rat kidney proximal tubular cells in acidosis and K^+ depletion, Cemerikić, D., Wilcox, C.S., Giebisch, G. 69:159
Retinal
–, bacteriorhodopsin-mediated photoelectric responses in lipid/water systems, Drachev, L.A., Kaulen, A.D., Skulachev, V.P., Voytsitsky, V.M. 61:1
Retinal pigment epithelium
–, potassium transport across the frog retinal pigment epithelium, Miller, S.S., Steinberg, R.H. 67:199
Ricin agglutinin
–, threshold effects on the lectin-mediated aggregation of liposomes: influence of the diameter of the liposomes, Alecio, M.R., Rando, R.R. 67:137
Ricinoleate
–, ricinoleate and deoxycholate are calcium ionophores in jejunal brush border vesicles, Maenz, D.D., Forsyth, G.W. 70:125
RNA metabolism
–, metabolism of poly(A)(+)RNA in toad bladder epithelial cells, Wilce, P.A. 62:163
Roots
–, pump-leak sodium fluxes in low salt corn roots, Cheeseman, J.M. 70:157
Rubidium
–, the dual effect of rubidium ions on potassium efflux in depolarized frog skeletal muscle, Spalding, B.C., Swift, J.G., Senyk, O., Horowicz, P. 69:145
–, measurement of membrane potential in *Bacillus subtilis:* a comparison of lipophilic cations, rubidium ion, and a cyanine dye as probes, Zaritsky, A., Kihara, M., Macnab, R.M. 63:215
Rubidium-influx
–, differentiation between serum stimulation of ouabain-resistant and sensitive Rb influx in quiescent NIH 3T3 cells, Panet, R., Fromer, I., Atlan, H. 70:165
Ruthenium red
–, mechanism of calcium release from skeletal sarcoplasmic reticulum, Miyamoto, H., Racker, E. 66:193
Salicylate
–, effect of anions on the cation selectivity of gramicidin-containing liposomes, Cohen, B.E. 68:79
–, effects of salicylate on HCO_3^-/Cl^- exchange across the human erythrocyte membrane, Crandall, E.D., Winter, H.I., Schaeffer, J.D., Bidani, A. 65:139
Salinity-dependence of transport
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor,* Gomme, J. 62:29
Salt transport
–, epithelial cell volume modulation and regulation, Spring, K.R., Ericson, A.-C. 69:167
Sanguinarine
–, effects of the plant alkaloid sanguinarine on cation transport by human red blood cells and lipid bilayer membranes, Cala, P.M., Nørby, J.G., Tosteson, D.C. 64:23
Saponin
–, calcium uptake into acini from rat pancreas: evidence for intracellular ATP-dependent calcium sequestration, Wakasugi, H., Kimura, T., Haase, W., Kribben, A., Kaufmann, R., Schulz, I. 65:205
Sarcolemmal vesicles
–, sodium-calcium ion exchange in skeletal muscle sarcolemmal vesicles, Gilbert, J.R., Meissner, G. 69:77
Sarcoplasmic reticulum
–, carbon dioxide or bicarbonate ions release Ca^{2+} from internal stores in crustacean myofibrillar bundles, Lea, T.J., Ashley, C.C. 61:115
–, disruption of energy transduction in sarcoplasmic reticulum by trypsin cleavage of $(Ca^{2+} + Mg^{2+})$-ATPase, Scott, T.L., Shamoo, A.E. 64:137
–, K^+-selective, three-state channel from fragmented sarcoplasmic reticulum of frog leg muscle, Labarca, P.P., Miller, C. 61:31
–, mechanism of calcium release from skeletal sarcoplasmic reticulum, Miyamoto, H., Racker, E. 66:193
–, the mechanism of voltage-sensitive dye responses on sarcoplasmic reticulum, Beeler, T.J., Farmen, R.H., Martonosi, A.N. 62:113
Scanning electron microscopy
–, time course of vasopressin-induced formation of microvilli in granular cells of toad urinary bladder, Le Furgey, A., Tisher, C.C. 61:13
Schistosomal membrane permeability
–, correlation between lipid partition coefficients and surface permeation in *Schistosoma japonicum,* Cornford, E.M. 64:217
Schistosoma mansoni
–, ^{3}HOH-osmotic water fluxes and ultrastructure of an epithelial syncytium, Brodie, D.A., Podesta, R.B. 61:107
Secretagogues
–, calcium uptake into acini from rat pancreas: evidence for intracellular ATP-dependent calcium sequestration, Wakasugi, H., Kimura, T., Haase, W., Kribben, A., Kaufmann, R., Schulz, I. 65:205
–, chloride secretion by canine tracheal epithelium: I. role of intracellular cAMP levels, Smith, P.L., Welsh, M.J., Stoff, J.S., Frizzell, R.A. 70:217
–, chloride secretion by canine tracheal epithelium: II. the cellular electrical potential profile, Welsh, M.J., Smith, P.L., Frizzell, R.A. 70:227
Secretin
–, action of caerulein, gastrin 17, pentagastrin, and secretin on the active transport of sodium by the frog skin, Greenwell, J.R., Low, H.S. 61:91
Selective microelectrodes
–, chloride distribution in the proximal convoluted tubule of *Necturus* kidney, Edelman, A., Bouthier, M., Anagnostopoulos, T. 62:7
Selective sites
–, phagosomal membrane lipids of LM fibroblasts, Schroeder, F. 68:141
Selectivity
–, ionic permeation of lipid bilayer membranes mediated by a neutral, noncyclic Li^+-selective carrier having imide and ether ligands. I. selectivity among monovalent cations, Margalit, R., Eisenman, G. 61:209
Sequence homology
–, primary structure of horse erythrocyte glycophorin HA. Its amino acid sequence has a unique homology with those of human and porcine erythrocyte glycophorins, Murayama, J.-I., Tomita, M., Hamada, A. 64:205
Series barriers
–, barriers to water flow in vasopressin-treated toad urinary bladder, Levine, S.D., Kachadorian, W.A. 61:135
Serosal potassium
–, transepithelial Na^+ transport and the intracellular fluids: a computer study, Civan, M.M., Bookman, R.J. 65:63
Serum
–, cell junction and cyclic AMP: II. modulations of junctional membrane permeability, dependent on serum and cell density, Flagg-Newton, J.L., Loewenstein, W.R. 63:123

Serum-stimulation
–, differentiation between serum stimulation of ouabain-resistant and sensitive Rb influx in quiescent NIH 3T3 cells, Panet, R., Fromer, I., Atlan, H. 70:165
Shape
–, role of the bilayer in the shape of the isolated erythrocyte membrane, Lange, Y., Gough, A., Steck, T.L. 69:113
Sheep red cells
–, interaction of L antibody with low potassium-type sheep red cells: resolution of two separate functional antibodies, Smalley, C.E., Tucker, E.M., Dunham, P.B., Ellory, J.C. 64:167
Short-chain fatty acids
–, stimulation of gallbladder fluid and electrolyte absorption by butyrate, Peterson, K.-U., Wood, J.R., Schulze, G., Heintze, K. 62:183
Short-circuit current
–, chloride secretion by canine tracheal epithelium: I. role of intracellular cAMP levels, Smith, P.L., Welsh, M.J., Stoff, J.S., Frizzell, R.A. 70:217
–, miniature Ag-AgCl electrode for voltage clamping of the *Ambystoma* collecting duct, Delaney, R., Stoner, L.C. 64:45
Silver ion
–, effects of Ag^+ on ion transport by the corneal epithelium of the rabbit, Klyce, S.D., Marshall, W.S. 66:133
Silver selectivity
–, ionic permeation of lipid bilayer membranes mediated by a neutral, noncyclic Li^+-selective carrier having imide and ether ligands. I. selectivity among monovalent cations, Margalit, R., Eisenman, G. 61:209
Single-channel conductance
–, K-current fluctuations in inward-rectifying channels of frog skeletal muscle, Schwarz, W., Neumcke, B., Palade, P.T. 63:85
Single-file diffusion
–, potassium transport across rabbit descending colon *in vitro:* evidence for single-file diffusion through a paracellular pathway, Fromm, M., Schultz, S.G. 63:93
–, single-file diffusion multi-ion mechanisms of permeation in paracellular epithelial channels, Salas, P.J.I., Moreno, J.H. 64:103
β-Sitosterol
–, role of lipids in the *Neurospora crassa* membrane: IV. biochemical and electrophysiological changes caused by growth on phytanic acid, Friedman, K.J., Glick, D. 64:1
Skeletal muscle
–, effect of chloride withdrawal on the geometry of the T-tubules in amphibian and mammalian muscle, Dulhunty, A. 67:81
–, K-current fluctuations in inward-rectifying channels of frog skeletal muscle, Schwarz, W., Neumcke, B., Palade, P.T. 63:85
–, sodium-calcium ion exchange in skeletal muscle sarcolemmal vesicles, Gilbert, J.R., Meissner, G. 69:77
Slow hyperpolarization
–, electrophysiology of phagocytic membranes: induction of slow membrane hyperpolarizations in macrophages and macrophage polykaryons by intracellular calcium injection, Persechini, P.M., Araujo, E.G., Oliveira-Castro, G.M. 61:81
Small intestinal transport
–, multiple transport pathways for neutral amino acids in rabbit jejunal brush border vesicles, Stevens, B.R., Ross, H.J., Wright, E.M. 66:213
Small intestine
–, Ca^{2+}-transport across basal-lateral plasma membranes from rat small intestinal epithelial cells, Hildmann, B., Schmidt, A., Murer, H. 65:55
Smooth muscle
–, effects of Na readmission on cellular ^{45}Ca fluxes in Na-depleted guinea pig taenia coli, Aaronson, P., van Breeman, C. 65:89
Sodium
–, intestinal HCO_3^- secretion in *Amphiuma:* stimulation by mucosal Cl^- and serosal Na^+, White, J.F., Imon, M.A. 68:207
–, outward sodium and potassium cotransport in human red cells, Garay, R., Adragna, N., Canessa, M., Tosteson, D. 62:169
–, pump-leak sodium fluxes in low salt corn roots, Cheeseman, J.M. 70:157
Sodium-calcium ion exchange
–, Ca^{2+}-transport across basal-lateral plasma membranes from rat small intestinal epithelial cells, Hildmann, B., Schmidt, A., Murer, H. 65:55
–, effect of sodium on cellular calcium transport in rat kidney, Borle, A.B. 66:183
–, effects of Na readmission on cellular ^{45}Ca fluxes in Na-depleted guinea pig taenia coli, Aaronson, P., van Breeman, C. 65:89
–, sodium-calcium ion exchange in skeletal muscle sarcolemmal vesicles, Gilbert, J.R., Meissner, G. 69:77
Sodium-channel density
–, aldosterone control of the density of sodium channels in the toad urinary bladder, Palmer, L.G., Li, J.H.-Y., Lindemann, B., Edelman, I.S. 64:91
–, the role of sodium-channel density in the natriferic response of the toad urinary bladder to an antidiuretic hormone, Li, J.H.-Y., Palmer, L.G., Edelman, I.S., Lindemann, B. 64:77
Sodium channel gating
–, sodium currents in the giant axon of the crab *Carcinus maenas,* Quinta-Ferreira, M.E., Arispe, N., Rojas, E. 66:159
Sodium channels
–, control of sodium permeability of the outer barrier in toad skin, Bevevino, L.H., Lacaz-Vieira, F. 66:97
–, interaction of spin-labeled local anesthetics with the sodium channel of squid axon membranes, Wang, H.H., Yeh, J.Z., Narahashi, T. 66:227
–, ion selectivity of the apical membrane Na channel in the toad urinary bladder, Palmer, L.G. 67:91
–, properties of sodium and potassium channels of the squid giant axon far below 0° C, Kukita, F. 68:151
–, sodium currents in the giant axon of the crab *Carcinus maenas,* Quinta-Ferreira, M.E., Arispe, N., Rojas, E. 66:159
Sodium chloride absorption
–, effects of bicarbonate on fluid and electrolyte transport by guinea pig and rabbit gallbladder: stimulation of absorption, Heintze, K., Peterson, K.-U., Wood, J.R. 62:175
–, stimulation of gallbladder fluid and electrolyte absorption by butyrate, Peterson, K.-U., Wood, J.R., Schulze, G., Heintze, K. 62:183
Sodium conductances
–, relationship of transepithelial electrical potential to membrane potentials and conductance ratios in frog skin, Nagel, W., Essig, A. 69:125
–, sodium currents in the giant axon of the crab *Carcinus maenas,* Quinta-Ferreira, M.E., Arispe, N., Rojas, E. 66:159
Sodium co-transport
–, amino acid active transport and stimulation by substrates in the absence of a Na^+ electrochemical potential gradient, Heinz, A., Jackson, J.W., Richey, B.E., Sachs, G., Schafer, J.A. 62:149
–, delineation of sodium-stimulated amino acid transport pathways in rabbit kidney brush border vesicles, Mircheff, A.K., Kippen, I., Hirayama, B., Wright, E.M. 64:113

Sodium-coupled transport
–, sodium-coupled amino acid and sugar transport by *Necturus* small intestine, Gunter-Smith, P.J., Grasset, E., Schultz, S.G. 66:25
Sodium currents
–, pressure dependence of the sodium currents of squid giant axon, Conti, F., Fioravanti, R., Segal, J.R., Stühmer, W. 69:23
Sodium dependence
–, active sulfate absorption in rabbit ileum: dependence on sodium and chloride and effects of agents that alter chloride transport, Smith, P.L., Orellana, S.A., Field, M. 63:199
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
Sodium-dependent transport
–, partial purification of the Na^+-dependent D-glucose transport system from renal brush border membranes, Im, W.B., Ling, K.Y., Faust, R.G. 65:131
Sodium-electrochemical potential gradient
–, amino acid active transport and stimulation by substrates in the absence of a Na^+ electrochemical potential gradient, Heinz, A., Jackson, J.W., Richey, B.E., Sachs, G., Schafer, J.A. 62:149
Sodium entry
–, the electrophysiology of rabbit descending colon. I. instantaneous transepithelial current-voltage relations and the current-voltage relations of the Na-entry mechanism, Thompson, S.M., Suzuki, Y., Schultz, S.G. 66:41
Sodium flux
–, active and passive Na^+ fluxes across the basolateral membrane of rabbit urinary bladder, Eaton, D.C., Frace, A.M., Silverthorn, S.U. 67:219
–, dependence of water movement on sodium transport in kidney proximal tubule: a microperfusion study substituting lithium for sodium, Corman, B., Roindl, N., de Rouffignac, C. 62:105
–, effect of amiloride, ouabain, and Ba^{2+} on the nonsteady-state Na-K pump flux and short-circuit current in isolated frog skin epithelia, Nielsen, R. 65:227
Sodium-GABA co-transport
–, GABA efflux from synaptosomes: effects of membrane potential, and external GABA and cations, Nelson, M.T., Blaustein, M.P. 69:213
Sodium gradient
–, transepithelial transport in cell culture: stoichiometry of Na/phlorizin binding and Na/D-glucose cotransport. A two-step, two-sodium model of binding and translocation, Misfeldt, D.S., Sanders, M.J. 70:191
Sodium/H-exchange
–, effects of bicarbonate on fluid and electrolyte transport by guinea pig and rabbit gallbladder: stimulation of absorption, Heintze, K., Peterson, K.-U., Wood, J.R. 62:175
–, stimulation of gallbladder fluid and electrolyte absorption by butyrate, Peterson, K.-U., Wood, J.R., Schulze, G., Heintze, K. 62:183
Sodium + K^+ + Cl^- cotransport
–, K^+ transport in "tight" epithelial monolayers of MDCK cells, Aiton, J.F., Brown, C.D.A., Ogden, P., Simmons, N.L. 65:99
Sodium-K-ATPase
–, active and passive Na^+ fluxes across the basolateral membrane of rabbit urinary bladder, Eaton, D.C., Frace, A.M., Silverthorn, S.U. 67:219
–, characteristics of antibodies to guinea pig ($Na^+ + K^+$)-adenosine triphosphatase and their use in cell-free synthesis studies, McDonough, A.A., Hiatt, A., Edelman, I.S. 69:13
–, partial purification and characterization of ($Na^+ + K^+$)-ATPase from garfish olfactory nerve axon plasma membrane, Kracke, G.R., O'Neal, S.G., Chacko, G.K. 63:147
Na^+, K^+-ATPase
–, progesterone-induced down-regulation of an electrogenic Na^+, K^+-ATPase during the first meiotic division in amphibian oocytes, Weinstein, S.P., Kostellow, A.B., Ziegler, D.H., Morrill, G.A. 69:41
Sodium/K exchange
–, ionic regulation of the unicellular green alga *Dunaliella tertiolecta*, Ehrenfeld, H., Cousin, J.-L. 70:47
Sodium/K pumps
–, potassium transport across the frog retinal pigment epithelium, Miller, S.S., Steinberg, R.H. 67:199
–, transport of electrolytes in muscle, Sjodin, R.A. 68:161
Sodium permeability
–, control of sodium permeability of the outer barrier in toad skin, Bevevino, L.H., Lacaz-Vieira, F. 66:97
Sodium-site density
–, fluctuation analysis of short-circuit current in a warm-blooded sodium-retaining epithelium: site current, density, and interaction with triamterene, Christensen, O., Bindslev, N. 65:19
Sodium substitution
–, effects of Na readmission on cellular ^{45}Ca fluxes in Na-depleted guinea pig taenia coli, Aaronson, P., van Breeman, C. 65:89
Sodium transport
–, active and passive Na^+ fluxes across the basolateral membrane of rabbit urinary bladder, Eaton, D.C., Frace, A.M., Silverthorn, S.U. 67:219
–, alpha and beta adrenergic agonists stimulate water absorption in the rat proximal tubule, Weinman, E.J., Sansom, S.C., Knight, T.F., Senekjian, H.O. 69:107
–, amino acid-dependent sodium transport in plasma membrane vesicles from rat liver, Sips, H.J., van Dam, K. 62:231
–, metabolism of poly(A)(+)RNA in toad bladder epithelial cells, Wilce, P.A. 62:163
–, serosal Na/Ca exchange and H^+ and Na^+ transport by the turtle and toad bladders, Arruda, J.A.L., Sabatini, S., Westerfelder, C. 70:135
–, the significance of changes in thermodynamic affinity induced by aldosterone in sodium-transporting epithelia, Beauwens, R., Beaujean, V., Crabbé, J. 68:11
–, sulfatide role in the sodium pump, Zambrano, F., Morales, M., Fuentes, N., Rojas, M. 63:71
–, transepithelial Na^+ transport and the intracellular fluids: a computer study, Civan, M.M., Bookman, R.J. 65:63
Spin label
–, interaction of spin-labeled local anesthetics with the sodium channel of squid axon membranes, Wang, H.H., Yeh, J.Z., Narahashi, T. 66:227
Spin-labeled liposomes
–, preparation and properties of spin-labeled lecithin-cholesterol liposomes, Dresdner, G. 64:145
Squid axon
–, Ca-K bi-ionic action potential in squid giant axons, Terakawa, S. 63:41
–, interaction of spin-labeled local anesthetics with the sodium channel of squid axon membranes, Wang, H.H., Yeh, J.Z., Narahashi, T. 66:227
–, lipid vesicle-mediated alterations of membrane cholesterol levels: effects of Na^+ and K^+ currents in squid axon, Steele, J.A., Poznansky, M.J., Eaton, D.C., Brodwick, M.S. 63:191
–, periodic responses in squid axon membrane exposed intracellularly and extracellularly to solutions containing a single species of salt, Terakawa, S. 63:51

Squid giant axon
–, properties of sodium and potassium channels of the squid giant axon far below 0° C, Kukita, F. 68:151
Steady states
–, steady states and the effects of ouabain in the *Necturus* gallbladder epithelium: a model analysis, Baerentsen, H.J., Christensen, O., Thomsen, P.G., Zeuthen, T. 68:215
Stern's theory
–, surface charges on the outer side of mollusc neuron membrane, Kostyuk, P.G., Mironov, S.L., Doroshenko, P.A., Ponomarev, V.N. 70:171
Sterols
–, role of lipids in the *Neurospora crassa* membrane: IV. biochemical and electrophysiological changes caused by growth on phytanic acid, Friedman, K.J., Glick, D. 64:1
Stilbene
–, the external anion binding site of the human erythrocyte anion transporter: DNDS binding and competition with chloride, Fröhlich, O. 65:111
Stoichiometry
–, stoichiometric studies of the renal outer cortical brush border membrane D-glucose transporter, Turner, R.J., Moran, A. 67:73
–, stoichiometry of proton movements coupled to ATP synthesis driven by a pH gradient in *Streptococcus lactis*, Maloney, P.C., Hansen, F.C. III 66:63
–, transepithelial transport in cell culture: stoichiometry of Na/phlorizin binding and Na/D-glucose cotransport. A two-step, two sodium model of binding and translocation, Misfeldt, D.S., Sanders, M.J. 70:191
Structure-activity relationship
–, transport of benzenesulfonic acid derivatives through the rat erythrocyte membrane, Kitagawa, S., Terada, H., Kametani, F. 65:49
Substrate complex
–, reaction of internal forms of the choline carrier of erythrocytes with N-ethylmaleimide: evidence for a carrier conformational change on complex formation, Devés, R., Krupka, R.M. 63:99
Sulfate transport
–, active sulfate absorption in rabbit ileum: dependence on sodium and chloride and effects of agents that alter chloride transport, Smith, P.L., Orellana, S.A., Field, M. 63:199
–, sulfate transport in rabbit ileum: characterization of the serosal border anion exchange process, Langridge-Smith, J.E., Field, M. 63:207
Sulfatide
–, sulfatide role in the sodium pump, Zambrano, F., Morales, M., Fuentes, N., Rojas, M. 63:71
Surface charge
–, charge clusters and the orientation of membrane proteins, Weinstein, J.N., Blumenthal, R., van Renswoude, J., Kempf, C., Klausner, R.D. 66:203
–, modulation of ATPase activities of human erythrocyte membranes by free fatty acids or phospholipase A_2, Schmalzing, G., Kutschera, P. 69:65
–, periaxonal surface calcium binding and distribution of charge on the faces of squid axon potassium channel molecules, Fohlmeister, J.F., Adelman, W.J. Jr. 70:115
Surface charge model
–, comparison of the action of La^{3+} and Ca^{2+} on contraction threshold and other membrane parameters of frog skeletal muscle, Dörrscheidt-Käfer, M. 62:95
Surface potential
–, charge clusters and the orientation of membrane proteins, Weinstein, J.N., Blumenthal, R., van Renswoude, J., Kempf, C., Klausner, R.D. 66:203
–, the mechanism of voltage-sensitive dye responses on sarcoplasmic reticulum, Beeler, T.J., Farmen, R.H., Martonosi, A.N. 62:113
–, periaxonal surface calcium binding and distribution of charge on the faces of squid axon potassium channel molecules, Fohlmeister, J.F., Adelman, W.J. Jr. 70:115
–, surface charges on the outer side of mollusc neuron membrane, Kostyuk, P.G., Mironov, S.L., Doroshenko, P.A. 70:171
Synaptic membrane phospholipids
–, use of phospholipase A to compare phospholipid organization in synaptic membranes, myelin, and liposomes, Butler, M., Abood, L.G. 66:1
Synaptosomes
–, effects of local anesthetics on phospholipid topology and dopamine uptake and release in rat brain synaptosomes, Bradford, P.G., Marinetti, G.V. 67:211
–, GABA efflux from synaptosomes: effects of membrane potential, and external GABA and cations, Nelson, M.T., Blaustein, M.P. 69:213
Syncytial integument
–, correlation between lipid partition coefficients and surface permeation in *Schistosoma japonicum*, Cornford, E.M. 64:217
TEA
–, noise analysis reveals K^+ channel fluctuations in the apical membrane of rabbit colon, Wills, N.K., Zeiske, W., van Driessche, W. 69:187
Temperature
–, pressure dependence of the sodium currents of squid giant axon, Conti, F., Fioravanti, R., Segal, J.R., Stühmer, W. 69:23
Temperature adaptation
–, unsaturated fatty acid requirement in *Escherichia coli*: mechanism of palmitate-induced inhibition of growth of strain WNl, Ingram, L.O., Eaton, L.C., Erdos, G.W., Tedder, T.F., Vreeland, N.L. 65:31
Temperature dependence
–, effects of temperature and pH on the water exchange through erythrocyte membranes: nuclear magnetic resonance studies, Morariu, V.V., Pop, V.I., Popescu, O., Benga, G. 62:1
Tetanus toxin
–, role of membrane gangliosides in the binding and action of bacterial toxins, Fishman, P.H. 69:85
Thallium transport
–, thallium interaction with the gastric (K,H)-ATPase, Rabon, E.C., Sachs, G. 62:19
Theophylline
–, enhanced sensitivity to stimulation of sodium transport and cyclic AMP by antidiuretic hormone after Ca^{2+} depletion of isolated frog skin epithelium, Johnsen, A.H., Nielsen, R. 69:137
Thermodynamic analysis
–, pressure and temperature effects on human red cell cation transport, Hall, A.C., Ellory, J.C., Klein, R.A. 68:47
Thiocyanate
–, the kinetics of anion equilibrium exchange across the red blood cell membrane as measured by means of ^{35}S thiocyanate, Dissing, S., Romano, L., Passow, H. 62:219
–, thiocyanate transport across fish intestine (*Pleuronectes platessa*), Katz, U., Lau, K.R., Ramos, M.M.P., Ellory, J.C. 66:9
Threshold effect
–, threshold effects on the lectin-mediated aggregation of liposomes: influence of the diameter of the liposomes, Alecio, M.R., Rando, R.R. 67:137
Tight epithelium
–, electrical properties of the rabbit urinary bladder assessed using gramicidin D, Lewis, S.A., Wills, N.K. 67:45

–, transepithelial Na^+ transport and the intracellular fluids: a computer study, Civan, M.M., Bookman, R.J. 65:63
Tight junction
–, structure and permeability of goblet cell tight junctions in rat small intestine, Madara, J.L., Trier, J.S. 66:145
Time invariance
–, the flux ratio equation under nonstationary conditions, Sten-Knudsen, O., Ussing, H.H. 63:233
Tip resistance
–, some properties of KCl-filled microelectrodes: correlation of potassium "leakage" with tip resistance, Fromm, M., Schultz, S.G. 62:239
Tissue culture
–, comparison of the pacemaker properties of chick embryonic atrial and ventricular heart cells, Shrier, A., Clay, J.R. 69:49
Tissue distension
–, effect of distension on ADH-induced osmotic water flow in toad urinary bladder, Kachadorian, W.A., Levine, S.D. 64:181
Titratable acid
–, role of luminal buffers in renal tubular acidification, Costa Silva, V.L., Campiglia, S.S., de Mello Aires, M., Malnic, G., Giebisch, G. 63:13
TNBS
–, effects of local anesthetics on phospholipid topology and dopamine uptake and release in rat brain synaptosomes, Bradford, P.G., Marinetti, G.V. 67:211
–, trinitrobenzenesulfonic acid and fluorodinitrobenzene: probes to study local anesthetic effects in cell membranes, Bradford, P., Marinetti, G.V. 61:193
Toad skin
–, control of sodium permeability of the outer barrier in toad skin, Bevevino, L.H., Lacaz-Vieira, F. 66:97
–, electrolytes control flows of water across the apical barrier in toad skin: the hydrosmotic salt effect, Benedictis, E.M., Lacaz-Vieira, F. 67:125
Toad urinary bladder
–, cellular lithium and transepithelial transport across toad urinary bladder, Hughes, P.M., Macknight. A.D.C. 70:69
–, dopaminergic inhibition of vasopressin-stimulated water flow in the toad bladder: evidence for local formation of dopamine, Arruda, J.A.L., Sabatini, S. 68:89
–, effect of distension on ADH-induced osmotic water flow in toad urinary bladder, Kachadorian, W.A., Levine, S.D. 64:181
–, effect of monensin on osmotic water flow across the toad bladder and its stimulation by vasopressin and cyclic AMP, Mendoza, S.A., Thomas, M.W. 67:99
–, extracellular Ca^{2+} and the effect of antidiuretic hormone on the water permeability of the toad urinary bladder: an example of flow-induced alteration of flow, Hardy, M.A., Di Bona, D.R. 67:27
–, ion selectivity of the apical membrane Na channel in the toad urinary bladder, Palmer, L.G. 67:91
–, metabolism of poly(A)(+)RNA in toad bladder epithelial cells, Wilce, P.A. 62:163
–, serosal Na/Ca exchange and H^+ and Na^+ transport by the turtle and toad bladders, Arruda, J.A.L., Sabatini, S., Westenfelder, C. 70:135
–, time course of active Na transport and oxidative metabolism following transepithelial potential perturbation in toad urinary bladder, Rosenthal, S.J., King, J.G., Essig, A. 63:157
–, time course of vasopressin-induced formation of microvilli in granular cells of toad urinary bladder, Le Furgey, A., Tisher, C.C. 61:13
Tonoplast
–, the proton gradient across the vacuo-lysosomal membrane of lutoids from the latex of *Hevea brasiliensis*. I. further evidence for a proton-translocating ATPase on the vacuolysosomal membrane of intact lutoids, Cretin, H. 65:175
Toxins
–, role of membrane gangliosides in the binding and action of bacterial toxins, Fishman, P.H. 69:85
Tracers
–, the flux ratio equation under nonstationary conditions, Sten-Knudsen, O., Ussing, H.H. 63:233
Tracheal epithelium
–, chloride secretion by canine tracheal epithelium: I. role of intracellular cAMP levels, Smith, P.L., Welsh, M.J., Stoff, J.S., Frizzell, R.A. 70:217
–, chloride secretion by canine tracheal epithelium: II. the cellular electrical potential profile, Welsh, M.J., Smith, P.L., Frizzell, R.A. 70:227
Transepithelial fluid transport
–, epithelial cell volume modulation and regulation, Spring, K.R., Ericson, A.-C. 69:167
Transepithelial Na transport
–, aldosterone control of the density of sodium channels in the toad urinary bladder, Palmer, L.G., Li, J.H.-Y., Lindemann, B., Edelman, I.S. 64:91
–, effect of ouabain, amiloride, and antidiuretic hormone on the sodium-transport pool in isolated epithelia from frog skin (*Rana temporaria*), Nielsen, R. 65:221
–, the role of sodium-channel density in the natriferic response of the toad urinary bladder to an antidiuretic hormone, Li, J.H.-Y., Palmer, L.G., Edelman, I.S., Lindemann, B. 64:77
Transepithelial resistance
–, miniature Ag-AgCl electrode for voltage clamping of the *Ambystoma* collecting duct, Delaney, R., Stoner, L.C. 64:45
Transglutaminase
–, effects of the calcium-mediated enzymatic cross-liniking of membrane proteins on cellular deformability, Smith, B.D., La Celle, P.L., Siefring, G.E. Jr., Lowe-Krentz, L., Lorand, L. 61:75
Transit time
–, radio-frequency bioeffects at the membrane level: separation of thermal and athermal contributions in the Characeae, Pickard, W.F., Barsoum, Y.H. 61:39
–, radio-frequency rectification in electrogenic and nonelectrogenic cells of *Chara* and *Nitella*, Barsoum, Y.H., Pickard, W.F. 65:81
Transmembrane channels
–, dielectric relaxation studies of ionic processes in lysolecithin-packaged gramicidin channels, Henze, R., Neher, E., Trapane, T.L., Urry, D.W. 64:233
Transmural currents
–, steady states and the effects of ouabain in the *Necturus* gallbladder epithelium: a model analysis, Baerentsen, H.J., Christensen, O., Thomsen, P.G., Zeuthen, T. 68:215
Transport
–, action of caerulein, gastrin 17, pentagastrin, and secretin on the active transport of sodium by the frog skin, Greenwell, J.R., Low, H.S. 61:91
–, active potassium transport by rabbit descending colon epithelium, Wills, N.K., Biagi, B. 64:195
–, amino acid transport in isolated rat hepatocytes, Kilberg, M.S. 69:1
–, effects of calcium and lanthanum on phosphate efflux from nonmyelinated nerve fibers, Jirounek, P., Rouiller, M., Jones, G.J., Straub, R.W. 65:125
–, further studies on the charge-related alterations of methotrexate transport in Ehrlich ascites tumor cells by ionic liposomes: correlation with liposome-cell association, Fry, D.W., Goldman, I.D. 66:87
–, study of maturation of membrane transport function in red

blood cells by X-ray microanalysis, Lee, P., Kirk, R.G. 67:103
–, thiocyanate transport across fish intestine (*Pleuronectes platessa*), Katz, U., Lau, K.R., Ramos, M.M.P., Ellory, J.C. 66:9
Transport kinetics
–, phosphate transport in human red blood cells: concentration dependence and pH dependence of the unidirectional phosphate flux at equilibrium conditions, Schnell, K.F., Besl, E., v. der Mosel, R. 61:173
Transport mechanism
–, evidence for a two-state mobile carrier mechanism in erythrocyte choline transport: effects of substrate analogs on inactivation of the carrier by N-ethylmaleimide, Devés, R., Krupka, R.M. 61:21
Triamterene
–, fluctuation analysis of short-circuit current in a warm-blooded sodium-retaining epithelium: site current, density, and interaction with triamterene, Christensen, O., Bindslev, N. 65:19
Triiodothyronine
–, hormonal effects on fatty acid binding and physical properties of rat liver plasma membranes, Schroeder, F. 68:1
Triphenylmethylphosphonium
–, triphenylmethylphosphonium cation distribution as a measure of hormone-induced alterations in white adipocyte membrane potential, Vallano, M.L., Sonenberg, M. 68:57
Triton X-100
–, increase in size of sonicated phospholipid vesicles in the presence of detergents, Alonso, A., Sáez, R., Villena, A., Goñi, F.M. 67:55
T-tubule geometry
–, effect of chloride withdrawal on the geometry of the T-tubules in amphibian and mammalian muscle, Dulhunty, A. 67:81
Tumor
–, further studies on the charge-related alterations of methotrexate transport in Ehrlich ascites tumor cells by ionic liposomes: correlation with liposome-cell association, Fry, D.W., Goldman, I.D. 66:87
Turbidity
–, lipid-polyethylene glycol interactions: I. induction of fusion between liposomes, Boni, L.T., Stewart, T.P., Alderfer, J.L., Hui, S.W. 62:65
Turgor-pressure-sensing mechanism
–, transport properties of mobile charges in algal membranes: influence of pH and turgor pressure, Zimmermann, U., Büchner, K.-H., Benz, R. 67:183
Turgor regulation
–, turgor regulation in *Valonia macrophysa* following acute osmotic shock, Guggino, S., Gutknecht, J. 67:155
Turtle urinary bladder
–, electrogenic proton transport in epithelial membranes, Steinmetz, P.R., Andersen, O.S. 65:155
–, serosal Na/Ca exchange and H^+ and Na^+ transport by the turtle and toad bladders, Arruda, J.A.L., Sabatini, S., Westenfelder, C. 70:135
Uncoupling
–, disruption of energy transduction in sarcoplasmic reticulum by trypsin cleavage of $(Ca^{2+} + Mg^{2+})$-ATPase, Scott, T.L., Shamoo, A.E. 64:137
Unilamellar vesicles
–, lipid-polyethylene glycol interactions: I. induction of fusion between liposomes, Boni, L.T., Stewart, T.P., Alderfer, J.L., Hui, S.W. 62:65
Unstirred layer
–, D-glucose transport across the apical membrane of the surface epithelium in *Nereis diversicolor*, Gomme, J. 62:29
–, recycling of D-glucose in collagenous cuticle: a means of nutrient conservation, Gomme, J. 62:47
Vacuolar membrane
–, separation of tonoplast and plasma membrane potential and resistance in cells of oat coleoptiles, Bates, G.W., Goldsmith, M.H.M., Goldsmith, T.H. 66:15
Valinomycin
–, cation ionophores A23187 and valinomycin enhance protein-mediated transfer of rat liver microsomal phosphatidylinositol to liposomes, Patumraj, K., Slaby, F. 70:105
–, mechanism of calcium release from skeletal sarcoplasmic reticulum, Miyamoto, H., Racker, E. 66:193
Valonia
–, transport properties of mobile charges in algal membranes: influence of pH and turgor pressure, Zimmermann, U., Büchner, K.-H., Benz, R. 67:183
–, turgor regulation in *Valonia macrophysa* following acute osmotic shock, Guggino, S., Gutknecht, J. 67:155
Vasopressin
–, barriers to water flow in vasopressin-treated toad urinary bladder, Levine, S.D., Kachadorian, W.A. 61:135
–, dopaminergic inhibition of vasopressin-stimulated water flow in the toad bladder: evidence for local formation of dopamine, Arruda, J.A.L., Sabatini, S. 68:89
–, effect of monensin on osmotic water flow across the toad bladder and its stimulation by vasopressin and cyclic AMP, Mendoza, S.A., Thomas, M.W. 67:99
–, the significance of changes in thermodynamic affinity induced by aldosterone in sodium-transporting epithelia, Beauwens, R., Beaujean, V., Crabbé, J. 68:11
–, time course of vasopressin-induced formation of microvilli in granular cells of toad urinary bladder, Le Furgey, A., Tisher, C.C. 61:13
Vesicle-cell fusion
–, binding and incorporation of lecithin-cholesterol vesicles to lymphocytes: a spin-label study, Dresdner, G., Hammarström, L., Edvard Smith, C.I. 64:155
Vesicles
–, further studies of proximal tubular brush border membrane D-glucose transport heterogeneity, Turner, R.J., Moran, A. 70:37
–, stoichiometric studies of the renal outer cortical brush border membrane D-glucose transporter, Turner, R.J., Moran, A. 67:73
Vesicles Ca^{2+}-ATPase
–, Ca^{2+}-transport across basal-lateral plasma membranes from rat small intestinal epithelial cells, Hildmann, B., Schmidt, A., Murer, H. 65:55
Voltage clamp
–, comparison of the pacemaker properties of chick embryonic atrial and ventricular heart cells, Shrier, A., Clay, J.R. 69:49
–, conditioning prepulses and kinetics of potassium conductance in the frog node, de Bruin, G. 70:27
–, excitation-revealed changes in cytoplasmic Cl^- concentration in "Cl^--starved" *Chara* cells, Beilby, M.J. 62:207
–, interaction of spin-labeled local anesthetics with the sodium channel of squid axon membranes, Wang, H.H., Yeh, J.Z., Narahashi, T. 66:227
–, miniature Ag-AgCl electrode for voltage clamping of the *Ambystoma* collecting duct, Delaney, R., Stoner, L.C. 64:45
–, potassium currents in the giant axon of the crab *Carcinus maenas*, Quinta-Ferreira, M.E., Rojas, E., Arispe, N. 66:171
–, small signal impedance of heart cell membranes, Clapham, D.E., DeFelice, L.J. 67:63
–, sodium currents in the giant axon of the crab *Carcinus maenas*, Quinta-Ferreira, M.E., Arispe, N., Rojas, E. 66:159

Voltage-dependent calcium channel
–, potassium-induced insulin release and voltage noise measurements in single mouse islets of Langerhans, Dawson, C.M., Atwater, I., Rojas, E. 64:33
Voltage relaxations
–, transport properties of mobile charges in algal membranes: influence of pH and turgor pressure, Zimmermann, U., Büchner, K.-H., Benz, R. 67:183
Water channels
–, electrolytes control flows of water across the apical barrier in toad skin: the hydrosmotic salt effect, Benedictis, E.M., Lacaz-Vieira, F. 67:125
Water exchange
–, effects of temperature and pH on the water exchange through erythrocyte membranes: nuclear magnetic resonance studies, Morariu, V.V., Pop, V.I., Popescu, O., Benga, G. 62:1
Water flow
–, barriers to water flow in vasopressin-treated toad urinary bladder, Levine, S.D., Kachadorian, W.A. 61:135
Water fluxes
–, dependence of water movement on sodium transport in kidney proximal tubule: a microperfusion study substituting lithium for sodium, Corman, B., Roinel, N., de Rouffignac, C. 62:105
Water of hydration
–, pressure and temperature effects on human red cell cation transport, Hall, A.C., Ellory, J.C., Klein, R.A. 68:47
Water permeability
–, effects of catecholamines on electrolyte transport in cortical collecting tubule, Iino, Y., Troy, J.L., Brenner, B.M. 61:67
–, electrolytes control flows of water across the apical barrier in toad skin: the hydrosmotic salt effect, Benedictis, E.M., Lacaz-Vieira, F. 67:125
–, epithelial cell volume modulation and regulation, Spring, K.R., Ericson, A.-C. 69:167
–, extracellular Ca^{2+} and the effect of antidiuretic hormone on the water permeability of the toad urinary bladder: an example of flow-induced alteration of flow, Hardy, M.A., DiBona, D.R. 67:27
–, a simple technique of measuring high membrane permeabilities of human erythrocytes, Osberghaus, U., Schönert, H., Deuticke, B. 68:29
–, time dependence of the effect of *p*-chloromercuribenzoate on erythrocyte water permeability: a pulsed nuclear magnetic resonance study, Ashley, D.L., Goldstein, J.H. 61:199
Water permeability of cell membrane
–, relations between intracellular ion activities and extracellular osmolarity in *Necturus* gallbladder epithelium, Zeuthen, T. 66:109
Water transport
–, dopaminergic inhibition of vasopressin-stimulated water flow in the toad bladder: evidence for local formation of dopamine, Arruda, J.A.L., Sabatini, S. 68:89
–, ^{3}HOH-osmotic water fluxes and ultrastructure of an epithelial syncytium, Brodie, D.A., Podesta, R.B. 61:107
X537A
–, ionophore-mediated transmembrane movement of divalent cations in small unilamellar liposomes: an evaluation of the chlortetracycline fluorescence technique and correlations with black lipid membrane studies, Mathew, M.K., Nagaraj, R., Balaram, P. 65:13
Xanthene dyes
–, erythrosin and pH gradient induced photo-voltages in bilayer membranes, Varnadore, W.E. Jr., Arietta, R.T., Duchek, J.R., Huebner, H.S. 65:147
X-ray diffraction
–, lipid-polyethylene glycol interactions: II. formation of defects in bilayers, Boni, L.T., Stewart, T.P., Alderfer, J.L., Hui, S.W. 62:71
X-ray microanalysis
–, study of maturation of membrane transport function in red blood cells by X-ray microanalysis, Lee, P., Kirk, R.G. 67:103
Yeast cells
–, anilinonaphthalene sulfonate fluorescence and amino acid transport in yeast, Slavík, J., Horák, J., Říhová, L., Kotyk, A. 64:175
Zea mays
–, pump-leak sodium fluxes in low salt corn roots, Cheeseman, J.M. 70:157
